Residents Affected - Few	Based on record review, staff interview (Resident #28) for 1 of 24 residents	view, the facility failed to develop a cards reviewed for care plan.	e plan for an actual pressure ulcer	
	Findings included:			
	Resident #28 was admitted to the f	acility on [DATE] with the diagnosis of	dementia.	
	Nursing admission note dated 10/14/21 documented Resident #28 had a blister on his right foot (heel) and a skin tear on his right buttock. There was not documentation that the left heel was assessed. Resident #28 's care plan dated 10/22/21 documented he had an ADL self-care performance deficit and potential for pressure ulcer. Resident #28 's admission Minimum Data Set (MDS) dated [DATE] documented he had clear speech, understood/understands and had severely impaired cognition. He required total dependence for all activities of daily living (ADL). He had two stage 2 pressure ulcers. On 12/20/21 at 2:30 pm an interview was conducted with the MDS Coordinator. She stated that Resident #28 's heel pressure ulcers were missed on admission and a care plan for actual pressure ulcers was not completed.			
	On 12/20/21 at 3:10 pm an interview was conducted with the Director of Nursing (DON). She stated Resident #28 had blisters on his heels on admission that were missed, and a care plan was not done.

F 0684 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	On 12/6/21 at 10:10 am an interview was conducted with the wound care nurse (WCN). The WCN stated that she was responsible for all resident wounds with dressings except minor skin tears. The WCN stated that the Director of Nursing (DON) was responsible to inform nursing staff to complete wound care when the WCN was not available. The WCN stated that she had noticed on a couple of occasions the resident 's wound dressing date was not the day before, but older (day or two). The WCN stated she informed the DON of the missed dressing changes.			
	On 12/7/21 at 12:05 pm an interview was conducted with the Unit Supervisor (US) #1. The US #1 stated the when the wound care nurse was pulled to a nursing assignment, she and the staff were not always informed until later in the day (when residents were up in their wheelchair and declined care) or not at all and wound care was not completed. She stated there was a break-down in communication. US #1 also stated that when a nurse had to cover 1 unit/2 halls with a medication aide, there was not enough time to complete wound care when the wound care nurse was not available. US #1 stated that there was a nurse staffing shortage and was aware that wound care was not always completed.			
	On 12/8/21 at 11:00 am an interview was conducted with the facility Nurse Practitioner. He stated that he was not aware that residents ' wound care was not being completed as ordered.			
	On 12/20/21 at 3:10 pm an interview was conducted with the Director of Nursing (DON). The DON was informed by staff that wound care was not always completed due to insufficient staffing.			
	41579			
	Resident # 19 was admitted to the level of below knee and ankle.	ne facility 10/6/21. Cumulative diagnosi	is included complete amputation at	
	An admission Minimum Data Set (MDS) dated [DATE] indicated Resident # 19 was cognitively in required limited assistance with 1-person physical assist with bed mobility, dependent assistance 2-person physical assist with transfers, dependent assistance with 1-person physical assist with t bathing. Skin conditions included a surgical wound that was present on admission.

	Cross refer:				
	F686: Based on record review, observation and interviews of the staff, nurse practitioner, and member, the facility failed to assess and provide wound care for both heel pressure ulcers (Re and failed to consistently complete pressure ulcer care as ordered (Residents #28, 32 and 19) sampled residents.				
	Findings included:				
	On 12/7/21 at 3:46 pm an interview was conducted with the Administrator. She stated that the Nursing (DON), wound treatment nurse, staff development coordinator, and unit manager were on-call/rotate to cover licensed nursing call outs. She stated she knew that the treatment nurse on-call phone and was required to be pulled to a nursing assignment any day of the week. She she knew the treatment nurse had weekdays off when required to work on the weekend. The was informed that since June to date there were multiple omissions of nursing initials for wount treatment on the resident 's treatment administration record (TAR) and that the treatment nurse interviewed and stated she signed for all the wound care she completed. The Administrator stands aware that wound care was not completed as ordered.

	On 12/8/21 at 3:30 pm an interview was conducted with the Director of Nursing (DON). The DON stated that there was a shortage of nursing staff due to resignations. The facility was using agency staff. When there was a call-out that could not be filled, the wound care nurse, unit supervisor or myself were responsible to cover the assignment. Nursing staff worked 12-hour shifts, and there were 2-day and 2-night shift, full-time nursing positions open. The DON stated that the shortest staffed and hardest to cover was Sunday staffing.
