F 0580  Level of Harm - Immediate jeopardy to resident health or safety  Residents Affected - Few	E. Record review of the nursing progress notes dated 12/27/21 at 21:24 (9:24 pm) EMTs arrived on scene. EMTs stated that pt (patient) was stable and that 02 was empty and that the O2 tank was not hooked up properly EMTs took over pt care at this time along with other night nurse. EMTs stated to family that pt was stable and that maybe the nurses should collect a UA (urinalysis) because pt had a fever at this time as well and that we should check for a UTI (Urinary Tract Infection). Writer notified EMTs of current critical potassium lab of 2.9 (low patassium can result in fatigue, muscle cramps and abnormal heart rhythms); pt had reported episodes of CP (chest pain) previous shift. EMTs continued to speak with family and stated that family should keep pt here at facility because we could treat a UTI and low potassium here at the facility and that she would just be waiting in the waiting room all night anyway. Family chose to keep pt in facility against writers' (LPN #9) suggestion to be transferred to hospital.		
	<ul> <li>F. Multiple outreach efforst were made to R #210's family throughout the survey however never recevied a call back.</li> <li>G. F 0686  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Few	describe the sacral wound on R #9 thought she had C. Diff [Clostridioid normal bacteria in the colon]. She I (CNAs) were neglectful and that's I would tell me [about the neglectful tenderness. You could feel the tailt lead to a rash around her brief. Wh shift would report the night shift and Nurse Executive (CNE)] let both Cl has no pain. [Name of R #96] has I issue for her. She went to the hosp Tract Infection]. When asked when months ago. When asked if the fan not mentioned to [name of R #96's wound care position. Our old Nurse There were a lot of changes. [Nam doctors do the work. PACE did not care, which is basic, for example, I order in for it. Because it wasn't fro nobody let PACE know [about the explain the process to inform PACI and they will redirect you to the nur have never seen anybody from PA for an hour. Before the pandemic, I video calls. When asked to discuss know about it. When I changed her days to do her wound treatment. W working with her. Its up to the nurse to go to each residents. With med to tell us if residents have new wound with identifying wounds, he stated, we are, I have been working on 10 as scheduled. Due to staffing, the I And then the wounds will go about	an interview with LPN (Licensed Practic 6, he explained, It started off as a moist des difficile, a serious bacterial infection and a lot of diarrhea. In December, the now she developed this moisture assoc CNAs]. She was left with a lot of moist pone and she had a lot of yeast substanten her bed was soiled, her back was ind we figured out which CNA was responsed by the wound for about 3-4 months. The sacral wound for about 3-4 months. The sacral wound was discovered, he nily member of R #96 was informed offamily member]. During that time [Name et al., 100] was leaving and we expressed by a sacral wound. We put it in as ets say somebody accidentally scratch of the practitioner (NP) was leaving and we expressed by wound. We put it in as ets say somebody accidentally scratch of the progression of the wounds. In the progression of the wounds, I would go to them and do therapy wounds, I depend on the CNAs. I would hen they get her up, I would do it then the and CNAs to keep an eye on it. When they get her up, I would do it then the and CNAs to keep an eye on residents or new skin issues. When asked if the lift the nurse is not doing it, its hard to keep will and when I get back to the 200 hourses will split a hall, so they will chart 4 days without a wound change. If the follow-up to know if its getting worse.	sture associated wound. We in that causes a disruption of the Certified Nursing Assistants stated wound. A lot of the residents ture. She started off with a lot of ince around her peri area, which ritated. We figured out that the day insible. [Name of previous Center healing, it has gotten smaller. She The C. Diff is a newly discovered dehydrated with a UTI [Urinary explained It was discovered some the sacral wound, he stated It was ne of LPN #8] was going into the were onboarding our new NP. In the different of the sacral wound he stated the pace of the sacral wound he stated It was ne of LPN #8] was going into the were onboarding our new NP. In the different of the wound end there skin, we would put an dressing on it. I'm pretty sure that be a standing order for her wound end there skin, we would put an dressing on it. I'm pretty sure that be a stand tell them about the patient eas are supposed to come in but I see have a whole team who gather year and everything but now they just plained The nurse and CNAs would all try to catch her on her shower. They would help me as they are in we have med techs its hard for us its. We depend a lot on residents to be skin assessments would help mow. Because of how short staffed that they didn't get to the wounds.

F 0835	Laundry issues:		
Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Many	D. On [DATE] at 8:45 am, during an interview with Center Executive Director (CED), he stated that he is aware of the issues in the laundry. He stated that apparently there are some personnel problems between laundry and other staff. He stated that they are talking about getting mesh bags per each resident to put their clothes in and they get washed in the mesh bags. That hasn't happened yet.  E. On [DATE] at 10:35 am, during an interview with the Social Services Director (SSD), he stated that he handles the grievances when they come in. He will get the grievance and assign it out to the appropriate department. He has received lots of complaints/grievances about laundry. the problem that he has with the laundry is that he is not sure that they actually ever look for the missing clothing. SSD stated that he will go there (laundry) himself and look. Sometimes the laundry staff will get mad at him or anyone who goes to laundry to look for missing clothes. He stated that laundry tells everyone that there are no names on the clothing but that isn't true, most of them are clearly marked. Each resident's clothes have their name in big letters on it. He stated that 90% of the grievances are about missing clothing. He has told the Center Executive Director but nothing ever gets done or changes.  Quality Assurance Performance Improvement (QAPI):  F. On [DATE] at 2:23 pm, during an interview with Center Executive Director #2, he stated that they were unable to locate any QAPI information. He is not aware of any sign in sheets, who has attended, how frequently the meetings are taking place and what has been worked on in the QAPI process. He stated that since [DATE] he was unable to locate any information.  G. (X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by	CIENCIES full regulatory or LSC identifying informati	on)	
F 0842	December 2021 there were three d	ocumented.		
Level of Harm - Minimal harm or potential for actual harm	January 2022 there were two docu	mented.		
Residents Affected - Some	February 2022 there were none pro	ovided.		
Residents Affected - Some	March 2022 there were none provide	ded.		
	Of 17 possible weekly bath and shower reports only 5 were provided.			
	Findings for R #46			
	D. Record review of the weekly bath and skin report indicated the following:			
	December 2021 there are three do	cumented.		
	January 2022 there are three docu	mented.		
	February 2022 there were none pro	ovided.		
	March 2022 there was one docume	ented.		
	Of 17 possible weekly bath and sho	ower reports only 7 were provided.		
	Findings for R #47			
	E. Record review of the weekly bat	h and skin report indicated the followin	g:	
	December 2021 there was one doc	cumented.		
	January 2022 there was one documented.			
	February 2022 there were none provided.			
	March 2022 there were three documented.			
	Of 17 possible weekly bath and shower reports only 5 were provided.			
	F. On 04/01/22 at 10:17 am, during an interview with Certified Nursing Assistant (CNA) #9 regarding charting and shower sheets, she stated there isn't enough time to document, so if something were to not get done it would be charting/documenting. She stated that she is currently having a problem with her tablet and not being able to log in and so she had to go take care of that issue.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC	<u> </u>		
F 0842  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Some	G. On 04/06/22 at 11:54 am, during an interview with Registered Nurse #1, she stated that documentation had been discussed a lot. RN #1 stated that they have tried everything with staff about the importance of documenting. Nothing seems to work. There are issues for the Certified Nurse Aides (CNA) with their tablets not working. She stated that the CNA's have told her that the tablets not working is the #1 issue why they didn't document. She stated that micro-managing them hasn't worked either. She agreed that the documentation was sparse.			
	45426 Findings for R #15			
	H. Record review of R #15's medical record revealed in a care plan meeting note dated 08/03/18 that he is NPO (Latin for nothing by mouth) resident.			
	I. Record review of R #15's Kardex (a system of communication and organization used in nursing that helps long term care facilities document patient and resident care summaries) under Eating stated Encourage resident to consume all fluids during meals. Offer/encourage fluids of choice. Free H20 [water] as ordered.			
	J. On 3/29/2022 at approximately 1:45 PM, during an interview, Kitchen Manager, KM, confirmed the Kardex for R #15 was not correct. R #15 is an NPO resident and should not be encouraged to consume liquids.			
	K. On 3/30/22 at 4:08 PM, during an interview with the Registered Dietician (RD), she confirmed that R #15 is an enteral feed (a method of supplying nutrients directly into the digestive tract) resident. He should not be taking in hydration orally and he is NPO. Free H2O means the amount of water needed to flush the tubing for his enteral feeding and that counts towards his hydration. The Kardex is not accurate.			
	Findings for R #61:			
	following diagnoses: abnormal weig following cerebral infarction (a strok disorder, recurrent, moderate (repe is the next level up from mild depre-	al record revealed he was admitted to the loss; dysphagia (a condition with diffuse of the brain); muscle weakness (genating episodes of depression, after perssion which can cause problems at holication deficit. This list is not compreh	ficulty in swallowing food or liquid) eralized); major depressive iods of time without symptoms that me and work); unspecified lack of	
	M. On 03/28/22 a Record Review o	f R #61's Care Plan entry created 03/0	9/2022 revealed the following:	
	During my 'Preferences for Custom	ary Routine' Interview, there were daily	routine	
		e most important things for the center		
	about my preferred daily routine are with lids open, and utensils readily	e: Please sit up/get me into chair for all within reach.	meals, as well as set up my meals
