F 0550		se negative interactions between the re		
Level of Harm - Actual harm	Resident #50 reported to him that the name calling made her uncomfortable and self conscious as she was already self conscious about her weight and these interactions did not make her feel good.			
Residents Affected - Few	The DON was interviewed on 8/17/21 at 3:35 p.m. She said Resident #20 had been calling Resident #50 negative names for a few months. She said she heard the name calling on one occasion. She said she immediately talked to Resident #20 about it but it continued.			
	20287			
	V. Resident #36			
	A. Resident status			
	Resident #36, age 91, was admitted on [DATE]. According to the August 2021 CPO diagnoses included, malignant neoplasm (cancer) of colon, and multi system degeneration of the autonomic nervous system.			
	The 6/15/21 minimum data set (MDS) assessment showed the resident was cognitively intact with a brief interview for mental status (BIMS) of 15 out of 15. The resident was independent in all self care areas. The resident had no behavior issues.			
	B. Resident interview			
	Resident #36 was interviewed on 8/11/21 at 10:33 a.m. The resident said he could not relax living here at th facility. He said he had lived at the facility for the past five years and has had six different roommates. He said Resident #1 used to be his roommate, however, he moved approximately six months ago. Resident #1 was moved because he was making racial comments and name calling to him. The name calling was in regards to using the N word (considered a racial slur) to an African American male resident. He said when h was moved, he was moved directly across the hall from his room, and now he continued to use the N word toward himself and his current roommate. Resident #36 went on to say that the comments made him angry, and it was hurtful and made him feel awful bad and he did not understand why the facility had not done anything about this problem. He said the staff were aware and he did not like being treated this way, he feels he was discriminated against.			
	C. Resident #1			
	Resident #1, age 93, was admitted on [DATE]. According to the August 2021 computerized physician orde (CPO), diagnoses included type two diabetes, dementia, coronary artery disease, hypertension, cataracts and dry eye syndrome with bilateral lacrimal glands.			
	The 5/5/21 minimum data set (MDS) assessment revealed the resident had severe cognitive impairment wi a brief mental status (BIMS) score of two out of 15. The resident required limited assistance of one person for bed mobility, transfers, bathing, hygiene, dressing and toilet use. He required supervision for mobility an eating. The resident was coded for having adequate vision without glasses. The resident was coded for not exhibiting verbal behaviors directed towards others.

F 0553	Allow resident to participate in the development and implementation of his or her person-centered plan of care.		
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT C	ONFIDENTIALITY** 44949
Residents Affected - Some	Based on interviews and record review the facility failed to ensure three (#50, #2 and #36) of four out of 32 sample residents reviewed had the right to participate in the development and implementation of their person-centered plan of care.		
	Specifically, the facility failed to inv	ite schedule a care conference with the	e Resident #50, #2 and #36.
	Findings include: 1. Facility policy The care plan development and communication policy was provided by the regional nurse consultant or 8/17/21 at 3:00 p.m. It read, in pertinent part: The resident and/or responsible parties are invited in writing to the residents ' care plan meeting. Each resident and/or responsible party are invited and included at the specific time for the care conference. If time is inconvenient for the resident and/or family member, a separate meeting is rescheduled to accommodate their needs.		
	II. Residents not attending care cor	nferences	
	1. Resident #50		
	A. Resident #50 status		
	Resident #50, age 41, was admitted on [DATE]. According to the August 2021 computerized physician orders (CPO), diagnoses included hemiplegia and hemiparesis, depression, anxiety, and chronic pain.		
	The 4/14/21 minimum data set (MDS) assessment revealed the resident was cognitively intact with a brief interview for mental status assessment score of 15 out of 15. The resident required extensive assistance for activities of daily living. The resident had no behaviors impacting care.		
	B. Interviews		
	Resident #50 was interviewed on 8/11/21 at 2:32 p.m. She said she was not involved in care planning. She said she was informed of the care conference meeting but that staff did not come to get her for the meeting. She said she was unable to ambulate herself or self propel herself to the meeting.		
	C. Record review		
	Progress notes indicated the last documented care conference meeting in the electronic medical record was 1/19/21. It did not list Resident #50 in attendance, invited or if the resident declined attending.

	-staff turnover and use of agency;			
	-Activities only offered on tv;			
	-Residents requested having games left out in the evening;			
	Review of the concerns/grievance log for the facility failed to identify any of the concerns identified during the last six months of resident council minutes provided by the facility.			
	III. Staff interviews			
	The social worker (SW) was interviewed on 8/17/21 at 3:32 p.m. He said he was the one who ne concern/grievance binder. He said anyone can fill out a grievance form and leave it in his mailby when he received a grievance form for a specific department he would give it to the department follow up with the resident. Once the grievance was addressed the department manager will give completed form to the nursing home administrator and he will put the completed form in the bin said he did not fill out any grievance forms from resident council and assumed the life enrichmen (LED) filld out the forms and delivers them to the appropriate department manager. The SW replacts is in months of resident council minutes and said he was unaware of the ancillary concerns minutes. He reviewed the grievance binder and was unable to find grievance forms addressing noted in the resident council minutes for the past six months.			
The Regional nurse consultant (RNC) was interviewed on 8/17/21 at 4:00 p.m. She reviewed the binder and was not able to find completed grievance forms for the specific concerns identified or resident council minutes. She said since the social services director resigned things have faller cracks. She said she can tell us how the grievance process should be handled but can not say done correctly currently in this facility. She said they have brought in a consultant to help the social department and the consultant has also identified the grievance process as a concern. The RN will help the SW with the follow-up and concerns identified with the department overall.

F 0585 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	The (LED) was interviewed on 8/17/21 at 4:46 p.m. He said that he is responsible for running the resident council meetings and writing up the minutes for each meeting. He said each department manager is invited and attends the meetings when possible. He said he provided the meeting minutes to the NHA and the department managers and assumed each manager would follow up with their department concerns. He said he did not fill out grievance forms from the meetings and assumed the managers would read the minutes and provide their own follow up specific to each department. He said he does fill out grievance forms for his own department.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0679 Level of Harm - Minimal harm or potential for actual harm	On 8/17/21 from 10:00 a.m. to 11:15 a.m. the resident was lying in his bed looking up to the ceiling without stimulation. Observed a radio in the room but it was not turned on. Observed activity staff on unit but they did not go into the resident's room to offer to turn his radio on to listen to his favorite music as documented in his plan of care.			
Residents Affected - Few	C. Record review			
	The 2/9/21 MDS assessment, Section F (Interview for Activity Preferences) revealed it was very important listen to music he likes, do favorite activities and participate in religious services.			
	The comprehensive care plan initiated on 2/16/21 and revised on 8/3/21 identified the resident had litt programing involvement related to physical limitations. Interventions included for activity staff to provious radio in the resident's room. It documented the resident was happy when he heard Spanish language music, the resident was able to listen to television and listen to the radio. The resident needs assistance/escort to programs.			
	The August 2021 activity participation log was reviewed. It revealed multiple activities codes which identifie the type of activity. It documented the following activities:			
	8/11/21-codes 36-resting, 30-socia	I visits and 28-socializing with others.		
	8/12/21-codes 28 and 36.			
	8/17/21-codes 30, 28 and 31-food	social.		
	, , , , , , , , , , , , , , , , , , , ,	of activity as music/sing/play. However, activity as documented in his care plan

Level of Harm - Minimal harm or potential for actual harm	C. Record review				
Residents Affected - Few	The Life 360 Admission Evaluation on 6/3/21 identified Resident #22 had a cognitive deficit, communication deficit, and needed assistance from staff for activity participation. The evaluation identified one-to-one visits from staff, hand massage, stuffed animals and spanish music as interventions and preferences for Resident #22.				
	Review of Resident #22's activity care plan, initiated on 6/17/20 and revised on 7/19/21 revealed the resident on others for daily leisure needs. The care plan documented the resident enjoyed Spanimusic, staff one-to-one social visits, hand massage with lotion, holding her stuffed animal and the rosary				
	-Since the resident was admitted on [DATE], there was a total of seven activity progress notes and one activity assessment completed.				
	The life enrichment director (LED) provided Resident #22's August 2021 daily activity participation record on 8/18/21 at 1:00 p.m. The record revealed the resident participated in two to four activities a day on average.				
	-The documentation did not provide the time of the activity or the staff person documenting the activity.				
	The record did identify the activity and if the resident was available to participate. Numerous activities were documented reflecting that Resident #22 was not available to participate.				
	-However, the resident was dependent on staff for participation and is bed bound.				
	-In particular, on 8/11/21 the resident's participation record revealed that the resident participated in five activities and was unavailable for two activities, but the resident was observed to be in her bed without being offered activities (see above).				
	D. Staff interview				
	The LED was interviewed on 8/17/21 at 4:46 p.m. and again on 8/18/21 at 12:37 p.m. The LED h the facility as the LED for one year and was an activity assistant since 2009. He said he had two who work a staggered schedule to cover the activity department seven days a week. He said he to the initial, annual and change of condition assessments on point click care (PCC) and had a paper resident's daily participation in a binder. He said not all of the activity assistants were comfortable so they were doing the daily documentation on paper. The LED was responsible for the resident assessments and all of the activity staff were responsible for the daily documentation. He said he the care plans in PCC but does not document quarterly progress notes for the care plans and sai worker runs the care conferences and assumed he wrote a quarterly note.

F 0684	Provide appropriate treatment and care according to orders, resident's preferences and goals.			
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 43134	
Residents Affected - Some	Based on observations, interview, and record review, the facility failed to ensure five (#18, #50, #35, #37, and #56) of five out of 32 sample residents received treatment and care in accordance with professional standards of practice and the comprehensive person-centered plan.			
	Specifically, the facility failed to:			
	-Follow physician orders for medica	ation administration for Resident #18, #	50, and #1;	
	-Ensure glucometer audits were completed to maintain accuracy for Resident #56;			
	-Notify nurse regarding a change in	condition for Resident #37 observed b	by two other staff members; and,	
	-Provided needed resources to prevent a decline for Resident #35.			
	Finding include:			
	I. Need resources to prevent declin	е		
	Resident #35			
	A. Resident status:			
	Resident #35, age 68, was admitted on [DATE]. According to the August 2021 computerized physician orders (CPO), the diagnoses included chronic respiratory failure, hypertension, heart failure, peripheral vascular disease and obesity.			
	The 6/16/21 minimum data set (MDS) assessment revealed the resident was cognitively intact with a brief interview for mental status score (BIMS) of 14 out of 15. He required total dependence with two or more persons to assist with transfers, total extensive assistance with two or more persons to assist with bed mobility, dressing and toilet use, supervision with one person assistance to eat. He did not walk during the look back period for this MDS assessment. He was six feet tall and weighed 440 pounds			
	B. Resident interview			
	Resident #35 was interviewed on 8/12/21 at 10:15 a.m. He stated he wanted to get out of bed and sit in his wheelchair. He said he required maximum assistance with a mechanical lift to transfer out of bed. The resident said when he was transferred in the mechanical lift he had a lot of pain that he explained as a constant and unbearable pain in his legs felt squeezed and was scared when he was in the sling because he could not breathe.

F 0684 Level of Harm - Minimal harm or potential for actual harm	The 8/17/21 provider progress note stated the resident had drainage, erythema (redness) to both eyes. Resident #37 was recently treated for conjunctivitis due to immunodeficiency (week immune system). She was diagnosed with allergic conjunctivitis at the provider visit, with eye gel ordered and to monitor for signs of infection in her eyes.			
Residents Affected - Some	D. Interviews			
	Registered nurse (RN) #2 was interviewed on 8/16/21 at 1:30 p.m. The RN said he was not notified by the SW, LED or CNA #5 that Resident #37's eye was bothering her. He would like to know about the residents he cared for if they had a concern like that so the resident could receive treatment as soon as possible.			
	44949			
	III. Physician orders for medication administration			
	1. Resident #18			
	A. Resident #18 status			
	Resident #18, age 65, was admitted on [DATE]. According to the August 2021 computerized physician orders (CPO), diagnoses included Parkinson's Disease, osteoarthritis, and history of falls.			
	The 6/8/21 minimum data set (MDS) assessment revealed the resident was cognitively intact with a brief interview for mental status (BIMS) score of 15 out of 15. The resident required extensive assistance for activities of daily living.			
	B. Resident interview			
	On 8/11/21 at 11:24 a.m. Resident #18 was interviewed. She said she falls over in the bathroom frequently. She said when this happens she falls into the backside of the toilet or her wheelchair. She said she becomes very dizzy and rigid during these episodes. She said this also happens when she leaves the smoking area to come inside. She said she needs someone to push her wheelchair so a staff member was present.			
	C. Record review			
	On 8/5/21 Resident #18 has an in office neurology appointment. It indicated Resident #18 was reporting dizzy spells involving slumping forward in her wheelchair. The physician suspected low blood pressure and ordered Florinef 0.1 milligram daily. The note was signed and received by the facility on 8/5/21.			
	-However, the medication was not	ordered until 8/17/21 (during survey).

F 0684 Level of Harm - Minimal harm or	Certified nurse aide (CNA) #3 was interviewed on 8/17/21 at 2:10 p.m. She said Resident #18 has seizures during every transfer and the resident may call them a fall. She said the protocol was to stay with her to make her feel safe. CNA #3 said she was unsure whether every seizure was reported to the physician.			
potential for actual harm Residents Affected - Some	Licensed practical nurse (LPN) #3 was interviewed on 8/17/21 at 2:42 p.m. He said Resident #18 occasionally had seizures. He said he marked it in the progress notes and reported it to the physician. He said he did not think these were happening weekly. At 3:05 p.m. he said he followed up with the physician and clarified that these episodes during transfers were not seizures, but episodes of rigidity related to diagnosis of Parkinson's Disease.			
	LPN #1 was interviewed on 8/18/21 at 9:02 a.m. She said Resident #18 called episodes of dizziness falls or seizures but they were not. She said they are episodes of freezing and dizziness. She read the neurology physician's orders dated 8/5/21 and located the corresponding orders in the resident's CPO. She said this medication was added on 8/17/21. She said when a resident went to an office specialist visit and returned with medication orders, it was the floor nurse's responsibility to call the primary care physician. She said if the primary care physician was in agreement with the specialist, the orders would get added.			
	The director of nursing (DON) was interviewed on 8/18/21 at 9:20 a.m. She said that if a resident returns from a specialist visit with new orders, those orders should be added within 24 hours. She said a two week delay should not happen and she was unsure what happened in this case.			
	2. Resident #50			
	A. Resident #50 status

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0688 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	The 7/28/21 quarterly minimum data set (MDS) assessment revealed the resident was cognitively impaired and a brief interview for mental status (BIMS) that was unknown because the resident was rarely or never understood. He required two or more persons total assistance with bed mobility, transfers, dressing, toilet use and personal hygiene. He required total dependence on one staff member for eating, he was not able to walk and required total assistance for bathing. He had impairment of both his arms and legs due to Parkinson's disease. He did not receive physical, occupational or restorative therapy during the look back period.			
	B. Observations			
	On 8/12/21 at 9:30 a.m. Resident #65 was on his bed with the lights and television off. He had visible contractures to his knees that were bent with his legs folded all the way. His hips were twisted to the right while his torso was more facing forward.			
	C. Record review			
	The 1/25/21 therapy evaluation read the resident had contractures that measured; the right hip at 115 degrees, the right knee 120 degrees and the dorsiflex (foot) was two degrees. The measurements for the left hip was 111 degrees, the left knee 120 degrees and the dorsiflex (foot) was four degrees, that read Resident #65 had major contractures of his legs.			
	The tasks for July and August of 2021 were documented in the electronic medical record EMR by the RCNAs after they were completed. The document read Resident #65 his brace was applied to his hands and transferred to his reclining wheelchair on 8/17/21. Other than on 8/17/21, the resident did not receive ROM exercises during the last 30 days reviewed until 8/18/21.			
	The care plan last revised on 6/8/21 focused on the restorative program as he was dependent for activities of daily living (ADLs) and had extensive contractures to all his extremities and required assistance a minimum of three times a week to perform ROM exercises, dependent on staff for transfers to his reclining wheelchair and apply braces to his hands according to the restorative plan of care.			
	The restorative progress notes were for the restorative exercises and tasks completed for the week. There were no restorative weekly notes after 7/29/21 therefore, Resident #65 did not have a restorative progress note for a minimum of two weeks. It was not documented that the resident refused therapy.			
	D. Staff interviews			
	RCNA #4 was interviewed on 8/18/21 at 3:00 p.m. He said that he works with Resident #65, three days a week. When the facility did not have enough CNAs to meet the residents' needs, RCNA #4 was pulled to the floor about once a week and picked up extra shifts (cross-reference F725). He provided him with restorative therapy on his scheduled days. He said he was not sure about the other days when he did not work, especially the weekends.			
	The DON was interviewed on 8/17/21 at 5:00 p.m. Resident #65's FMP was used to plan his restorative program to maintain ROM and prevent contractures.

Residents Affected - Few		iew and interviews, the facility failed to ee (#12) of five residents reviewed for fa		
	Specifically, the facility failed to ensinjury as according to the care plan	sure the fall mat was in place when the i.	resident was in bed to prevent	
	Findings include:			
	I. Facility policy and procedure			
	The Fall management and investigation policy dated 9/18/18 was provided by the nursing home administrator (NHA). It read in pertinent parts, Five stars utilizes all reasonable efforts to provide a system to review residents potential risk for falls and provide a proactive program of supervision, assistive devices and interventions to manage and minimize falls and identify resident's continued needs. Care plan is developed that addresses potential risk factors for falls and recommended interventions. Fall interventions are documented in the resident record.			
	II. Resident status			
	Resident #12, age 78, was admitted on [DATE]. According to the August 2021 computerized physician orders (CPO), diagnoses included legal blindness and difficulty walking. The 5/12/21 minimum data set (MDS) assessment revealed the resident had moderate cognitive impairments with a brief interview of mental (BIM) status score of nine out of 15. He required extensive assistance with transfer and total dependence with bed mobility.			
	III. Observations			
	On 8/11/21 at 9:50 a.m., on 8/12/21 at 2:00 p.m. and on 8/17/21 at 10:00 a.m.,the resident was In the low position. The fall mat was o folded at the foot of the resident's bed. The fall not placed by the resident's bed.			
	IV. Record review			
	The 2/2/21 care plan revised on 6/28/21 identified the resident was at risk for falls related to histor mobility limitations, weakness, discomfort, some memory loss, poor safety awareness at times an psychotropic medications. Some interventions were to ensure resident's call light was within reach ensure resident was wearing appropriate fitting footwear and clothing, make sure frequently used call devices are within reach and in working condition and will provide a safe environment free of contractions.

F 0693	A. Resident status			
Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Resident #22, age less than 60, was initially admitted on [DATE]. According to the August 2021 computerized physician orders (CPO), diagnoses included nontraumatic subarachnoid hemorrhage from unspecified intracranial artery, hemiplegia and hemiparesis following cerebral infarction affecting right dominant side, aphasia (loss of ability to understand or express speech) dysphagia (difficulty swallowing) and abnormal weight loss.			
	The June 2021 annual minimum data set (MDS) assessment revealed the resident was unable to complete a brief interview for mental status (BIMS.) The assessment documented she was moderately cognitively impaired for daily decisions Resident #22 required extensive two-person assistance with transfers, and extensive one person assistance with bed mobility, dressing, hygiene eating, and toileting. She had a feeding tube.			
	II. Record review			
	A. CPO for enteral feeding			
	The August 2021 CPO revealed the	e following physician orders for enteral	feedings:	
	-Two times a day Jevity 1.5 via Per up at 4:00 p.m. and down at 10:00	cutaneous endoscopic gastrostomy (P a.m. to provide 990 ml/1485 cal	EG); pump 55 ml/hour for 18 hours	
	-every shift Head of bed > 30 degre	ees during feedings		
	-six times a day Flush 150 ml wate	r via PEG		
	-Nutritional Supplement one time a PEG	day Sugar Free (SF) ProStat advance	d wound care (AWC), 30 ml via	
	-every shift flush PEG with water be	efore and after medication administration	on	
	B. Care plan for enteral feeding			
	The enteral feeding section of the comprehensive care plan, last revised on 7/19/21, documented, Resident #22 required the need of an enteral feeding due to dysphagia from history of cerebrovascular accident (CVA) and a diet of nothing by mouth (NPO). Pertinent interventions included:			
	-Monitor/document/report as needed any signs of symptoms of aspiration, fever, shortness of breath, tube dislodged, infection at tube site, self-extubation, tube dysfunction or malfunction, abnormal breath/lung sounds, abnormal lab values, abdominal pain, distention, tenderness, constipation or fecal impaction, diarrhea, nausea/vomiting, dehydration.			
	-Resident #22 was dependent on to	ube feeding and water flushes.		
	-The resident needs the head of the bed maintained at an angle of 30-45 degrees before starting a feeding/med pass and for at least 45-60 minutes afterwards.

Residents Affected - Some	Jeveti bag hanging on the IV pole v	#22 was lying in her bed, and was not r was dated 8/10/21 with a start time of 1 v turned off with 200 ml left in the bag.		
	IV. Staff interviews			
	The DON was interviewed on 8/12/21 at 5:00 p.m. The DON reviewed Resident #22's MARs and confirmed she should have 55 ml 1.5 of jeviti tube feeding from 4:00 p.m. to 10:00 a.m. daily. She said it looked like the resident has received her scheduled feedings based on the documentation in the MAR. She went down to Resident #22's room and agreed the feeding tube pump was not running and the Jeviti bag hanging on the IV pole was dated 8/10/21 hung at 11:30 p.m. She confirmed the bag had not been changed for two days and she would ask her evening nurse who just arrived to start Resident #22's tube feeding. The DON was interviewed a second time on 8/12/21 at 5:28 p.m. She said she did not understand until now			
	that Resident #22 had not been giv right away.	en her tube feeding since 8/10/21 and	she would go get that taken care of	
	The Registered dietitian (RD) was interviewed on 8/18/21 at 2:20 p.m. She reviewed the Resident #22's current POC and confirmed the enteral feeding orders of 55ml/hour of jeviti and her water intake was 1692 ml daily, which included free water and flushes. She said her June 2021 labs are within normal limits. The RD said she would be concerned about a resident missing a scheduled tube feeding and would be notified by staff if that happened. She said she would be told directly by the nurse or it would be discussed in the morning meeting. She said there should also be documentation to reflect the missed tube feeding and there is not. She said she was not notified of Resident #22 missing a feeding.

F 0725 Level of Harm - Minimal harm or potential for actual harm	Provide enough nursing staff every day to meet the needs of every resident; and have a licensed nurse in charge on each shift. 20287		
Residents Affected - Many	Based on observations, interviews and record review, the facility failed to provide sufficient nursing staff the appropriate competencies and skills to ensure the residents received the care and services they req as determined by resident assessments and individual plans of care. Specifically, the facility failed to consistently provide adequate nursing staff which considered the acuity diagnoses of the facility's resident population in accordance with the facility assessment, resident censu and daily care required by the residents. As a result of inadequate staffing, the facility had delayed call light response, failed to provide assistance with activities of daily living (ADLs). Cross-reference F676 failure to provide assistance with activities of daily living and F688 for restorative services.		
	Findings include:		
	I. Resident census and conditions		
	According to the 8/11/21 Resident and the following care needs were	Census and Conditions of Residents reidentified:	eport, the resident census was 66
	-54 residents needed assistance of residents were independent.	one or two staff with bathing and 12 re	esidents were dependent. One
	-58 residents needed assistance of one or two staff members for toilet use and three resident were dependent and five residents were independent.		
	-60 residents needed assistance of one or two staff members for dressing and four were dependent and two residents were independent.		
	-35 residents needed assistance of one or two staff members and 13 were dependent for transfers. Eighteen residents were independent.		
	-29 residents needed assistance of one or two staff members with eating and four were dependent and 33 were independent.

F 0761 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	The MDS coordinator said all medications should be labeled when first opened. She said the nurse who first opened the medication was responsible to label the medication with the opened date. She said she worked on the cart over the weekend and she opened a new insulin and labeled it with the opened date. She said probably the insulin was finished and the nurse opened another one and did not label it. She said she was not aware the inhalers were not labeled with the open dates and was not sure of the nurse who opened them. She said she would remove the insulin from the cart and call the pharmacy for replacement. She also said she would inquire from the pharmacy regarding the inhalers with no open date. All the above medications were currently being used.			
	B. Cart #2 (Main Hall)			
	On 8/18/21 at 11:20 a.m., medication cart #2 was inspected in the presence of licensed practical nurse (LPN) #4.			
	The following observations were made:			
	-One Humulin R insulin was labeled 6/28/21 with an open date (was not removed from the medication cart after 28 days).			
	-One Pataday Solution 0.1 % (eye drops) was not labeled with an open date.			
	-One Levemir FlexPen Solution (Insulin) was not labeled with an open date.			
	-Two Fluticasone nasal spray was not labeled with an open date.			
	LPN #4 said she was from the agency. She said it was her second day working in the facility. She said she was not aware the medications were not labeled with an open date. She said the nurse who first opens the medication should label it with the open it. All the above medications were currently being used except for Humulin R.			
	C. Cart #3 (University unit)			
	On 8/18/21 at 11:20 a.m., medicati	on cart #3 was inspected in the presen	ce of LPN #1.	
	The following observations were m	ade.		
	-One Lantus solution was not label	ed with an open date.		
	-Two Albuteral sulfate inhalers were not labeled with an open date and one expired on 6/7/21.			
	-One combivent Respinant was not	t labeled with an open date.		
	-One Fluticasone nasal spray was not labeled with an open date.
