F 0679 Level of Harm - Minimal harm or potential for actual harm	-At 10:45 a.m. Resident #71 remained sitting in the wheelchair in his room. The activity staff were observed walking through the hallway and were asking some residents if they wanted to participate in the crafting group activity. The activity staff did not go into Resident #71's room to ask him if he wanted to participate in the group activity.			
Residents Affected - Few	-At 12:04 p.m. the resident's family 1:04 p.m.	member entered the resident's room to	o visit with him and left the facility at	
	-At 2:22 p.m. Resident #71 was ob	served sitting in his room, in his wheeld	chair.	
	-At 3:16 p.m. the activity staff were observed walking throughout the hallway asking some residents if they wanted to attend a group activity of making candy bags. The activity staff did not go into Resident #71's room or ask the resident if he would like to participate in the group activity.			
	On 10/13/22, during a continuous observation beginning at 9:03 a.m. and ended at 12:20 p.m., an activity staff member was observed entering Resident #71's room to drop off the Daily Chronicle.			
	-At 9:14 a.m. the resident was in his room, sitting in the wheelchair. The television was not turned on and the resident did not have any meaningful activity while in his room. An unidentified CNA entered the resident's room. She did not speak to the resident and then exited the room.			
	-At 9:36 a.m. an unidentified CNA entered Resident #71's room and changed the bedding. Upon exiting the room, the CNA shut the door. Activity staff were observed walking throughout the hallway asking some residents if they wanted to attend the group activity which was exercising. Activity staff did not go into Resident #71's room or ask the resident if he would like to participate in the group activity.			
	-At 11:14 a.m. the resident propelle	ed himself in his wheelchair out of his re	oom and into the hallway.	
	-At 11:27 a.m. the resident's family room to visit.	member entered the nursing unit and	wheeled the resident back to his	
	C. Record review			
	The activity care plan, dated on 8/23/22, documented that Resident #71 enjoyed the paper daily, music, time with his family, socializing and watching television, but needed assistance with channel selection. The interventions included encouraging communication with his family, encouraging the resident to spend time outside of his room interacting with peers and staff members, spending time with visitors in the common areas to increase time out of his room and endurance, and encouraging participation in activities by assisting him to and from activities. It indicated the resident required reminders for group activity times and locations.			
	The 8/29/22 activity progress note documented that the resident had a subscription to the newspaper and received it daily. It indicated he was observed watching television, sleeping, socializing with employees and people watching. The resident had little to no interest in attending group activities at this time, however last quarter the resident participated in happy hour, sweet shop, calendar review, holiday events, and order in lunch group activities/events.

F 0688 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information) Resident #18, age 75, was admitted on [DATE] and readmitted on [DATE]. According to the September computerized physician orders (CPO), the diagnoses included cerebral infarction affecting the left non-dominant side (stroke), vascular dementia with behavioral disturbance, acute respiratory failure with hypoxia (not enough oxygen in the blood), stage three chronic kidney disease, gastro-esophageal refluidisease (GERD), legal blindness, depression, anxiety disorder, contracture of the felt elbow, left wrist, in hand, and contracture of the right and left knee. The 7/27/22 minimum data set (MDS) assessment revealed the resident was cognitively intact with a bi interview for mental status score of 15 out of 15. He required extensive assistance with bed mobility, transfers, locomotion on and off the unit, dressing, eating, toilet use and personal hygiene. He required dependence on staff for bathing. The resident did not reject care from staff. A seven day look back revealed the resident did not receive physical therapy, occupational therapy, an not on a program with restorative nursing. -According to the director of nursing (DON) he had not received a restorative nursing evaluation since 2 see interview below. B. Observations and interview On 10/10/22 at 3:52 p.m. Resident #18 was observed lying in bed, he used his right hand to hold his left and hand next to his chest. He was not wearing any hand or elbow contracture devices. Resident #18 said he had terrible contractures in his left hand and left wrist. He said sometimes he put rolled up tissue in his left hand to help make my contracture not hurt. He said his contractures did not greater time. He said the staff did not give or offer him anything to put in his hand or for his wrist. He had never heard of any device that was soft to put in his hand. He said sometimes he rolled up a co of a blanket to hold in his palm to avoid his hand feelin

SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information) F 0688 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few On 10/13/22 at 8:30 a.m. Resident #42 was observed sitting in the day room in his Broda chair, in front of the television. The resident did not have any preventative measures in place for his contractures. -At 9:45 a.m. certified nurse aide (CNA) #4 brought a blanket and put it on the residents feet. She did not offer the resident any preventative measures for his contracture. -At 1:17 p.m. the resident was observed in his room, lying supine in the bed. The resident did not have any preventative measures in place for his contractures. C. Record review The limited range of motion care plan, initiated 8/23/22, revealed that the resident had contractures to the right wrist, right elbow, right shoulder, right hand and left ankle. The interventions included observing and reporting any signs of immobility, contractures forming or worsening, thrombus formation or skin-breakdown providing supportive care and assistance with mobility as needed; and providing active and passive range of motion. It indicated the resident required total assistance for passive stretching of the bilateral ankles. The October 2022 CPO documented a restorative nursing range of motion program for the resident. -However, it did not include any instructions regarding which areas, how many days per week or minutes during each session. According to the October 2022 restorative nursing range of motion program documentation the resident participated in total assistance of the bilateral left ankle on six out of 14 occasions. (X4) ID PREFIX TAG SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information) F 0688 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few On 10/13/22 at 8:30 a.m. Resident #42 was observed sitting in the day room in his Broda chair, in front of the television. The resident did not have any preventative measures in place for his contractures. -At 9:45 a.m. certified nurse aide (CNA) #4 brought a blanket and put it on the residents feet. She did not offer the resident any preventative measures for his contracture. -At 1:17 p.m. the resident was observed in his room, lying supine in the bed. The resident did not have any preventative measures in place for his contractures. C. Record review The limited range of motion care plan, initiated 8/23/22, revealed that the resident had contractures to the right wrist, right elbow, right shoulder, right hand and left ankle. The interventions included observing and reporting any signs of immobility, contractures forming or worsening, thrombus formation or skin-breakdown providing supportive care and assistance with mobility as needed; and providing active and passive range of motion. It indicated the resident required total assistance for passive stretching of the bilateral ankles. The October 2022 CPO documented a restorative nursing range of motion program for the resident. -However, it did not include any instructions regarding which areas, how many days per week or minutes during each session. According to the October 2022 restorative nursing range of motion program documentation the resident participated in total assistance of the bilateral left ankle on six out of 14 occasions. F 0692 Level of Harm - Actual harm Residents Affected - Few	The 8/15/22 minimum data set (MDS) assessment indicated the resident was cognitively intact with a brief interview for mental status score of 15 out of 15. It indicated the resident required set up assistance for eating. It indicated the resident did not have difficulty swallowing. It indicated the resident had weight loss and was not on a physician prescribed weight loss regimen. The section related to dental status was incomplete. III. Resident interview Resident #36 was interviewed on 10/11/22 at 10:20 a.m. She said the food at the facility was not good. She said she had complained about the food to the staff but she was unsure who and they did not do anything. She said she did not try to get a different meal if she did not like what was served. She said she was independent with eating and preferred to eat in her room. She said she had lost about 25 pounds since admission and was not on any supplemental nutrition. She said she usually ate about 50% of her meals. Resident #36 was interviewed again on 10/12/22 at 1:00 p.m. She said she ordered a cobb salad for lunch and it was good. The resident had eaten 50% of her salad and no milk was on her tray. The resident had two drinks. Resident #36 was interviewed again on 10/13/22 at 9:05 a.m. She said breakfast was good that morning an she had eaten about 50%. She said no milk was served with breakfast but she did not like milk. The resident had eaten 50% of her breakfast and no milk was on her tray. IV. Record review Weights since admission revealed the following: -On 2/10/22 the resident weighed 173.6 pounds; -On 2/13/22 the resident weighed 173.6 pounds; -On 2/14/22 the resident weighed 166.1 pounds; -On 3/14/22 the resident weighed 165.1 pounds; -On 3/15/22 the resident weighed 165.1 pounds;		
	-On 3/26/22 the resident weighed 16 -On 4/3/22 the resident weighed 16	•

F 0692 Level of Harm - Actual harm Residents Affected - Few	The snack intakes from the medication administration record were reviewed from 7/27/22-10/17/22 and indicated minimal snack intake. July and August 2022 had 0% intake of snacks documented. The September 2022 intake had ten days of 100% intake and two days of 20-25% documented. The October 2022 intake had one day of 100% documented. An order for 2Cal Med Pass twice a day was initiated on 3/23/22 and discontinued on 4/28/22. The medication administration record indicated minimal intake of this supplement with the majority of intake documented as 0%. V. Interviews The registered dietitian consultant (RDC) and licensed practical nurse (LPN) #1 were interviewed on 10/13/22 at 3:27 p.m. The RDC said Resident #36 had weight loss prior to the do not weigh order. She said the do not weigh order was in place for comfort and the family preferred it. She said the resident did not take any nutritional supplements. She said the resident was able to choose her preferred meals and frequently ordered a salad or her family would often bring in food. She said the resident consumed more when family was present. She said the dietary staff could fortify foods such as sauce or gravy and it would be given depending on what the resident ordered and what was on the meal service line. She said the weight loss		
	 was expected. She said the resident did not have weight loss interventions because the resident declined the interventions. She said interventions should be included in the care plan such as food preferences, snacks, assessment of chewing and swallowing as needed, and accepting food and fluids as described. She said the resident's care plan should have more interventions than it currently had due to the resident's health status. She said it was expected the resident's weight would decline due to the lack of interventions and the resident not being willing to accept interventions. -However, the interventions were not routinely offered, her dietary preferences were not obtained nor were her complaints addressed regarding the food. 		
	resident did not eat more if staff wa	e to the resident but she did not typically as present. She said the resident did no ver she wanted. She said her intake wa	t complain of the food taste or

F 0803 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	Ensure menus must meet the nutritional needs of residents, be prepared in advance, be followed, be updated, be reviewed by dietician, and meet the needs of the resident. 43135 Based on observations, record review, and interviews the facility failed to ensure menus were followed to			
	meet the residents' nutritional needs on two of two units. Specifically, the facility failed to follow the menu. Menu items were omitted without substitutions being made of the same nutritional value. Findings include: 1. Facility policy and procedure			
	The Menu, Substitution, and Alternative policy and procedure, 4/15/22, was sent via email on 10/18/22 at 3:34 p.m. by the director of nursing (DON). It revealed in pertinent part, Menus are planned in advance and are followed as written in order to meet the nutritional needs of the residents in accordance with established national guidelines. Residents with known dislikes of food and beverage items, who express a refusal of the food served or request a different meal choice are offered a substitute of similar nutritive value.			
	beginning a new cycle. The Director Menus are served as written, unless be procured or a special meal.	Menus are reviewed for nutritional adequacy, approved and signed by the Registered Dietitian prior to beginning a new cycle. The Director of Food and Nutrition Services signs and dates the menus as used. Menus are served as written, unless changed due to an unpopular item on the menu, an item that could not be procured or a special meal.		
		Services/Registered Dietitian documen ecord. Only the Director of Food and N au items.		
	Menus meet the nutritional needs of residents in accordance with established national guidelines. The Director of Food and Nutrition Services or Registered Dietitian ensures a planned menu alternate that is nutritionally equivalent is available on the menu. Each resident's preferences are followed to the extent nutritionally and medically desirable in order to promote food acceptance.			
	II. Record review			
	The facility's menus and nutritive values for week one and two were provided by the dietary manager (DM on 10/10/22 at 12:46 p.m. The weekly menu cycle was Sunday through Saturday. Each breakfast menu included a beverage of choice and milk.			
	-Week one had milk listed on the m	nenu calendar for every breakfast and c	linner.	
	-Week two had milk listed on the m	nenu calendar for every breakfast and d	linner.

F 0807	She did not have any water or other beverages within her reach.				
Level of Harm - Minimal harm or potential for actual harm	During a continuous observation on 10/12/22, beginning at 9:25 a.m. and ended at 2:30 p.m., Resident #58 was observed lying in her bed. The resident did not have any water on the bedside table or in her room.				
Residents Affected - Few	-At 12:10 p.m. the door was open and a lunch tray was set up in front of the resident. There was a coffee cup observed on the meal tray.				
	-At 2:30 p.m. an unidentified certified nursing aide (CNA) entered Resident #58's room and offered the resident ice and water. She filled a small, 4 oz (ounce) clear cup less than halfway with water.				
	On 10/13/22 at 9:12 a.m. Resident #58 was observed with a small, 4 oz clear cup filled a quarter of the way with water.				
	III. Resident #41				
	A. Resident status				
	Resident #41, age 93, was admitted on [DATE]. According to the October 2022 CPO, the diagnoses included atrial fibrillation and end stage renal failure.				
	The 8/15/22 minimum data set (MDS) revealed that the resident had severe cognitive impairment with brief interview for mental score of six out of 15. She required extensive assistance with one assist for bed mobility, transfers, dressing, toileting and personal hygiene.				
	B. Observations				
	On 10/10/22 at 10:12 a.m., Resident #41 was observed lying in bed. The resident's water pitcher was sitting on top of the heating/cooling unit across the room and not within reach of the resident.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)				
F 0807	CNA #5 said that Resident #58 can have a water pitcher but she usually wanted the clear cup or a cup with a handle. She said the resident preferred to have her beverages in a sippy cup.				
Level of Harm - Minimal harm or potential for actual harm	Licensed practical nurse (LPN) #6	was interviewed on 10/17/22 at 2:35 p.	m. She said Resident #58		
Residents Affected - Few	preferred the smaller clear cups used when passing medications for water. She said the water pitchers were too heavy for the resident to handle. She said the resident was able to ask the facility staff to refill her water cup.				
	LPN #6 said that Resident #41 was able to verbalize some needs, but the nursing staff needed to anticipate the resident's needs. LPN #6 said the resident was alert enough to say no thank you. She said Resident #41 was not able to get up on her own. She said Resident #41 would only be able to get to the water pitcher across the room if she was in her wheelchair.				
	The director of nursing (DON) was interviewed on 10/17/22 at 6:50 p.m. She said ice water was offered at the request of the resident and at least once per shift for all three shifts. She said it was a personal preference whether a resident has a pitcher or cup. She said the medication cups held approximately 4 oz. She said the water pitchers or cups of water should be placed in reach of the resident.				
She said Resident #58 could push the call light if she wanted any further water.					
	She confirmed Resident #41 was not able to get out of bed without staff assistance. She said the water pitcher should be within reach of the resident.
