(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0655  Level of Harm - Minimal harm or potential for actual harm	Create and put into place a plan for meeting the resident's most immediate needs within 48 hours of being admitted			
Residents Affected - Some	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 42949  Based on observation, interview and record review, the facility failed to develop and implement a baseline care plan for each resident that includes the instructions needed to provide effective and person-centered care of the residents that meets professional standards of quality of care within 48 hours of a resident's admission for five (Resident #31, Resident #36, Resident #89, Resident #100, and Resident #139) of ten reviewed for baseline care plans, in that:			
		ine care plan was developed for Resid #139 within 48 hours of admission.	ent #31, Resident #36, Resident	
	This failure could place residents at risk of not having their individualized needs met in a timely manner and communicated to providers and could result in injury, a decline in physical, mental and/or psychosocial well-being.			
	Findings included:			
	Review of Resident #31's undated face sheet reflected a [AGE] year-old female who was admitted to the facility on [DATE] with diagnoses including end state renal (kidney) disease, hepatic (liver) failure, anxiety disorder, and dependance on renal dialysis.			
	Review of Resident #31's baseline	care plan reflected it was completed o	n 1/19/22.	
	Review of Resident #36's undated face sheet reflected a [AGE] year-old female who was admitted to the facility on [DATE] with diagnoses including Parkinson's disease, CHF, cognitive communication deficit, and presence of cardiac pacemaker.			
	Review of Resident #36's baseline	care plan reflected it was completed o	n 2/1/22.	
	Review of Resident #89's undated face sheet reflected a [AGE] year-old male who was initially admitted on [DATE] and re admitted on [DATE] with diagnoses including cerebral infarction (stroke), COVID-19, Acute respiratory failure, sepsis (infection), type 2 diabetes, anxiety disorder, and heart failure.			
	(continued on next page)			

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0686  Level of Harm - Actual harm  Residents Affected - Few	The survey team monitored the plan of removal on 2/13/22 as follows:  During an interview on 2/13/22 at 10:00 AM with RN I, she stated she and all of the nurses had been in-serviced the previous Friday, 2/11/22, on completing weekly skin checks on all residents because they were responsible for the integrity of the residents' skin. She stated they were also in-serviced on reviewing shower sheets daily to hold the aides accountable and to ensure they were being thorough. She stated it w not just up to the aides, as they were all part of the residents' care team. She stated not doing these things could compromise the health of the resident or lead to infection and further neglect. She stated they need to come up with interventions. For example, if an aide noticed redness to a resident's bottom, she would ask the aides to reposition the resident more often to ensure it did not get worse. She stated they also needed ensure they are notifying the MD if there were any new skin issues.  During an interview on 2/13/22 at 10:40 AM, he stated all nurses and aides were in-serviced on pressure		
	injuries or worsening of existing pre ADON and himself, with no new sk During an interview on 2/13/22 at 1 open areas and redness on resider was important to notify the nurse in During an interview on 2/13/22 at 1 residents' skin during care for rednetoenails. She stated if they find any the issue in the resident's chart.  During an interview on 2/13/22 atnown being thorough during skin assessment would be assigned a hall to complete residents' EMR.
