STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 055253	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 06/01/2021
NAME OF PROVIDER OR SUPPLIER St. John of God Retirement		STREET ADDRESS, CITY, STATE, ZIP CODE 2468 South St Andrews Place Los Angeles, CA 90018	
For information on the nursing home's	agency.		
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0550 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Honor the resident's right to a dignified existence, self-determination, communication, and to exercise his or her rights. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 30840 Based on observation, interview, and record review, the facility failed to maintain two residents' dignity during dining (Residents 22 and 77). Certified Nurse Assistant 20 (CNA 20) was observed standing over Resident 22 while feeding the resident in the dining room, and CNA 20 was also observed standing over Resident 77 while feeding the resident inside Resident 77's room. This deficient practice violated Residents 22 and 77 rights to treated with respect and dignity. Findings: a. During an observation on 5/25/2021 at 12:30 p.m., Certified Nurse Assistant 20 (CNA 20) was observed		
	standing over Resident 22 feeding the resident by mouth after setting up the resident's lunch tray in the dining room. During a review of Resident 22's Admission Record, the Admission Record indicated Resident 22's diagnoses included muscle weakness, dysphagia (difficulty swallowing), and major depression. During a review of Resident 22's Minimum Data Set (MDS), a standardized assessment and screening tool, dated 3/1/2021, the MDS indicated Resident 22's sometimes had the ability to make decisions of daily living. The MDS indicated Resident 22 required extensive assistance from nursing staff members with activity of daily livings ([ADLs] self-care activities performed on a daily basis, such as turning, feeding, and toilet use). The care area assessment (CAA) of the MDS indicated Resident 22 triggered under nutrition status as requiring staff to physically assist the resident with feeding. During a review of Resident 22's physician's order dated 1/2/2021, the physician's order indicated regular diet pureed texture, nectar thick with consistency three times a day. During a review of Resident 22's care plan dated 6/17/2021, the care plan indicated a dietary focus with a goal for safety and interventions that included respect when feeding Resident 22. During an interview on 5/25/2021 at 12:35 p.m. with CNA 20, CNA 20 stated it was a dignity issue to stand over a resident while feeding the resident. b. During an observation on 5/25/2021 at 12:45 p.m., CNA 20 was observed standing while feeding Resident 77 in bed. (continued on next page)		

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by		CIENCIES full regulatory or LSC identifying informati	on)	
F 0552	Ensure that residents are fully infor	med and understand their health status	s, care and treatments.	
Level of Harm - Potential for minimal harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 43906	
Residents Affected - Some	and a self release belt for two of tw	nd record review, the facility failed to ob to sampled residents (42 and 102). This ing aware of the risks and benefits of the	s had the potential for the residents	
	Findings:			
	a. During a tour, Resident 42 was observed not able to release the be	observed with a self release belt around elt.	d her waist. The resident was	
	During a review of Resident 42's Admission Record, the Admission Record indicated Resident 42 was admitted to the facility on [DATE]. Resident 42's diagnoses included unspecified dementia with behavioral disturbance (a chronic or persistent disorder of the mental processes caused by brain disease or injury and marked by memory disorders, personality changes, and impaired reasoning), heart failure (condition in which the heart cannot pump enough blood to meet the body's needs), and major depressive disorder (mood disorder that causes a persistent feeling of sadness and loss of interest and can interfere with your daily functioning).			
	During a review of Resident 42's MDS, a standardized assessment and care screening tool, dated 3/19/2021, the MDS indicated Resident 42 had a short term and long-term memory problem. The MDS indicated under section P (restraints and alarms) that daily use of trunk restraint while out of bed or used in chair. However, there was no consent signed by the residents representative.			
	b. During a review of Resident 102's Face Sheet (admission record), the Face Sheet indicated Resident 102 was admitted to the facility on [DATE]. Resident 102's diagnoses included lack of coordination (inability to coordinate bodily movements, especially movements of the muscles), dysphagia (difficulty of swallowing), type 2 diabetes mellitus (high blood sugar), unspecified psychosis (a mental disorder characterized by a disconnection from reality) and anxiety disorder (a mental health disorder characterized by feelings of worry, anxiety, or fear that are strong enough to interfere with one's daily activities).			
	During a review of Resident 102's MDS, dated [DATE], the MDS indicated Resident 102 had severe cognitive function (the mental action or process of acquiring knowledge and understanding through thought, experience, and the senses).			
	During a concurrent interview and record review of the physician orders on 7/30/2021 at 9:00 AM, register nurse 1 (RN1) stated and confirmed Resident 42 and 102 had physician orders for the use of restraints (physical measure used to control the physical behavior of a resident). Per RN 1, according to the physicia orders, the physician received informed consent from the responsible party through telephone order only for resident 42 and 102. Per RN 1, there were no written documentation made by the physician that the physician received informed consent from the responsible parties.

(X4) ID PREFIX TAG SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC ident			on)	
F 0558	Reasonably accommodate the nee	ds and preferences of each resident.		
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 44088	
Residents Affected - Some	Based on observation, interview, and record review, the facility failed to ensure resident call lights was within easy reach to enable residents to call for assistance with activities of daily living ([ADLs] daily self-care activities) and ensure the patio door lock leading into the resident's room was functioning for three of three sampled residents (Residents 29, 64, and 82).			
		ially cause Residents 29 and 64 to feel g, and could potentially result in falls, inj safe and lose sleep at night.		
	Findings:			
	a. During an observation and concurrent interview on 5/25/21 at 10:30 a.m. with Resident 64, Resident 64 was observed lying in bed. Resident 64 had an adaptive call light laying on the right side of the bed at head level. Resident 64 stated she was unable to press the call light because it was too far. Resident 64 attempted press the call light using the left hand but was unable to reach the call light. Resident 64 stated she would not be able to call for help in case of an emergency if she needed pain medication and had to wait for staff to clean her.			
	During an observation and concurrent interview on 5/25/21 at 10:30 a.m. with Certified Nurse Assistant 6 (CNA 6), CNA 6 stated the adaptive call light was not positioned correctly when staff pulled Resident 64 up on the bed. CNA 6 stated Resident 64's call light was not positioned where the resident could reach and press the call light. CNA 6 repositioned the adaptive call light on the resident's abdomen where she could press for assistance.			
	During a review of Resident 64's Admission Records, the Admissions Records indicated Resident 64 was admitted to the facility on [DATE]. Resident 64's diagnoses included Alzheimer's disease (irreversible, progressive brain disorder that slowly destroys memory and thinking skills), unspecified osteoarthritis (degenerative joint disease), and essential hypertension (high blood pressure).			
	During a review of Resident 64's Minimum Data Set (MDS), resident assessment and care-screening tool, dated 4/09/2021, the MDS indicated Resident 64 had no cognitive (thought process) impairment for daily decision making. The MDS indicated Resident 64 required extensive assistance for mobility, transfer, dressing, toilet use and personal hygiene and required supervision when eating.			
	b. During an observation and concurrent interview on 5/25/21 at 11:05 a.m. with Resident 29, Resident 29 was observed sitting in a wheelchair. Resident 29's call light was observed tied on the bed, located at the back of the resident. Resident 29 stated he was unable to locate his call light because it was too far. Resident 29 stated he would not be able to call for help in case of an emergency and had to wait for staff clean him. Resident 29 stated staff usually positioned his call light at the side of his wheelchair, so it was easily accessible. Resident 29 stated if he cannot locate his call light, he feels unhappy and frustrated.

(X4) ID PREFIX TAG	(X4) ID PREFIX TAG SUMMARY STATEMENT OF DEFICIE (Each deficiency must be preceded by fu		on)
F 0604	Ensure that each resident is free from	om the use of physical restraints, unles	s needed for medical treatment.
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 41699
Residents Affected - Some		nd record review, the facility failed to er or, assessment, care plan and consent l s (Residents 42 ,99, and 102).	
	This deficient practice had the pote and quality of life.	ential for the residents to have reduced	independence, functional capacity,
	Findings:		
	a. During a review of Resident 42's Admission Record, the Admission Record indicated Resident 42 was admitted to the facility on [DATE]. Resident 42's diagnoses included unspecified dementia with behavioral disturbance (a chronic or persistent disorder of the mental processes caused by brain disease or injury and marked by memory disorders, personality changes, and impaired reasoning), heart failure (condition in which the heart can not pump enough blood to meet the body's needs), and major depressive disorder (mood disorder that causes a persistent feeling of sadness and loss of interest and can interfere with your daily functioning).		
	During a review of Resident 42's Physician's order, for the month of May, with the Minimum Data Set (MDS) coordinator (MDS Coordinator 1), MDS Coordinator 1 confirmed that there was an order for an abdominal binder to prevent Resident 42 from pulling out the gastrostomy ([G-tube] surgical opening into the stomach for nutrition, hydration, and medication) tube dated 5/13/2020. The MDS Coordinator 1 was unable to verify if there was a physician's order of a soft belt nor any documentation in the medical chart that a restraint soft belt was obtained.		
	During a review of Resident 42's MDS, a standardized assessment and care screening tool, dated 3/19/2021, the MDS indicated Resident 42 had a short term and long-term memory problem. The MDS indicated under section P (restraints and alarms) that daily use of trunk restraint while out of bed or used in chair.		
	wheelchair attached on the side of	1 at 10:53 a.m., Resident 42 was obset her wheelchair. Resident 42 was unables non- communicative during this time	le to remove the soft belt when
	During an observation, interview, and concurrent record review on 5/26/2021 at 9:14 a.m. with Licensed Vocational Nurse 11 (LVN 11) and Resident 42, LVN 11 stated Resident 42 was usually French-speakir and knew a little bit of English when asked if Resident 42 was able to communicate her needs. LVN 11 stated nurses made rounds to check if residents needed help. Resident 42 was observed wearing a sea restraint. LVN 11 stated she could not find the physician's order for the seatbelt, but stated Resident 42 an order for an abdominal binder.		
	During an interview on 5/26/21 at 8:35 a.m. with MDS Coordinator 1, MDS Coordinator 1 stated Resident 42 was on restraint for abdominal binder but not waist or seatbelt restraint.

Residents Affected - Some	1	nd record review, the facility failed to er t before the use of physical restraints fo		
	This deficient practice had the pote	ential for the residents to have reduced	independence.	
	Findings:			
	During a review of Resident 42's Admission Record, the Admission Record indicated Resident 42 was admitted to the facility on [DATE]. Resident 42's diagnoses included unspecified dementia with behavioral disturbance (a chronic or persistent disorder of the mental processes caused by brain disease or injury and marked by memory disorders, personality changes, and impaired reasoning), heart failure (condition in whice the heart can not pump enough blood to meet the body's needs), and major depressive disorder (mood disorder that causes a persistent feeling of sadness and loss of interest and can interfere with your daily functioning).			
	During a review of Resident 42's physician's order, for the month of May 2021, with the MDS Coordinator 1, MDS Coordinator 1 confirmed there was an order for an abdominal binder to prevent the resident from pulling out the gastrostomy ([G-tube] surgical opening in the stomach for nutrition, hydration, and medication) tube, dated 5/13/2020. MDS Coordinator 1 was unable to verify there was a physician's order of a soft belt nor any documentation in the medical chart that a consent for a soft belt restraint was obtained.			
	During a review of Resident 42's Minimum Data Set (MDS), a standardized assessment and care screening tool, dated 3/19/2021, the MDS indicated Resident 42 had a short-term and long-term memory problem. The MDS indicated under Section P (restraints and alarms), the use of a trunk restraint was coded daily while our of bed or used while in the chair.			
	wheelchair attached on the side of	1 at 10:53 a.m., Resident 42 was obset the wheelchair. Resident 42 was unables as non- communicative during this time	e to remove the soft belt when	
	During an observation, interview and concurrent record review on 5/26/2021 at 9:14 a.m. with Licensed Vocational Nurse 11 (LVN 11), LVN 11 stated Resident 42 was French-speaking and knew a little bit of English. LVN 11 confirmed Residents 42's seatbelt restraint while the resident was observed up in a wheelchair. LVN 11 could not find the physician's order for the seatbelt, but LVN 11 stated Resident 42 has an order for an abdominal binder.

	This deficient practice had the pote respiratory needs.	ential for Resident 92 not to receive spe	ecific interventions to address	
	Findings:			
	During a review of Resident 92's Admission Record, the Admission Record indicated Resident 92 was readmitted to the facility on [DATE]. Resident's 92 diagnoses included Parkinson's disease (brain disord that leads to shaking, stiffness, and difficulty with walking, balance, and coordination), acute pulmonary edema (fluid buildup in the lungs), chronic diastolic heart failure (occurs when your heart muscle does repump blood as well as it should, and anemia (lack of healthy red blood cells to carry adequate oxygent your body's tissues).			
	During a review of Resident 92's Minimum Data Set (MDS), resident assessment and care-screening tool, dated 5/5/2021, indicated Resident 92 was rarely/never understood and rarely /never understands. The MDS indicated Resident 92 had short term and long-term memory problems. The MDS indicated Resident 92 required extensive to total assistance with bed mobility, transfer, dressing, toilet use, personal hygiene and bathing.			
	administer oxygen (O2) 2 liters per	hysician's order, dated 11/22/2020, the minute (L/min) via nasal canula (n/c). ormal Reference Range [NRR] 92 to 1	May titrate to keep O2 saturation	
	During a concurrent observation, interview, record review on 5/26/2021 at 6:55 a.m. with Licensed Vocational Nurse 6 (LVN 6) and the Director of Nursing (DON), LVN 6 stated Resident 92 was to rec at 2-3 L/min. LVN 6 verified Resident 92's physician's order indicated to administer O2 at 2 L/min. Re 92's O2 was observed at 2.5 L/min. The DON verified the flow meter on the oxygen tank did not mate physician's order.

F 0688 Level of Harm - Minimal harm or potential for actual harm	Provide appropriate care for a resident to maintain and/or improve range of motion (ROM), limited ROM and/or mobility, unless a decline is for a medical reason. 44055		
Residents Affected - Some	Based on interview and record review the facility failed to: 1. Have a system of communication between the Nursing and the Rehabilitation Departments to ensure Resident 52 received Restorative Nurse Assistant ([RNA] rehabilitative care for residents to maintain or regain physical, mental and emotional well-being) services after being discharged from hospice (care for person's in the final phase of life with a focus on comfort) services.		
	2. Ensure that Resident 52's refusa	ıl for RNA services was properly docun	nented.
	3. Ensure accurate assessments R	esident 52 was not receiving hospice s	services.
	4. Ensure Resident 52 was assess	ed on two scheduled quarterly assessn	nents in 2020.
	These deficient practices had the p	otential for a decline in Resident 52's f	unctional status.
	Findings:		
	During a record review of Resident 52's Admission Record, dated 4/21/2021, the Admission Record indicated the resident's diagnoses included hemiplegia (inability to move one side of the body) and hemiparesis (weakness to one side of the body) following cerebral infarction affecting the right dominant side and acquired absence of the left and right leg below the knee.		
	During a record review of Resident 52's Joint Mobility Assessment form, completed by Occupational Therapist 1 (OT 1 [OT] professional who specializes in improving one's ability to perform activities of daily living), dated 2/22/2019, the Joint Mobility Assessment form indicated Resident 52 exhibited a limitation of the right upper extremity (arm), bilateral (both) hips and both knees. The form indicated Resident 52 was assessed for joint mobility on 7/14/2020 and 10/17/2020. and was not assessed for joint mobility on two quarterly assessments. Resident 52's Joint mobility assessment document indicated that in 2020, Resident 52 was on hospice.		
	admitted under hospice on 9/25/20	52's medical record, the medical record 18, on 12/18/2019 hospice services we rs for RNA services since Resident 52'	ere discontinued. The medical
	During an interview on 5/27/21 at 9:38 a.m. with Certified Nurse Assistant and RNA 1(CNA/RNA 1), CNA/RNA 1 stated Resident 52 had no orders for range of motion ([ROM] exercise aimed to improve movement of a specific joint).		
	During an interview on 5/27/21 at 9:51 a.m. with Licensed Vocational Nurse 2 (LVN 2), LVN 2 stated Resident 52 had no orders for ROM or physical therapy (PT) treatment orders. LVN 2 stated Resident 52 was paralyzed on the right upper arm and had bilateral below the knee amputations and might benefit from left-sided ROM.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0755 Level of Harm - Minimal harm or potential for actual harm	During a review of Resident 98's MAR for the month of March 2021, the MAR indicated no order for Restoril 15 mg Capsule (Temazepam) 15 mg. The section on Monitor episodes of inability to sleep on 3-11 (3 p.m. to 11 p.m. shift) and 11-7 (11 p.m. to 7 a.m. shift) tally by hashmarks every evening and night shift, order date 1/20/2020 at 11:30 a.m., indicate zero 0 episodes on 3/1/2021, 3/2/2021, 3/3/2021, 3/4/2021, and 3/5/2021.			
Residents Affected - Some	During a review of Resident 98's Controlled or Antibiotic Drug Record for Restoril (Temazepam) 15 mg Capsule, the Controlled or Antibiotic Drug Record indicated three administration dates and times after the orders were discontinued, on date 3/1/2021, time 2100 (9 p.m.), on date 3/4/2021, time 2100, and on date 3/5/2021, time 2100. A fourth entry indicated Wasted. The recorded number of capsules indicated a starting quantity of 30 and remaining quantity of 26. The corresponding medication card, labeled, Temazepam 15 mg Capsule, Take 1 cap by mouth at bedtime (routinely), indicated four empty bubbles, starting from bubble 30 to bubble 27, with 26 capsules physically remaining.			
	During a review of the facility's P/P titled, Administering Medications, revised date 4/2017, the P/P indicated, Policy Statement .Medications shall be administered in a safe and timely manner, and as prescribed .Policy Interpretation and Implementation .Medications must be administered in accordance with orders, including any required time frame .			
	3. During an observation, on 5/26/2021, at 10:20 a.m., at the St. [NAME], Medication Cart during the morning medication administration, LVN 2 was checking the eMAR for Resident 23's order Polyethylene Glycol 1450 (formulation code) against the physical container of Polyethylene Glycol (Miralax, an over-the-counter laxative used for constipation) 3350 (formulation code) Powder for Solution Osmotic Laxative, 17 gram (strength) per dose by mouth. LVN 2 did not dispense the Polyethylene Glycol 3350.			
		at 10:29 a.m. with LVN 2, LVN 2, while perfective to the same. Let me go check with		
	During an interview on 5/26/2021 at 10:37 a.m. with LVN 2, LVN 2 stated, Central Supply said it was 1450 was back-ordered. Regarding who inputs the medication order in the system, LVN 2 stated, The RNs (registered nurses). After the surveyor informed LVN 2 that the wrong product was inputted into the system, she stated, I am going to clarify with the doctor that Polyethylene Glycol 3350 is what he ordered. LVN did not administer the medication.			
	During an interview on 5/26/2021 at 10:51 a.m. with LVN 8, regarding choices in e-MAR, PointClickCare, for Polyethylene Glycol, LVN 8 stated, 1450 was entered by [NAME] Letargo, RN Supervisor, on 11/23/2019 at 2:19 a.m. During a review of the steps in the e-MAR for entering Polyethylene Glycol powder indicated a menu of the formulations 1000, 1450, 1500, 3350, 4500, 8000, and 3350, 17 GM/SCOOP (generic formulation for Miralax).			
	During an interview on 5/26/2021 at 11:02 a.m. with LVN 8, regarding the formulation 1450, LVN 8 showed that the e-MAR indicated, Medication Class: Pharmaceutical Adjuvants (an inactive ingredient in the pharmaceutical industry as a solvent, plasticizer, surfactant, ointment and suppository base, and tablet and capsule lubricant).

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0756 Level of Harm - Immediate	Ensure a licensed pharmacist perform a monthly drug regimen review, including the medical chart, following irregularity reporting guidelines in developed policies and procedures.			
jeopardy to resident health or safety		HAVE BEEN EDITED TO PROTECT CO		
Residents Affected - Few	Based on observation, interview and record review, the facility failed to ensure one of one sampled residents (Resident 33), who was drinking alcohol, was provided with a thorough drug regimen review. The facility's pharmacist consultant also failed to identify drug irregularities during the monthly Medication Regimen Review (MRR) when antipsychotic (Quetiapine Fumarate [medication used to treat psychosis]) medication was used for the treatment of psychosis (severe mental disorder in which thought and emotions are so impaired that contact is lost with external reality) without a documented clinical rationale for Resident 23 by failing to:			
	Ensure medications review for possible drug interactions (an interaction between a drug and another substance that prevents the drug from performing as expected) and/or irregularities when there was an order for the resident to consume alcohol while receiving prescribed medications.			
	 Ensure licensed nurses contacted the pharmacist (a person who is professionally qualified to prepare and dispense medicinal drugs) to determine if any of the resident's current medications could interact with alcohol. 			
	This deficient practice had the potential for a drug/alcohol interaction, which could cause dizziness, drowsiness, impaired thinking, judgement, and motor coordination and placed Resident 33 at risk for injury, and had the potential for Resident 23 to receive uneccessary medication.			
	On 5/28/2021 at 4 p.m., during a recertification survey, an Immediate Jeopardy ([IJ] a situation in which the facility's noncompliance with one or more requirements of participation has cause, or is likely to cause, serious injury, harm impairment or death to a resident) was identified and declared under F756 for Resident 33. The facility's staff failed to consult with the facility's Pharmacy Consultant (PC) for possible irregularities or drug alcohol interactions when Resident 33 had a physician's order to consume alcohol (beer and wine). The IJ was called in the presence of Administrator (ADM) and the Director of Nursing (DON).			
	During an interview on 5/29/2021 at 2:45 p.m., the DON submitted an acceptable Plan of Action ([POA] interventions to correct the deficient practices). The IJ was lifted at 2:45 p.m., after the team verified and confirmed the POA was implemented per observations, interviews, and record review, while onsite. The acceptable POA included the following for Resident 33:			
	All alcoholic beverages were ren	noved from the resident's room immedi	ately on 5/28/2021.	
	The alcoholic beverages were plonly the Licensed Nurses have accomply the Nurses have accomply the Licensed Nurses have accomply the Lice	aced under secure lock in the medicati	on room on 5/28/2021, whereas	
	3. The resident shall consume alcoholic beverages per order under staff supervision with monitoring related to potential drug cross sensitivity with consumption of alcoholic beverages, including but not limited to the following symptoms: low blood pressure, dizziness, drowsiness, light headedness, fainting, changes in puls or heart rate, confusion, difficulty concentrating, impaired thinking, impaired judgement, or impaired motor coordination every shift.

F 0756 Level of Harm - Immediate jeopardy to resident health or safety	4. The Interdisciplinary Team (a group of health care professionals with various areas of expertise who work together toward the goals of the resident) met on 5/28/2021 to discuss the findings and formulated a plan of care with family/primary contact involvement, physician participation, and pharmacist review. The problem was resolved on 5/28/2021.			
Residents Affected - Few	5. The facility conferred with the consulting pharmacist and received consultation with physician follow-up on 5/28/2021. The attending Physician visited the facility, reinterviewed the resident and documented his findings on 5/29/2021.			
	6. In-service to the monitoring process for alcohol consumption started on 5/28/2021 by the Director of Nursing, Registered Nurse (RN) Supervisors and/or designees at the point of problem identification.			
	7. The policy shall indicate that alcoholic beverages shall be treated as a medication and stored in the medication room on 5/28/2021.			
	8. The Director of Nursing will monitor the outcomes of the systemic changes and report on any trends during monthly Quality Assurance and Performance Improvement ([QAPI] proactive approach to quality improvement) meetings for three (3) months for further recommendations.			
	Findings:			
	a. During a review of Resident 33's admission record (Face sheet), the Face sheet indicated the resident was admitted to the facility on [DATE]. Resident 33's admitting diagnoses included toxic encephalopathy (a brain malfunction and toxic asserts the malfunction is caused by toxins on the brain), heart failure (a condition in which the heart cannot pump enough blood to meet the body's needs), atrial fibrillation (an irregular and often rapid heart rate) hyperlipidemia (a condition in which there are high levels of fat particles (lipids) in the blood), polyneuropathy (many nerves in different parts of the body are involved), dementia (progressive impairments to memory, thinking and behavior, that affect the ability to perform everyday activities).			
	During a review of Resident 33's Minimum Data Set (MDS), a standardized assessment and care-screening tool, dated 3/12/2021, the MDS indicated Resident 33 sometimes had the ability to understand and be understood. According to the MDS, Resident 33 required total assistance with activities of daily living ([ADLs] such as grooming, toileting, eating etc.).			
	During a review of Resident 33 Phy indicated Resident 33 was receiving	ysician's order Recapitulation (summar g the following medications:	y), dated 4/30/2021, the orders	
	1.Gabapentin 100 milligram ([mg]unit of measurement) at bedtime for polyneuropathy (simultaneous malfunction of many peripheral nerves (refers to parts of the nervous system outside the brain and spinal cord) throughout the body) with an original order date of 10/26/2020.			
	2. Lasix 40 mg, one time per day for	or hypertension (high blood pressure),	original order date 6/15/2020.	
	3. Metoprolol Succinate Extended 10/26/2020.	Release 25 mg tablet for hypertension	with an original order date of

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0756 Level of Harm - Immediate jeopardy to resident health or safety	During a review of Resident 33's Recapitulation orders, the physician order indicated Resident 33 could have 30 cubic centimeter ([cc] unit of measurement) of wine three (3x) times a day with an original order date of 8/29/2019. The physician's order indicated Resident 33 could also have beer twice (2x) per week with an original order date of 3/17/2020.		
Residents Affected - Few	During a review of Resident 33's Medication Administration Record (MAR) for the wine administration for the months of May 1-31, 2021, indicated it was signed by several Licensed Vocational Nurses (LVNs), but there was no documentation for Resident 33's beer consumption.		
	During an interview on 5/27/2021 at 2:06 p.m., Licensed Vocational Nurse (LVN 10) stated Resident 33's wine was kept in the resident's personal unlocked refrigerator at the bedside. LVN 10 stated the licensed nurses were the ones pouring the wine in the medication cup for the resident and then signing the MAR at the time the wine is given. LVN 10 stated Resident 33's beer was at the resident's bedside and some kept in the resident's personal refrigerator. LVN 10 stated there was no monitoring of how much beer Resident 33 consumed.		
	During an interview on 5/27/2021 at 11:04 a.m., Housekeeping 1 stated she was the one who cleaned Resident 33's personal unlocked refrigerator.		
	During a concurrent observation and interview on 5/28/2021 at 9:23 a.m., in Resident 33's room, there were three (3) boxes (36 cans) of beer containing alcohol at the resident's bedside and an unopened bottle of wine. In Resident 33's personal refrigerator a few cans of beer and a bottle of wine was observed. Resident 33 stated, she drinks whenever she wanted to drink and as much as she wanted.		
	During an interview on 5/28/2021 at 2:06 p.m., with Registered Nurse (RN) 1, RN 1 stated the process for when the residents received an order to have beer or wine, was to check the resident's allergies and medication for black box warning (appears on a prescription drug's label and is designed to call attention serious or life-threatening risks) and ensure the family was aware. RN 1 was asked about the facility's pol and procedure (P/P) for the resident consumption of alcohol. RN 1 stated he was not aware of a facility's for alcohol consumption. RN 1 was asked if the staff were monitoring and documenting Resident 33's consumption of beer. RN 1 stated there was no documentation on the MAR or anywhere for the beer Resident 33 was consuming. RN 1 was asked if the pharmacy was contacted for possible drug and alcoholinteraction, RN 1 was unable to answer and/or provide any documentation. During a review of Resident 33's Medication Regimen Review ([MRR] a review of all medications the resident was currently using in order to identify any potential adverse effects and drug reactions, including ineffective drug therapy, significant side effects, significant drug interactions, duplicate drug therapy, and noncompliance with drug therapy) for the month of 5/2021, the MRR indicated there was no findings, changes or recommendations by the pharmacist.		
	During a telephone interview on 5/28/2021 at 11:29 a.m., Pharmacist Consultant 1 (PC 1) stated she reviewed Resident 33's medication list and stated all the resident's medication interacts with alcohol, especially if the resident was drinking excessively. PC 1 stated Gabapentin and anti-hypertensive medications should not be combined with alcohol and any medication with an extended release (the drug released slowly over time) alcohol should be avoided. PC 1 stated it was the facility's responsibility to initia the call to the pharmacy of Resident 33's physician order to consume alcohol while receiving prescribed medications.
