(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0561 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	The resident group meeting was held on 12/12/19 at 11:31 a.m. with six alert and oriented residents selected by the facility to participate in the group. The residents revealed in the meeting that some residents were allowed to leave the facility with a pass, however, they had to tell the nurse before they left The president of the resident council said in order for residents to leave the building they had to have a physician's order and needed permission to leave the facility. Six of the six residents said this policy made them feel like they were treated as children and not respected as adults.			
	B. Resident #116's status			
	Resident #116, under age 65, was admitted [DATE]. According to the December 2019 computerized physician order (CPO), diagnosis included traumatic brain injury.			
	The 11/1/19 minimum data set (MDS) assessment revealed the resident was cognitively intact with a brief interview for mental status (BIMS) score of 15 of 15. The resident required supervision with activities of daily living (ADLs) and ambulation around the facility and required no physical assistance.			
	1. Resident interview			
	Resident #116 was interviewed on 12/9/19 at 12:35 p.m. He said he can not leave the facility. He said he had to have a physician note to leave the facility. He said the physician would not give him a reason why he could not have a pass to go out of the facility. He said he feels locked up in the facility.			
	2. Record review			
	The December 2019 CPOs docum store outings.	ented the resident may go out with the	activities department to attend	
	The care plan entry dated 8/25/19 documented Resident #116 goal as the resident would go on one stor outing quarterly. The interventions documented included the importance of going outside when the weat was good and an interest in attending veteran events outside the facility.			
		22/19 revealed the resident was no long inging in items that were not allowed in	•	
	3. Staff interview			
	The assistant nursing home administrator (ANHA) was interviewed on 12/18/19 at 3:37 p.m. To a physician's order was necessary for the safety of the residents. She said they need to always where the residents were and when they would be back. She said a standing order could be we resident was cognitively in tack and safe to leave and return to the facility. She said a physicial be written quickly in the event a resident had a last-minute outing they wanted to attend or had the facility.

F 0561	C. Resident #80's status				
Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Resident #80, age 41, was admitted on [DATE] and readmitted on [DATE]. According to the December 2019 computerized physician order (CPO), diagnoses include major depressive disorder, post-traumatic stress disorder, and attention-deficit hyperactivity disorder. The 10/16/19 minimum data set (MDS) assessment revealed the resident's cognitive status was intact with a brief interview for mental status (BIMS) score of 15 out of 15. The resident was completely dependent on a wheelchair.				
	Resident observation and intervi	ew			
	Resident #80 was interviewed on 12/18/19 at 6:00 p.m. He said on 4/19/19 he left with one of the other residents to go with his mother to a nearby hotel to attend an Easter party. After the party the three of th went to a restaurant for dinner. When he and the other resident returned to the facility he said the nurse very upset and made him feel like he 'committed a crime.' He said the nurse called the police and report him and the other resident as missing persons. He said she yelled at him that he needed to sign out who leaves the facility even though he had a four hour pass to leave the facility. He said the DON and NHA 'crazy' when he got back.				
	2. Record review				
	The progress note dated 4/20/19 at 12:00 a.m. and signed by the licensed practical nurse (LPN) read in pertinent part Resident #80 returned to the facility and was educated on signing out before leaving the facility and being back to the facility before midnight. It read Resident #80 understood and received his medication. The progress note dated 4/20/19 at 12:34 a.m. and signed by LPN #7 read in pertinent part Resident #80 was out on pass with his mother and had forgotten to sign out before he left. It read he barely made it back before midnight.				
	3. Police contact				
	The NHA provided the facility's missing person report on 12/18/19 at 3:00 p.m. The missing person read that he went out on leave with his mother on 4/19/19.				
	4. Staff interviews

	B. Resident group interview			
	A resident group interview was held on 12/12/19 at 11:00 a.m. with six alert and oriented residents selected by the facility to participate in the group. They said they had to ask for towels. Six of the six residents said they did not have towels in their rooms. The president of resident council said they were told they had to request a towel for the rooms. They said towels were not passed out daily. They said sometimes the staff could not give showers because there were no towels in the shower rooms.			
	C. Resident interviews			
	Resident #35 was interviewed on 12/12/19 at approximately 12:30 p.m. The resident said he was independent in his showers and there were times, he could not take a shower because there were no tower.			
		2/12/19 at approximately 12:45 p.m. TI she does get a towel it was a wash clo		
	Resident #130 was interviewed on 12/12/19 at approximately 12:45 p.m. The resident said she does not ever have towels. She said she has to ask for towels.			
	D. Staff interviews			
	The laundry aide and laundry facility manager (LFM) were interviewed on 12/12/19 at 2:30 p.m. The laundry aide said the facility had a lot of towels to wash. She said the laundry was responsible for delivering the towels. She said the towels large shower towels were placed in the shower rooms and the linen closets along with wash cloths. The facilities manager said the towels were delivered to the residents but was not sure when or how often. The LFM said the facility had no hand towels only wash clothes and bath towels. He said there was no shortage of towels in the facility.			
	The nursing home administrator (NHA) was interviewed on 12/12/19 at approximately 2:45 p.m. The NHA said the facility did not provide towels in the rooms unless requested, as there was only one towel rack in the room and it became an infection control issue. She said the residents had paper towels in the rooms. She said if the resident requested towels in the room, then it was put on the care plan.

F 0600	RN #1 was interviewed on 12/9/19	at 12:36 p.m. RN #1 said Resident #43	B was fast, and that he touched	
Level of Harm - Minimal harm or potential for actual harm	RN #1 was interviewed on 12/9/19 at 12:36 p.m. RN #1 said Resident #43 was fast, and that he touched other residents inappropriately on the buttocks and the breasts. RN #1 stated they did not track when the resident touched other on the buttocks or breasts as it did not fit the criteria of tracking for sexual inappropriateness.			
Residents Affected - Few	On 12/9/19 at 12:39 p.m., Resident #43 was observed to wander into a crowded area in the living room and approached Resident #73 with his hand extended, Resident #43 was observed to pat the buttocks of Resident #73. Resident #73 was startled and began to speak in Spanish at Resident #43 and began to shoo him away with hand gestures. Resident #43 was redirected from the area.			
	C. Record review			
	The 12/9/19 care plan identified, Resident #43 had a history of exhibiting verbal, physical, and inappro sexual behaviors related to, cognitive loss/dementia. The care plan further documented, Resident #43 had episodes of agitation toward other residents and exhibiting sexually inappropriate behavior toward and other residents with difficulty being redirected. The interventions on the care plan documented, the nature and circumstances (i.e. triggers) of the physical behavior with resident examples which included provoked, becoming defensive, purposeful, during specific activities, involvement of others, and pattern would be evaluated. The care plan documented, the behaviors would be discussed amongst the interdisciplinary team and adjust care delivery appropriately. The care plan also called for removing the resident from the area if necessary.			
	The physician's progress note dated 11/18/19 documented, the resident was seen for an increase in physical and verbal sexual behaviors. The behaviors increased after a decrease in Risperidone, typically in the afternoon when he was most active.

	CNA #2 was interviewed on 12/9/19 at 12:47 p.m. The CNA said stated they typically take Resident #43 with them from room to room as they perform cares on other residents and ask him to wait outside. CNA #2 said Resident #43's behavior was typical dementia behavior and she did not consider it to be sexual; including the use foul language, crude remarks, and touching others on their bottoms. CNA #2 said they would redirect him. CNA #2 said she had been touched by Resident #43 and it made her feel very uncomfortable. CNA #2 said she felt that added activities and walks could help Resident #43. CNA #2 said the sexual inappropriate touching happened about three times a week. CNA #2 said when behaviors occur, the CNAs were not responsible to track and document, they were trained to inform the licensed nurse. CNA #2 further revealed the resident's who resided on the memory unit were not capable to make safe daily decisions due to their cognitive status.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		on)
F 0689 Level of Harm - Immediate jeopardy to resident health or safety	The intervention of encourage resident to attend all activities, was added to the care plan however, according to the interview with the nursing home administer on 12/17/19 at 3:45 p.m., the resident did not like to attend group activities. Review of the activity participation records for November and December 2019 showed he did not attend activities that he preferred in room activities. The regional nurse consultant said on 12/17/19 at 3:45 p.m., he was being evaluated for pet therapy as he liked dogs.		
Residents Affected - Few	The resident was observed on 12/10/19 at 3:21 p.m. in his room with a 1:1 CNA. They were sitting in the room, not engaged in any interactions, i.e talking or other activities. The resident began moving his feet back and forth, the CNA got up and took him to the bathroom. Afterwards, they returned to where they were sitting previously. They remained in the room until 4:06 p.m. The CNA took the resident out of his room and walked around the unit.		
	The intervention of resident refused therapy was added on 10/19/19 and that they would attempt again if he would participate. However, the facility was aware he was not wanting to participate in therapy according to the interview with the NHA on 12/17/19 at 3:45 p.m. The NHA said the resident was referred to therapy 13 times and he refused nine times and worked with therapy five times.		
	The intervention with soft helmet was added on 10/29/19, however, he had 20 falls prior to the soft helmet addition on the interventions. The summary event reports showed he had eight unwitnessed falls, and eight falls which resulted in a head injury or report that he hit his head. The remaining four falls were witnessed and staff reported he did not hit his head. The NP was interviewed on 12/17/19 at 12:50 p.m. The NP said the resident did not like to wear the soft helmet and he would throw it across the room. The event summar reports were reviewed and none of them reported the soft helmet was on when the resident sustained falls and injuries.		
	The NHA was interviewed on 12/17/19 at 3:45 p.m. The NHA said the resident was always walking, and enjoyed going outside to walk. She said he was difficult to keep sitting, as he always enjoyed walking. The facility failed to include the resident in a restorative walking program. The medical record showed no evidence the resident was on a restorative program which would have allowed the resident to safely engag in an activity he enjoyed.

F 0689	VII. Interviews		
Level of Harm - Immediate jeopardy to resident health or safety	RN #3 was interviewed on 12/16/19 at 9:43 a.m. she stated she was pretty much 1:1 with him. She said she wasn't sure if there was an order or not but he would get up and fall. RN #3 said she tried to keep him close. She said she had him sit at the cart while she went into other rooms so he could be close to her		
Residents Affected - Few	The director of nurses (DON) was interviewed on 12/17/19 at 9:45 a.m. The DON confirmed the resident had fallen 26 times since July 2019. She said an event summary and fall investigation should be completed after each fall. She said interventions should be implemented and added to the care plan after each fall. She said when the IDT reviews the falls then the IDT team will add more interventions as needed. She said she keeps a log of all falls, however, she does not have any information from July 2019 to September 2019. She said a unit manager was keeping the log and she could not find the information. She said she took over monitoring the falls in September 2019. She said a fall investigation should have been completed when he fell outside of the facility.		
	The DON said Resident #33 had a sitter since September 2019, however, she said it was discontinued in early November 2019 as the criteria to use a one on one sitter was to prevent falls, however, he had three falls with the one on one sitter, and the IDT reviewed the falls and determined to remove the one on one sitter, and just keep an eye on him. She said the NP reviewed the medication on 8/14/19. She said the soft helmet was added to the care plan 10/29/19.		
	The DON said in July 2019, he was alert and oriented, and he has now had a significant change in his cognitive status. She said it was a combination of falls and diabetes. The DON said the NP said that he had a traumatic brain injury.

	C. Pain assessment		
	The most recent pain assessment was completed 9/4/18 over a year ago and it failed to complet accurately assess the resident's pain level. The pain assessment documented the resident was indicate the location and characteristics of his pain. However, the assessment did not show that or the characteristics of the pain were assessed. The acceptable level of pain on the assessment However, the MAR documented the resident as having a level of four without any indication as to resident was assessed or reassessed after any interventions if any were given.		
	The assessment documented the p	pain was in his knees, lower extremities	s and his back.
	The assessment did not document any non-pharmaceutical interventions. The medical record showed no evidence the non medication interventions were provided.		
	The assessment concluded the resident was dissatisfied with the drug regimen and wished to have a stronger pain medication from the provider.		
	The care plan last revised on 4/22/19 identified the resident exhibited or was at risk for alterations in comfort related to acute pain with a diagnosis of neuropathy. The care plan documented current acceptable pain level of 7/10 however it varied due to resident pain tolerance. The goal was for the resint to achieve an acceptable level of pain control. Pertinent interventions were to utilize pain scale, medicate for pain as ordered, complete pain assessment per protocol.		
	-The care plan failed to document any interventions which were non-pharmaceutical.		
	hands, knees and shoulders. F 0697	Interviews			
Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	The director of nurses (DON) was interviewed on 12/18/19 2:31 p.m.The DON said a complete pain assessment was to be completed on admission, quarterly and on a change of condition. She said a full assessment needed to be completed even if the resident was on a pain regimen. She said the pain scale was to ask every shift. She said it needed to be documented on the MAR. She confirmed the latest pain full assessment was done over a year ago on 9/10/18 and the resident 's pain tolerance was marked as a 7.			
	The licensed practical nurse (LPN) #6 was interviewed on 12/18/19 at 10:08 a.m. The LPN said the resident complained of pain in his knees and also pain from his arthritis. She said that there were no non-pharmaceutical interventions used. She said the resident 's pain tolerance was 4 out of 10. She said he did not take the PRN hydrocodone as he did not like how it made him too sleepy.			
	Follow up			
	The facility submitted via email on 12/20/19 a response that the resident was assessed for pain quarterly through the MDS assessment. However, the MDS assessments completed on 9/27/19, 7/31/19, 5/6/19 and 2/11/19. However, the MDS assessments failed to assess the resident for the characteristics of the pain, additional symptoms associated with the pain, current medical condition, and the resident's goal for pain management.			
	42193			
	III. Resident # 66			
	Resident #66, age 66, was admitted on [DATE]. According to the December 2019 computerized physician orders (CPO), the diagnoses included type 2- diabetes mellitus with hyperglycemia and hypertension.			
	The 10/18/19 minimum data set (MDS) assessment revealed the resident was cognitively intact with a brief interview for mental status score of 15 out of 15.She required no assistance with bathing, dressing, eating or mobility. The MDS indicated pain assessment interview and it determined that the resident had a frequent pain level of 7.The MDS coded the resident as not having any non-medication interventions.			
	A. Resident Interview			
	Resident # 66 was interviewed on 12/10/19 9:41 a.m.The resident stated that the facility lowered her medication dose right after she moved into the facility. She said that a tolerable pain level was between two and three on the pain scale. The resident said her pain level could get as high as a six or seven on the pain scale. She said she had not been to a pain clinic and had not tried any non-pharmacological methods of parelief. She preferred to take medications to relieve her pain. The resident said that her pain issues were caused by a gastric bypass surgery that she had in 2003. She said that her pain is localized in her stomacarea.

	RN #5 was interviewed on 12/12/19 at 1:54 p.m. She said the facility had an issue with staffing. She said they were always short-staffed. She said there was no collaboration between staff and management for ideas to help the problem. She said the facility was slow to hire new staff.			
	RN #1 was interviewed on 12/9/19 at 9:54 a.m. She said she had one nurse and two CNAs for 27 people and it was not enough. RN #1 said she could not go to the bathroom or leave the area as they required a minimum of three people to assist the residents.			
		on 12/11/19 at 2:34 p.m. She said they aviors that required staff assistance. UN al support.		
	UM #1 was interviewed again on 13 four nurses during the day shift.	2/16/19 at 10:39 a.m. She said that the	[NAME] unit had six CNAs and	
	The staffing coordinator was interviewed on 12/16/19 at 5:07 p.m. She said they staffed sufficiently. The staffing coordinator had not heard complaints of being short staffed. The staffing coordinator stated they did not use licensed practical nurses (LPNs) as CNAs. The staffing coordinator stated they had a staffing phone that was available 24 hours a day and someone always had it. If needed they would call people in to work and offer bonuses for extra shifts picked up. The staffing coordinator confirmed the staff were short on 12/7/19.			
	The nursing home administrator (NHA) was interviewed on 12/18/19 at 6:40 p.m. She said the staff never complained to her about being short staffed and she felt like they would tell their managers. She said the were working on improving retention, and staff calling out was part of having employees. She stated that when staff did call out they offered raises and incentives to work to the other employees. She confirmed facility was appropriately staffed on 11/16/19.			
	The NHA was interviewed during the quality assurance meeting on 12/18/19 at 6:28 p.m. She said, facility) never schedule four CNAs. We usually have three CNAs on the units. She said that typically two nurses and two CNAs scheduled on the [NAME] unit. Two nurses on the Columbine unit. She sa had staff calling in but felt the facility had covered the shifts with other employees. She said, We hav agency nurses starting this month. We are down two nurses and the ADON (assistant director of nur in her 30 days notice. She said, We pay tuition and offer tuition reimbursement to get staff. We do a retain staff.

Specifically, the facility failed to ensure medications were not left out on the cart or at the nurse when a nurse was not present.				
	Findings include:			
	Observations			
	On 12/9/19 at 10:32 a.m. the medication cart located on the 1500 hall was observed with a medicati lying on top of it. The medication card contained Seroquel 50 milligram (mg) tabs. There was no nur hallway.			
	- At 10:33 a.m. a staff member wal	ked past the cart.		
	- At 10:36 a.m. registered nurse #5 went into the medication room.	returned to the medication cart and pic	cked up the medication card and	
	On 12/12/19 at 11:36 a.m licensed practical nurse (LPN) #3 was observed at the nurses station. She was sitting at the computer and had a plastic 30 milliliter (ml) medication cup full of a thick white liquid sitting on the desk next to her. The nurse got up and went to the medication room, she left the medication cup at the nurse station, unattended. While in the medication room a staff member and a resident passed by the nurses station where the medication was set. She returned to the nurses station, looked up an order on the computer, got up again and went to the locker room across the hall. She left the medication cup on the counter at the nurses station, unattended.			
	Staff interviews			
	Registered nurse (RN) #4 was interviewed on 12/9/19 at 10:45 a.m. She acknowledged that she had left the medication card of Seroquel on her cart. She said it had been discontinued and she was going to put it in the medication room to be destroyed but someone had come and and asked her to help with something so she left. She said that the nurses were not supposed to leave medications unattended on the medication carts.			
	LPN #3 was interviewed on 12/12/19 at 11:40 a.m. She acknowledged that she had left the medication cup at the nurses station, unattended. She said that medications were not supposed to be left unattended by nurses.			
	The director of nursing (DON) was interviewed on 12/18/19 at 1:49 p.m. She confirmed that medications should not be left unattended by the nurses.

	Resident #35 was interviewed on 12/12/19 at approximately 12:45 p.m. The resident said the food was served cold and did not have much flavor.			
	C. Resident group interview			
	The resident group meeting was held on 12/12/19 at 11:31 a.m. with six alert and oriented residents selected by the facility to participate in the group. The residents revealed in the meeting the food was an issue. Six of the six residents agreed the food was often served cold, and that it was bland in taste. The residents said the meat was tough and difficult to chew.			
	D. Observation			
	-On 12/12/19 the lunch meal service	e was continuously observed from 11:	45 a.m. to 1:00 p.m.	
	-A breeze blowing from the dining area through the distribution window and across the ready to serve food line.			
	-The temperature log dated 12/12/19 revealed the starting temperatures for the meal were within palatable serving parameters being 160 degrees F and above. Temperatures held throughout the serving process.			
	Tray line observation for evening m	neal 12/16/19

Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few Based on interviews and record review, the facility failed to ensure an effective quality assurance program to identify and address facility compliance concerns was implemented, in order to facilitate improvement in the lives of nursing home residents, through continuous attention to quality of care, quality of life, and resident safety. Specifically, the quality assurance performance improvement (QAPI) program committee failed to identify and address concerns related to resident safety and safe environment, abuse prevention and investigation, restorative and range of motion services, sufficient nursing staffing, meaningful activities, pain management, and palatable food. The facility's failure to identify and address quality concerns at F689 resulted in Resident #33 experiencing repeated falls with injury and functional decline. Findings include: Cross reference F689: The facility failed to ensure residents had an environment that reduced the resident risk of accident or injury, and that injuries and planned safety interventions were considered and evaluated to keep residents safe. These failures resulted in a situation of immediate jeopardy. The facility was previously cited on and abbreviated survey 9/13/19 at a G (harm) level. Cross reference F 688: The facility failed to ensure residents who enter facility with limited mobility and range of motion received appropriate services and assistance to maintain or improve mobility with the maximum practicable independence unless a reduction in mobility was demonstrated unavoidable. F 0880	Provide and implement an infection prevention and control program.				
Level of Harm - Minimal harm or	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 42161				
potential for actual harm Residents Affected - Some	Based on observations and interviews the facility failed to ensure infection control practices were followed to prevent the spread of infection. Specifically, the facility failed to ensure: - Proper care and storage of oxygen equipment, nasal cannulas.				
	- Cleaning of call light cords and ba	athroom environment and equipment.			
	Findings include: Observations and staff interviews On 12/12/19 at 9:00 a.m. and on 12/16/19 at 2:30 p.m. during the environmental tour with the maintenance director (MTD), maintenance assistant (MA) #1, housekeeping manager (HSM), and regional clinical representative who was the interim infection preventionist, and the nursing home administrator (NHA). The following observations were made: - room [ROOM NUMBER] had black substance in the caulking on the floor around the toilet. - Rooms #503, #704, #801, #802, #803, #807, #1102, #1106, #1108, #1204, #1207, #1308, #1403, #1606, #1610, and #1701 all had brown substance on call light pull cords in the residents bathrooms. - Rooms #1204, #1509, #1510, had oxygen nasal cannula lying on the floor and not stored appropriately.				
	- room [ROOM NUMBER] had a temporary support beam next to the toilet with duct taped padding that was not a cleanable surface wrapped around it and there were deep scrapes in the toilet seat.				
	The MTD said the pull cords were cleaned on a monthly basis. He said the pull cords could not touch the floor or be too short. He said he did not think about cleaning the pull cords before. He said he was going to buy a roll of cord to replace all of the pull cords.				
	The MTD said for room [ROOM NUMBER] he was going to send someone in to clean the floor around the toilet and if it could not be cleaned then he would replace the tiles.				
	The HSM said he would send some cleaned regularly.	eone in #501 right away. He said he did	d not know the pull cords should be

F 0880	Facility follow-up			
Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	The MTD was interviewed again on 12/17/19 at 9:35 a.m. He said the MA #1 and himself were working on replacing all of the pull cords in the facility. He said most of them were already replaced and finished. He sa he replaced the support bar in room [ROOM NUMBER] in the restroom. He said the MA #1 was spending h day fixing the problems in the rooms and replacing bathroom call light pull cords. He said he had the HSM add bathroom call light cords to their daily cleaning log. He said the new call light pull cords had a plastic sleeve around them which made them a cleanable surface. He said he made one of them dirty then cleaned it to see if it came all the way clean with success.
