F 0655  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Few	An interview was conducted on October 24, 2019 at 10:09 a.m. with a Registered Nurse (RN/staff #54). Staff #54 stated when a resident is admitted, the baseline care plan is initiated by the MDS coordinator. He stated the DON and Director of Staff Development go over the baseline care plan with the resident and/or their representative. He said the baseline care plan is supposed to be initiated in the first 24 hours of admission.  An interview was conducted on October 24, 2019 at 12:52 p.m. with the DON (staff #44). The DON stated			
	the baseline care plan is developed by the floor nurse on admission and should be completed within 24 hours. She stated that she did not know what had happened with the baseline care plan for this resident. Th DON stated when an admit comes in, the baseline care plan should be initiated and completed within 24 to 48 hours of admission by the nurses. She said that is is part of the admission process. She stated that she expects the nurse who is admitting the resident to go over the baseline care plan with the resident or their representative at the time of admission. After reviewing the clinical record for resident #293, the DON stated the baseline care plans should have been initiated for this resident after admission.			
	Review of the policy titled, Care Plan, Baseline and Comprehensive revealed it is the policy of the facility t develop an interim care plan for the resident upon admission. A baseline care plan will be implemented within 48 hours of admission.

Residents Affected - Few		cility documentation, resident and staff d resident (#293) received an adequate eds not being met.		
	Findings include:			
	Resident #293 was initially admitted on [DATE], and discharged on [DATE]. The resident was then readmitted on [DATE], with diagnoses that included schizophrenia, dementia with behavioral disturbance and chronic obstructive pulmonary disease with (acute) exacerbation.			
	A physician's order dated Septemb pm shift.	per 13, 2019 included for shower days e	every Tuesday and Friday on the	
	Review of the psychiatric progress note dated September 18, 2019, revealed the resident was oriented to person, time and place. The note also included the resident needed bathing assistance and assistance with dressing, toileting and transfers.			
	Review of the activities of daily living (ADL) documentation for showers for the month of September 2019 revealed the resident refused a shower once on September 21, and received one shower on September 25. There was no other documentation that the resident received any additional showers in September.			
	Review of the ADL documentation for showers for the month of October 2019 revealed the resident received a shower on October 2 and October 16, and refused a shower on October 19. There was no other documentation that the resident received any additional showers in October.			
	During an interview conducted with resident #293 on October 21, 2019 at 10:18 a.m., the resident stated no showers or bed baths were given to her since her admission which was about a month ago. She stated that she has asked staff to shower her many times and they don't say anything, they just turn around and walk out. During the interview in the resident's room, there was a strong odor of urine.			
	An interview was conducted with a Certified Nursing Assistant (CNA/staff #5) on October 23, 2019 at m. She stated that all residents are scheduled to have a shower at least two times a week. Staff #5 resident refuses a shower, they document the refusal in the electronic record under ADL's for shower report the refusal to the nurse. Staff #5 stated if the shower is provided, it is documented in the electrecord under ADL's for showers and includes the type of assistance provided. She also stated that stimes they are not able to complete all the scheduled showers, because the resident keeps putting the shower off for later and they don't have time at the end of the shift. She said if this happens, they pain report and the other CNA is supposed to give the shower.

F 0686 Level of Harm - Actual harm Residents Affected - Few	Phoenix, AZ 85013  In the splan to correct this deficiency, please contact the nursing home or the state survey agency.  SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)  A wound observation was conducted on 10/22/19 at 12:51 p.m., with a Licensed Practical Nurse (LPF #65). Resident #16 was placed on her right side and staff #65 removed the old dressing. The nurse the cleansed the pressure ulcer to the left ischeal tuberosity with a wound cleanser. The entire wound are observed to be approximately 4 cm long by 4 cm wide and was bedry red, except for an area at the text wound which was approximately the size of a dime and was dark in color. Within this area, there was with depth. No odor or drainage were noted. At this time, staff #65 only measured the dime sized area did not measure the entire wound area. Staff #65 was then asked to measure the entire wound. When about the depth of the wound, she stated that the wound had no depth. The nurse then completed the treatment as ordered.  An interview was conducted with staff #65 on 10/23/19 at 10:03 a.m. She stated that the Restorative Assistant (RNA) manages the resident's ROHO cushion. She stated she was not aware of any currer with the cushion.  An interview was conducted with a CNA (staff #11) on 10/23/19 at 11:41 a.m. She stated that the wous started out as a small little wound that just got bigger over time. She stated she first noticed it about the weeks ago. She stated that anytime she notices any changes in the resident during showers she get nurse right away. She stated that over the past week, the resident has been complaining about the R cushion, but the provider was aware.  An interview was conducted with a RNA (staff #52) on 10/23/19 at 12:03 p.m. She stated sometimes resident complains that the cushion is not balanced. She stated to adjust the cushion she continues to air until she doesn't hear it anymore. Then she placed her had between the resident and the cushion ensure there was		censed Practical Nurse (LPN/staff te old dressing. The nurse then anser. The entire wound area was, except for an area at the top of the Within this area, there was a hole easured the dime sized area and sure the entire wound. When asked the nurse then completed the wound stated that the Restorative Nursing was not aware of any current issues a.m. She stated that the wound deshe first noticed it about three ent during showers she gets the en complaining about the ROHO.  D.m. She stated sometimes the the cushion she continues to add the resident and the cushion to an out so that it is softer for her and the provider on 10/22/2019 about the resident was observed ome Tylenol. The nurse asked the 0 out of 10. The resident said to the HO cushion for the wheelchair was 1/19 at 12:45 p.m. She stated that related to the ROHO cushion being

F 0697	Provide safe, appropriate pain mar	nagement for a resident who requires s	uch services.
Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 42306
Residents Affected - Few	Based on observations, clinical record review, resident and staff interviews and policy and procedures, the facility failed to thoroughly assess and adequately manage one of two sampled resident's (#16) pain. The deficient practice could result in unrelieved pain for residents.		
	Findings include:		
		e facility on [DATE] and readmitted on [ le lower extremities, phantom limb sync	
	A care plan was initiated due to chronic pain related to spinal stenosis of the lumbar region with placement a neurostimulator, phantom limb syndrome from bilateral amputations and bladder pain (being seen by urology). The goal was to provide normal activities uninterrupted by pain. The interventions included the following: anticipating the resident's need for pain relief and respond immediately to any complaint of pain; evaluate the effectiveness of pain interventions every shift and as needed; review for compliance, alleviatir of symptoms, dosing schedules and resident satisfaction with results; impact on functional ability; give scheduled and as needed pain medications as ordered and as requested; adjust neurotransmitter as need and charge battery of transmitter as ordered; monitor and record pain characteristics every shift and as needed: quality (e.g. sharp, burning), severity (1-10 scale), anatomical location, onset, duration (e.g. continuous, intermittent), aggravating factors and relieving factors and monitor/record/report to nurse any signs or symptoms of non-verbal pain such as; labored breathing, grunting, moaning, yelling out, mood/behavior changes, restlessness, sadness, crying, aggressive behaviors and grimacing. The interventions further included to notify the physician if interventions were unsuccessful or if current complai is a significant change from past experience of pain.		
	Review of the July 2019 Medication Administration Record (MAR) revealed the resident was receiving the following medications: neurontin (anticonvulsant/used for neuropathic pain) 600 mg by mouth every 8 hours for neuropathy; Percocet 10-325 mg (narcotic) 1 tablet by mouth every 6 hours as needed for a pain level of 1-10; and Tylenol 325 mg 2 tablets every 6 hours as needed for pain scale of 1-10. Also included in these orders were non pharmacological interventions (NPI) which were to be implement: one-on-one, activity, adjust room temperature, back rub, change position, give fluids, give food, redirect, refer to nurses notes, remove resident from environment, return to room and toilet.		
	Nurses notes dated July 12, 13 and medicated with good results.	d 14, 2019 included the resident compl	ained of chronic pain and was
	Review of an admission Minimum Data Set (MDS) assessment dated [DATE] revealed a Brief Interview fo Mental Status (BIMS) score of 15, which indicated the resident had intact cognition. Per the MDS, the resident required extensive assistance with bed mobility and transfers and received scheduled and as needed pain medication for almost constant pain.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0697  Level of Harm - Actual harm  Residents Affected - Few	According to the September 2019 MAR, the resident received the last dose of Percocet at 5:30 a.m. on 9/14. The order stated the resident could receive the medication every 6 hours as needed for pain. Based on the MAR documentation, the resident could have had the next dose of Percocet at 11:30 a.m. However, the MAR showed the next Percocet was administered to the resident at 2:15 p.m.  Also included on the September 2019 MAR was an order to adjust the spinal cord stimulator level as needed for comfort (the start date was noted as 9/17/2014). However, there was no documentation on the MAR that the spinal cord stimulator level had been adjusted.		
Residents Affected - Few			
	There were also no physician orde	rs for any parameters for the spinal cor	d stimulator levels.
	Further review of the September 2019 MAR revealed the orders for Percocet 10-325 mg 1 tablet by mouth every 6 hours and for Tylenol 325 mg 2 tablets every 8 hours. The MAR also included the following non pharmacological interventions to be implemented for each medication: one-on-one, activity, adjust room temperature, back rub, change position, give fluids, give food, redirect, refer to nurses notes, remove resident from environment, return to room and toilet.  The September 2019 MAR also included documentation that the resident was administered Percocet as needed approximately 87 times for pain levels between 5-10, and that Tylenol was given on two occasions. The documentation included that the medications were effective.  Review of the clinical record revealed there was no consistent documentation in September 2019 regarding non pharmacological interventions which were implemented to address the resident's pain, and there was no consistent documentation regarding the monitoring and recording of pain characteristics which included quality, location, onset, duration, aggravating factors and relieving factors as care planned, which corresponded to when the resident was experiencing pain.		
	A physician's order dated 10/8/19 i for pain levels of 1-4.	8/19 included for Tylenol 325 mg 2 tablets by mouth every 8 hours as needed	
	Review of a nurse practitioners (NP) note dated 10/9/19 revealed the resident reports 9-10 pain consistently. Resident asks for increased pain medication during every visit and asks for pain medication early multiple times per day. Resident becomes very tearful when told no. Resident does not exhibit facial grimacing, writhing, moaning or restlessness. When asked where location of pain is she often states back and bladder, but does not pinpoint. F 0697	A nurses note dated 10/14/19 at 6:15 p.m. stated the resident was requesting something for pain from t nurse and the nurse told the resident it was too early for a pain pill.		
Level of Harm - Actual harm	Review of the October 2019 MAR r	revealed Percocet was given at 12:45 p	o.m.
Residents Affected - Few	A nurses note dated 10/17/19 at 5:19 a.m. revealed the resident was receiving treatment for a wound and she was yelling out and telling the staff to stop, because it was too painful. Per the note, the resident received as needed medication with positive effect.		
	Review of a Skin and Wound Evaluation dated 10/18/19 revealed the resident developed a medical device related pressure injury on the left ischeal tuberosity, which was identified as a stage 3. The documentation included the resident experienced intermittent pain.		
	Nurses notes dated October 18 and 19 included the resident was complaining of pain and was administered medication with positive effects and that the resident frequently requests as needed pain medication.		
	A physician's order dated 10/20/19 included for Tylenol 325 mg 2 tablets by mouth every 8 hours as needed for pain levels of 1-4. The orders included for non pharmacological interventions as follows: redirect, 1:1, activity, return to room, toilet, give food, give fluids, change position, adjust room temperature and back rub.		
	Nurses notes dated October 21 and 22, 2019 revealed the resident complains of pain and was medicated with good results.		
	Review of the MAR from October 1 through 22, 2019 revealed the resident was provided as needed pain medication approximately 57 times.		
	Continued review of the clinical record revealed there was no consistent documentation in October 2019 regarding non pharmacological interventions which were implemented to address the resident's pain, and there was no consistent documentation regarding the monitoring and recording of pain characteristics which included quality, location, onset, duration, aggravating factors and relieving factors as care planned, which corresponded to when the resident was experiencing pain.		
	An interview was conducted with the resident on 10/21/19 at 11:47 a.m. She stated that she was told to lay down when her pressure injury sores on her bottom get too painful from sitting in the wheelchair. She said the staff is often too busy to get her into bed to help ease some of the pain. She stated that she is in so much pain all the time.		
	A wound care observation was conducted on 10/22/19 at 12:51 p.m., with a Licensed Practical Nurse (LPN/staff #65). Resident #16 was placed on her right side and then staff #65 removed the old dressing by pulling out and down away from the wound. As this was done, the resident yelled out in pain. Staff #65 stated that the resident did not get pain medication prior to this procedure, because the resident is on scheduled pain medication. At this time, the resident informed the nurse that she was in pain. The nurse replied to the resident that the pain was from the removal of the dressing and that she already received pain medication earlier that morning. A few minutes later, the resident informed the nurse that the wound felt like it was burning. Staff #65 continued providing wound care to the resident.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0697	In a review of the October 2019 MA	AR, the documentation showed that res	sident was last medicated at 4:30 a	
	m. on October 22, with 1 tablet of F	Percocet. In reviewing the Narcotic Cou	int Sheet for the resident, the	
Level of Harm - Actual harm		et of Percocet had been signed out at 1 ented on the MAR. Staff #65 acknowle		
Residents Affected - Few	signed out on the narcotic count sh	neet, but was not documented on the M	AR.	
	An interview was conducted with the resident on 10/22/19 at 1:56 p.m. She stated that she is still in pain from the dressing change on her pressure injury. She said that during the entire dressing change she was in pain. The resident said that she was told that she has to wait until 4:30 p.m. for her next pain medication.			
	An observation of the resident was conducted on 10/23/19 at 8:25 a.m. The resident approached the nurse administering medications and reported that she was in pain and would like Tylenol. The nurse prepared the resident's morning medications and then asked the resident what her pain level was. The resident stated her pain was 10 out of 10.			
	An interview was conducted with staff #65 on 10/23/19 at 10:03 a.m. She stated that she would consider several things when assessing if a resident is in pain. She said that she would look at how they are moving their body if they are guarding, if they have verbal or facial expressions of pain or any changes in behaviors. She said that she would ask the resident what their pain level was using the 1-10 pain scale and would have the resident describe their pain. She said she would then medicate and re-evaluate in 30 minutes. She stated that she charts the assessment in the electronic health record. She stated the reason she did not give the resident pain medication during the dressing change was because the resident did not have pain, until the dressing was taken off.			
	#86) on 10/24/19 at 10:31 a.m. The and they need to ask residents their nanagement and anticipate their n medication is being administered for effective or not. She said that even order for breakthrough medications effectiveness of the medication and care is driven by the provider order	ne Director of Nursing (DON/staff #44) are DON stated that staff use the 1-10 partir pain level. She stated the staff need beeds. She said the nurses are to check or the pain level, and reassess within a far a resident is on scheduled pain med is. She stated the nurse caring for that red notify the provider if changes needed as which are used to develop the plan of care should be entered into the electrical partire.	in scale to assess a resident's pain to identify residents on pain to the order to make sure the correct in hour to see if the medication was ication, they may also have an esident would have to assess the to be made. The DON stated that if care for each individual resident.

Residents Affected - Some	1	he nurse staffing information, staff inte ing information was posted on a daily l		
	Findings include:			
	During an observation conducted on October 21, 2019 at 8:36 a.m., the Daily Staff Posting was in a frame, on a small stand in the lobby adjacent to the Human Resources Office. The Daily Staff Posting form was dated October 10, 2019. The posted nurse staffing information included the number of RN's (Registered Nurses), LPN's (Licensed Practical Nurses), CNA's (Certified Nursing Assistants), RNA's (Restorative Nursing Assistants) and the actual staff hours worked for each shift.  Review of Daily Staff Posting forms conducted on October 23, 2019 at 10:30 a.m. revealed there were Daily Staff Posting forms which had been completed from October 2, through October 22, 2019.  During an interview conducted on October 23, 2019 at 10:48 a.m. with the Health Information Director (staff #46), she stated that each day she fills out the Daily Staff Posting form and provides it to the Administrator (staff #15), who is responsible for posting it and maintaining a file of the previous Staff Posting forms in her office.  During an interview conducted on October 23, 2019 at 12:50 p.m. with the Administrator, she stated that she thought the Daily Staff Posting forms were completed by the Health Information Director and that the previously posted forms are filed in her office. She also stated that the previous staff member responsible for posting the staffing forms quit on October 11, 2019 and no other staff has been in charge of it since. The Administrator stated we've been doing it but I don't know if they (the Daily Staff Posting forms) were being posted.
