F 0656 Level of Harm - Immediate jeopardy to resident health or safety	On 04/14/2022 at 7:05 PM, the facility's Administrator (Employee Identifier (EI) #1); the [NAME] President of the facility's management company/member of the Governing Body (EI #2); the facility's Director of Nursing (EI #5); and a Human Resources Representative (EI #43) were given a copy of the Immediate Jeopardy (IJ) template and were notified of the findings of IJ in the area of Comprehensive Resident Centered Care Plan, F656.			
Residents Affected - Many	B) Further, the facility failed to ensudiagnosis of Depression.	ure a comprehensive plan of care was	developed to address RI #49's	
	These deficient practices affected for residents residing in the facility at the	RI #s 177, 48, 10, 82, 58, 59, and 49, b he time of the survey.	ut had the potential to affect all 129	
	Findings include:			
	A) Review of the facility's policy title	ed SUBJECT: SMOKING, last reviewed	d 11/2017, revealed the following:	
	POLICY: This is a smoke-free facility. No smoking or use of smoking materials will be allowed inside the building. Smoking is to occur only in designated areas and in accordance with each smoking resident's individualized plan of care based on the Smoking Safety Evaluation.			
	but rather to offer a safe and comfo	intention of this facility to deprive residentable environment to all residents living dered in the development of smoking	g in the facility. Both smoking and	
	RESPONSIBILITY: All staff, monitor	ored by management.		
	PROCEDURE:			
	smoking material and the need for	1. All residents who smoke will be assessed for his or her ability to smoke safely, the ability to handle smoking material and the need for supervision while smoking. The Smoking Safety Evaluation will be completed upon admission, readmission, quarterly, annually, and as needed. Residents that are evaluated as independent with smoking: (and/or without history of smoking incidents; needing no interventions) will be permitted to keep and maintain their own smoking materials (i.e. cigarettes, e-cigarettes), and may smoke in designated areas without limitations. The resident may be permitted to keep fire materials on his/her person during waking hours if deemed appropriate per the smoking evaluation. Smoking materials not kept or maintained by resident will be maintained by Licensed Nurse. Residents found to have modified independence with smoking: may be subject to smoking limitations. Limitations may include, but are not limited to: facility storage of tobacco products and/or fire materials, designated smoking times, assistance with lighting tobacco products, assistance to hold cigarette, supervised smoking by staff, and/or other protective/safety measures as determined appropriate by the individualized plan of care based on the smoking evaluation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0656 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Many	A review of the facility's policy titled, COMPREHENSIVE PERSON CENTERED CARE PLANS with a last review date of March, 2018, revealed, . POLICY: Each resident will have a person centered plan of care to identify problems, needs, strengths, preferences, and goals that identify how the interdisciplinary team will provide care. Comprehensive Person Centered Care Plan(CCP) - contains services provided, preference, ability, goals for admission and desired outcomes, and care level guidelines. PROCEDURE: . 4. will identify resident problems, needs, strengths, life-history, preferences, and goals 5. For each problem, need, or strength a residentcentered goal is developed.		
	During the survey, document review revealed concerns related to the accuracy and completeness of the SMOKING SAFETY EVALUATIONS for RI #177, RI #10, RI #82, RI 48, RI #58 and RI #59. Further it was noted that after each documented episode of noncompliance with the facility's smoking policy, staff were not reevaluating the residents for smoking safety so that care plans could be updated with safety interventions. In addition, RI #10, who was assessed as requiring minimal supervision and a smoking apron was observed on multiple occasions without a smoking apron		
	dropping ashes onto his/her body. Cross reference F689, F835, F837, F867, F740, and F926. 1. RI #177 was originally admitted to the facility on [DATE] with diagnoses including End Stage Renal		
	Disease, Diabetes Mellitus Type 2, Epilepsy, Cerebral Infarction, Dysphasia, and Encephalopathy. During admission, RI #177's SMOKING SAFETY EVALUATION was completed on 05/18/2021. The section of this evaluation for Diagnosis Impacting Ability to Smoke was marked as None. The evaluation did not capture RI #177's diagnoses of epilepsy or encephalopathy, although the evaluation has a section for Neurological diagnoses. The evaluation indicated RI #177 was independent with cognitive skills for decision making, had no indicators of delirium, and had clear speech. The following questions were not answered: Is the resident able to communicate the need for help if lit material falls on them? and Is resident able to move without assistance to/from designated smoking area? The section of the evaluation titled HISTORY indicated RI #177 could self-extinguish cigarettes and was able to manage ashes. The Fire Safety section indicated RI #177 attempted to obtain lighters or matches and lighter/matches had been obtained from an outside source. History of Smoking Related Incidents was marked as No. Staff assessed RI #177 as an independent smoker that required no assistive devices. The question for Care Plan Concern? was marked Yes. This evaluation was signed on 05/18/2021 by EI #26, Licensed Practical Nurse (LPN), and the following day by EI #44, the facility's prior Social Worker (SW).		
		e care plans revealed a care plan for .l o be a smoker. Approaches listed inclu	
	- complete smoking assessment as	s needed	
	- educate resident/family regarding	facility smoking policy	
	- show resident where appropriate	smoking area is located	
	- observe resident for unsafe smok (management) immediately	ing habits. If unsafe smoking habits are	e observed, notify mgmt
	- educate resident to extinguish sm	oking materials in appropriate containe	er before leaving smoking area

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		on)	
F 0656 Level of Harm - Immediate	RI #177's medical records were reviewed. The Departmental Notes revealed the following documentation related to noncompliance with the facility's smoking policy:			
jeopardy to resident health or safety	- 05/19/2021: smoking in room			
Residents Affected - Many	- 05/31/2021: suspected of smoking		2)45 AM (non-decimated amplified	
	time)	ng with other residents unsupervised at	2:45 AM (non-designated smoking	
	- 08/04/2021: smoking in room			
		noking care plan on 08/23/2021, 11/16/ oking care plan, despite the above doc		
	During an interview with EI #12, LPN, on 04/01/2022 at 8:08 AM, EI #12 explained a resident with encephalopathy and a history of epilepsy would not be safe to have cigarettes and lighters unsupervised. E #12 then confirmed RI #177 had both of these diagnoses and said RI #177 should not have been deemed independent smoker or had cigarettes and lighters in his/her room unsupervised.			
	documentation related to RI #177's should have seen it. EI #12 further Safety Evaluation after this occurre the storage of the resident's cigare should not be allowed to have then care plan should be updated, EI #1 incident of finding RI #177 smoking	uring a follow-up interview with EI #12 on 04/02/2022 at 9:53 AM, EI #12 was asked who had seen her occumentation related to RI #177's history of smoking in his/her room. EI #12 said she guessed everyone hould have seen it. EI #12 further stated she did not know she was supposed to conduct another Smoking afety Evaluation after this occurrence. EI #12 acknowledged RI #177's smoking care plan did not address se storage of the resident's cigarettes, lighters, or other smoking materials, but said in her opinion residents hould not be allowed to have them, but it depended upon the facility. When asked how often the smoking are plan should be updated, EI #12 said after every incident. EI #12 was asked who she had reported the cident of finding RI #177 smoking in his/her room to. EI #12 said she had reported this incident to EI #6, the cility's prior Director of Nursing (DON). #6 was interviewed on 04/02/2022 at 2:42 PM. When asked what she could recall about RI #177, EI #6 ated she had spoken with the resident numerous times, regarding different cases of noncompliance. EI #6 ated she had spoken with the resident numerous times, regarding different cases of noncompliance. EI #6 ated she did recall being informed of RI #177 smoking in his/her room, but could not recall who told her. the only recalled one incident when RI #177 had OVID (01/31-02/09/2022) and staff informed her he/she as smoking in his/her room. When asked what staff should do when they find a resident to be smoking in eir room, EI #6 stated the staff should retrieve the smoking materials from the resident, educate the sident, and notify management so that the incident can be addressed on the care plan and rounds can be ade. EI #6 stated residents that were noncompliant with the facility's smoking policy should have their moking materials kept on the nurse's cart. EI #6 also stated RI #177's care plan should have been updated the staff suspected he/she was smoking in the room to reflect the suspicion of the resident smoking in the om with an interventi		
	stated she had spoken with the res stated she did recall being informer She only recalled one incident whe was smoking in his/her room. F 0689	Ensure that a nursing home area is accidents.	s free from accident hazards and provid	les adequate supervision to prevent	
Level of Harm - Immediate jeopardy to resident health or safety	**NOTE- TERMS IN BRACKETS F	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 44165	
Residents Affected - Many	Based on observation, record review, interviews, review of the facility's investigative file related to a fire involving Resident Identifier (RI) #177, and review of the facility's policy titled SUBJECT: SMOKING, the facility failed to accurately and completely conduct SMOKING SAFETY EVALUATION(s) in accordance with facility policy.			
	Further, the facility failed to ensure the information obtained through the SMOKING SAFETY EVALUATION(s) was utilized in a manner to allow staff to develop, implement and revise person-centered safety interventions for RI #s 177, 10, 82, 48, 58, and 59, six of six sampled residents reviewed for smoking safety. All six of these residents were found to have documented episodes of noncompliance with the facility's smoking policy, including smoking inside the facility unsupervised in the hallway, residents' rooms and/or bathrooms or going to the smoking area unsupervised at non-designated smoking times.			
	The staff members who documented the noncompliant actions of the residents failed to communicate all incidents to management as directed by the residents' smoking care plans; nor did the facility ensure additional actions were taken to ensure proper safety interventions and policies to promote resident safety were in place, including supervision and monitoring, as well as systems to ensure noncompliant residents did not have access to lighters inside the facility structure.			
	On 03/26/2022, RI #177, a resident with a documented history of smoking noncompliance, was in possession of his/her smoking materials and lighter, and subsequently ignited his/her bedding and body. After staff became aware, they extinguished the flames, rendered necessary aid, and RI #177 was sent to the hospital where he/she was found to have third degree burns covering 10-19% of his/her body.			
	Further, during the survey, RI #10, a resident with right sided hemiplegia, who was assessed as requiring minimal supervision and the use of a smoking apron, was observed outside smoking on multiple occasions. During these observations, RI #10 did not have a smoking apron on and was observed to drop ashes from a lit cigarette onto his/her clothing. The staff present at the time of these observations did not acknowledge or intervene.			
	RI #82's documentation reflected s going outside to smoke unsupervis	taff suspicion of RI #82 smoking inside ed at non-designated times.	the resident's room, as well as	
	RI #48's documentation reflected a	history of smoking inside his/her room	and in the bathroom.	
	RI #58's documentation reflected staff suspicion of RI #58 smoking in his/her room, finding medicine cup with water and ashes on multiple occasions at RI #58's bedside, finding a lighter at the bedside with oxygin the room and going outside to smoke unsupervised at non-designated times.			
	RI #59's documentation reflected RI #59 had a history of going out to smoke at non-designated times and walking in the hallway or other areas inside the facility with a lit cigarette or cigar.

Level of Harm - Immediate jeopardy to resident health or safety	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 44165	
Residents Affected - Many	Based on record review, interviews, review of the Social Worker (SW) Job Description, and review of a facility policy titled, Behavior Management and Psycho-pharmacological Medication Monitoring Protocol, the facility failed to ensure Resident Identifier (RI) #s 177, 10, 48, 82, 58, and 59 were placed on a behavior management program.			
	RI #s 177, 10, 48, 82, 58, and 59 were all found to have Nurses' Notes describing unsafe behaviors related to noncompliance with the facility's Smoking Policy. Despite, Social Service involvement in resident evaluations and reviews, Social Services was unaware of resident's behaviors, due to staff failing to notify them of the behaviors. This deficient practice affected RI #s 177, 10, 82, 48, 58, and 59, six of six sampled residents reviewed for noncompliance with smoking policies, and had the potential to affect all 36 smokers in the facility. In addition these failures placed all 129 residents residing in the facility at risk for immediate jeopardy, as it was likely to result in serious injury, serious harm, serious impairment, or death.			
	On 04/19/2022 at 1:37 PM, the facility's Administrator (Employee Identifier (EI) #1); the Director of Nursing (EI #4); and a Clinical Operations Consultant (EI #3) were given a copy of the Immediate Jeopardy (IJ) template and were notified of the findings of IJ in the area of Behavioral Health Services, F740.			
	Findings include:			
	Review of Job Descriptions signed	by EI #7 and EI #8, SWs, revealed the	following:	
	.Essential Duties . 14. Reviews be	havior charting so that an appropriate (Care Plan is developed .	
	1	SUBJECT: Behavior Management and ted 03/2018, revealed the following:	Psycho-pharmacological	
	.POLICY: . There will be an established Behavior Management Committee that will meet routinely to review . others as the Committee deems appropriate.			
	PURPOSE: Residents with behaviors that are displayed routinely, that effect (affect) the resident's psychosocial well-being or that of other residents, or behaviors that can have potential for harm to self or others will be assessed with the development of a behavior program.			
	During the survey, RI #s 177, 10, 48, 82, 58, and 59, were reviewed and found to have documented behaviors related to noncompliance with the facility's smoking policy, that placed them and others at ris was determined the facility had not taken actions or implemented additional safety interventions after e these incidents to prevent further resident safety concerns. Cross reference F656, F689, F835, F837, F and F926.

F 0740 Level of Harm - Immediate jeopardy to resident health or safety	The executive director has been inserviced on 4/20/22 by the governing body, to provide oversight to ensure staff are implementing the amended policy of Behavior Management and Psycho-pharmacological Medication Monitoring Protocol. The executive director will provide oversight by presenting all incidents of new or worsening behaviors to the quality assurance committee and to use root-cause analysis to identify casual factors to ensure appropriate actions needed to prevent further resident behaviors.			
Residents Affected - Many	The behavior management committee has been inserviced on 4/20/22 by the executive director, on the addendum to the Behavior Management and Psycho-pharmacological Medication Monitoring Protocol. This will ensure behavior monitoring is implemented and effective management of residents with new or worsening behaviors.			
	All staff inserviced by director of nursing and unit managers to reflect that charge nurse is the position that will identify and communicate new or established residents with any new onset or worsening of behaviors. Although the charge nurse is the position that will identify and communicate behaviors, all facility staff are responsible for noting any instances that could potentially be deemed as a new or worsening behavior to be brought to the charge nurse's attention by completing the Stop and Watch Tool. This will include non-compliance with, but not limited to, smoking, or any other factors that indicate new or worsening stressors of a resident whereas the resident's environment does not promote their individualized emotional and psychosocial well-being. This will be completed by 4/21/22. Any employee that fails to be educated by 4/21/22 will be suspended from work until education has been completed.			
		eviewed to ensure each resident with r Record by social services and comple		
	Contents will be completed and immediacy will be removed on 4/21/22.			
	On 04/28/2022 at 8:15 PM, after review of the information provided in the facility's Removal Plan, in-service/education records, as well as staff interviews, and observations, the survey team determined the facility implemented the immediate corrective actions as of 04/21/2022 and the scope and severity was lowered to an F level, to allow the facility time to further address and monitor the deficient practice in order to achieve compliance.

Level of Harm - Immediate jeopardy to resident health or	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 44165	
safety Residents Affected - Many	Based on interviews, review of the facility's QAPI (Quality Assurance Process Improvement) Plan and revi of the facility Administrator's job description, facility administration failed to ensure staff were consistently implementing the facility's smoking policy. Further, the Administrator admitted prior knowledge of resident noncompliance with the facility's smoking policy, but failed to present the incidents to the facility's Quality Assurance (QA) Committee for review/investigation in order to identify systemic breakdowns, so that action could be taken to ensure facility systems did not contribute to further noncompliance with the facility's smoking policy.			
	Further, the Administrator failed to provide oversight to ensure staff were implementing policies related to Behavior Management.			
	These deficient practices placed all residents in the facility at risk for immediate jeopardy, as it was likely to result in serious injury, serious harm, serious impairment, or death. The facility Form CMS-672 listed a facilit census of 129 at the time of the survey.			
	On 04/14/2022 at 7:05 PM, the facility's Administrator (Employee Identifier (EI) #1); the [NAME] President of the facility's management company/member of the Governing Body (EI #2); the facility's Director of Nursing (EI #5); and a Human Resources Representative (EI #43) were given a copy of the Immediate Jeopardy (IJ) template and were notified of the findings of IJ in the area of Administration, F835.

Residents Affected - Many	Based on interviews, review of a policy titled Quality Improvement Program, review of the facility's QAPI (Quality Assurance Process Improvement) Plan and review of the facility's 03/26/2022 MONTHLY FACILITY QA & A (Quality Assessment and Assurance) MINUTES, the facility's Quality Assurance (QA) committee failed to thoroughly review all factors related to Resident Identifier (RI) #177's fire and injuries, to determine what corrective actions needed to be taken to prevent any further resident safety concerns.			
	On 03/26/2022, RI #177, a resident with a documented history of smoking noncompliance, was in possession of his/her smoking materials and lighter, and subsequently ignited his/her bedding and body. After staff became aware, they extinguished the flames, rendered necessary aid, and RI #177 was sent to the hospital where he/she was found to have 3rd degree burns covering 10-19% of his/her body.			
	This failure placed all remaining residents in the facility at risk for immediate jeopardy, as it was likely to result in serious injury, serious harm, serious impairment, or death. The facility Form CMS-672 listed a facility census of 129 at the time of the survey.			
	On 04/14/2022 at 7:05 PM, the facility's Administrator (Employee Identifier (EI) #1); the [NAME] President of the facility's management company/member of the Governing Body (EI #2); the facility's Director of Nursing (EI #5); and a Human Resources Representative (EI #43) were given a copy of the Immediate Jeopardy (IJ) template and were notified of the findings of IJ in the area of Quality Assurance and Process Improvement, F867.			
	Findings include:			
	Review of a policy titled Quality Imp	provement Program, dated 02/2018, re	vealed the following:	
	POLICY: The Quality Improvement Committee will assess and monitor the quality of services provided to the residents in the facility in order to identify potential problems and/or opportunities for improvement. The committee will implement and systematically evaluate programs and processes to identified problems in order to proactively improve health care delivery.			
	OBJECTIVE:			
	. 4. Utilize data obtained from a variety of sources to identify quality problems, opportunities for improvement, and set priorities for action .			
	7. Perform root cause analysis, set	targets; implement corrections to impr	ove the process.	
	Review of the undated Birmingham Nursing and Rehabilitation Center (BNRC) QAPI Plan revealed the following:

	Findings include:			
	Review of the facility's policy titled	SUBJECT: SMOKING, last reviewed 1	1/2017, revealed the following:	
	POLICY: This is a smoke-free facility. No smoking or use of smoking materials will be allowed inside the building. Smoking is to occur only in designated areas and in accordance with each smoking resident's individualized plan of care based on the Smoking Safety Evaluation. POLICY STATEMENT: It is not the intention of this facility to deprive residents of the pleasure of smoking, but rather to offer a safe and comfortable environment to all residents living in the facility. Both smoking an non-smoking residents will be considered in the development of smoking locations and designated times. RESPONSIBILITY: All staff, monitored by management.			
	PROCEDURE:			
	1. All residents who smoke will be assessed for his or her ability to smoke safely, the ability to h smoking material and the need for supervision while smoking. The Smoking Safety Evaluation was completed upon admission, readmission, quarterly, annually, and as needed.			
	Residents that are evaluated as independent with smoking: (and/or without history of smoking incider needing no interventions) will be permitted to keep and maintain their own smoking materials (i.e. ciga e-cigarettes), and may smoke in designated areas without limitations. The resident may be permitted fire materials on his/her person during waking hours if deemed appropriate per the smoking evaluatio Smoking materials not kept or maintained by resident will be maintained by Licensed Nurse.
