F 0656	At the time of exit on [DATE], the IJ remained ongoing.			
Level of Harm - Immediate	Findings include:			
jeopardy to resident health or safety Residents Affected - Some	should be done on the following res	re titled Nutrition and Weight Managem sidents: Residents who have a 5% weig s and residents who have a 10% weigh	ght loss in 30 days, Residents who	
	Resident #6 was admitted to the facility on [DATE] and had diagnoses that included basal ganglia bleed, tracheostomy and gastrostomy tube placement, respiratory failure, dysphagia, left hemiparesis, Lupus, Cerebrovascular Accident (CVA), seizures and chronic kidney disease (CKD). Further review of the clinical record revealed that R#6 was dependent on nursing staff for nutrition and hydration via her gastrostomy tule.			
	A care plan, dated [DATE], was developed that included R#6 required nutrition via a gastrostomy tube related to dysphagia. The care plan included an intervention for nursing staff to obtain weights as indicated. A review of physician's orders revealed an order since [DATE] for weights monthly. However, there was no evidence that a weight was obtained as ordered and care planned for [DATE].			
	Review of the clinical record revealed an [DATE] Dietary Progress Note, from the RD, that identified a significant weight loss and possible incorrect weights for [DATE] and [DATE]. The dietary note documented an [DATE] weight of 161.3 pounds and an [DATE] weight of 185.2 pounds. With the 161.3-pound weight, the was a significant weight loss of 23.9 pounds in 90 days (12.9%). On [DATE], the RD recommended changes the gastrostomy tube nutritional supplement formula from Glucerna 1.2 at 45 ml per hour for 24 hours to Glucerna 1.5 at 45 ml per hour for 22 hours. There is no evidence that the [DATE] RD recommendation was acted on or the weight discrepancy addressed.			
	On [DATE], in a Dietary Progress Note, the RD documents that there is no [DATE] weight and docume the same concerns from her [DATE] dietary note, and again recommended to change the gastrostomy nutritional supplement formula order to address the weight loss. However, there is no evidence the [D/RD recommendations were acted on until [DATE], after further weight loss. A weight obtained on [DAT documented a further weight loss from 161.5 pounds on [DATE] to 154.6 pounds, a further loss of 6.9 pounds.			
		:00 p.m. R#6's physician confirmed tha y nursing staff and provided to him or t		
	Cross reference to F692			
	 Resident #14 resided at the facility since [DATE] and had diagnoses that included dementia with be disturbance, protein-calorie malnutrition, dysphagia, macular degeneration, osteoarthritis, ataxic gait, cognitive communication deficit, hypertension, iron deficiency anemia, generalized anxiety disorder, ar constipation. 			
	There was a care plan in place that R#14 had the potential for a nutritional problem. The care plan prot included that he was at risk for weight loss, had cognitive and communication impairments, was on a therapeutic diet, and required assistance with meals. The care plan included interventions for staff to pland serve his diet as ordered and weights per policy.

F 0657 Level of Harm - Immediate jeopardy to resident health or	Develop the complete care plan within 7 days of the comprehensive assessment; and prepared, reviewed, and revised by a team of health professionals. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 21213			
safety Residents Affected - Some		ew, the facility failed to ensure that carents (R#6 and R#8) from a total sample		
	On [DATE] a determination was made that a situation in which the facility's noncompliance with one or more requirements of participation had the likelihood to cause serious injury, harm, impairment, or death to residents.			
	The facility's Administrator and Director of Nursing (DON) LL were informed of the Immediate Jeopardy (IJ) on [DATE] at 1:55 p.m. The noncompliance related to the first IJ was identified to have existed on [DATE]. The noncompliance related to the second IJ was identified to have existed on [DATE].			
	1.) The first IJ is outlined as follows	S:		
	Resident (R) #5 was admitted to the facility on [DATE] and required bilateral below the knee amputations (BKA's) due to severe peripheral artery disease (PAD) with occlusion on [DATE]. Upon return from hospitalization status post bilateral BKA's on [DATE], the facility failed to clarify/obtain treatment orders for the surgical wounds. R#5 was diagnosed on [DATE] at the hospital emergency room with a wound infection to the left BKA. R#5 underwent a revision to the left BKA on [DATE] and returned to the facility the same day The facility again failed to clarify/obtain treatment orders on return from the hospital on [DATE]. There was no evidence of wound care being provided from [DATE] through [DATE]. In addition, the left BKA revision site was not accurately assessed by nursing staff on hospital return and a scheduled follow up appointment with the surgeon was not kept on [DATE]. The resident expired at the facility on [DATE]. The death certificat listed diabetes as the cause of death.			
	2.) The second IJ is outlined as foll	ows:		
	R#10, a [AGE] year-old resident with a diagnosis of cerebral palsy was dependent on staff and received a nutrition and hydration through a gastrostomy tube (g-tube). Weights for R#10 trended down from 89 pour on [DATE] to 83 pounds on [DATE], despite repeated increases of bolus g-tube nutritional supplement formula. The last increase was on [DATE]. There was no evidence that a documented plan from the Nurse Practitioner (NP) on [DATE] for a follow-up weight and Registered Dietician (RD) evaluation in two weeks was followed. However, a nutritional assessment was completed on [DATE] when the RD acknowledged there was no [DATE] weight but indicated that the ordered nutritional supplement formula and water flush met the resident's needs. Despite R#10's downtrend of weight, even with incremental increases in the nutritional supplement formula, no weight was obtained, to continue to monitor his progress, after [DATE] until [DATE]. On [DATE], a weight of 75.8 pounds was documented. There is no acknowledgement of the [DATE] weight of 75.8 pounds, which reflects actual, further significant weight loss. On [DATE] there was physician's order for biweekly weights (between ,d+[DATE] and [DATE]), and if weight decreased, resum continuous nutritional supplement feedings via g-tube. However, no weights were obtained between [DATE] through [DATE], except when surveyor inquired on [DATE].

(X4) ID PREFIX TAG	FIX TAG SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		on)
F 0657 Level of Harm - Immediate jeopardy to resident health or safety	In addition, during an observation on [DATE] at 3:30 p.m., Licensed Practical Nurse (LPN) BB administered the incorrect amount of bolus g-tube formula to R#10 (administered 237 milliliters instead of 320 milliliters). Review of the Medication Administration Records (MAR) revealed no evidence that the physician ordered bolus nutritional supplement formula was administered as scheduled for 28 times in [DATE] and 27 times in [DATE].		
Residents Affected - Some	There was also repeated, systemic failure to implement pertinent interventions to address weight loss and/or nutrition and hydration risk for five residents (R#6, R#8, R#12, R#13, and R#14). R#6 and R#8 received nutrition and hydration via gastrostomy tube. R#12, R#13 and R#14 received nutrition and hydration orally.		
	There was also evidence of a systemic failure related to dietary services to ensure that there was an adequate number of dietary staff and that the dietary staff had the skill set to carry out the functions of the food and nutrition services in the facility. Dietary staff failed to follow menus and individualized food plans for correct portion size to ensure residents' nutritional needs were met. R#12 and R#14 were to receive double portions of food because they were nutritionally compromised. By not receiving double portions, they were put at risk for further weight loss and/or poor nutritional status.		
	The Immediate Jeopardies were re	elated to the facility's noncompliance with	th the requirements at
	42 C.F.R. 483.21(b)(1) Develop/Implement Comprehensive Care Plan (F656, Scope/Severity: K); 42 C.F.R. 483.21(b) Comprehensive Care Plans (F657, Scope/Severity: K); 42 C.F.R. 483.25 Quality of Care (F684, Scope/Severity: J); 42 C.F.R. 483.25(g)(1)(2) Nutrition/Hydration Status and Maintenance (F692, Scope/Severity: K); 42 C.F.R. 483.60(a)(3) Sufficient Dietary Support Personnel (F802, Scope/Severity: K); 42 C.F.R. 483.60(c)(,d+[DATE]), Menus and Nutritional Adequacy (F803, Scope/Severity: K); 42 C.F.R. 483.70 Administration (F835, Scope/Severity: K); 42 C.F.R. 483.70(d) Governing body (F837, Scope/Severity: K); 42 C.F.R. 483.75(g)(2) QAPI/QAA Improvement Activities (F867, Scope/Severity: K).		
	Additionally. Substandard Quality of Care (F684, Scope/Severity: J); an (F692, Scope/Severity: K).	of Care was identified with the requirem d 42 C.F.R. 483.25(g)(1)(2), Nutrition/F	ents at 42 C.F.R. 483.25 Quality of Hydration Status and Maintenance
	At the time of exit on [DATE], the I	J remained ongoing.	
	Findings include:		
	Resident #6 was admitted to the facility on [DATE] and had diagnoses that included basal ganglia bleed, tracheostomy and gastrostomy tube placement, respiratory failure, dysphagia, left hemiparesis, Lupus, Cerebrovascular Accident (CVA), seizures and chronic kidney disease (CKD). Further review of the clinical record revealed that R#6 was dependent on nursing staff for nutrition and hydration via her gastrostomy tube.		
	Quarterly Minimum Data Set (MDS) assessments, dated [DATE] and [DATE] were completed by nursing staff. The assessments both documented no significant weight loss of 5% or more in a month or 10% or more in six months. A significant weight loss was identified between the two MDS assessments in an [DAT RD assessment. However, the comprehensive care plan was not revised to include R#6's significant weigh loss.

F 0657 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Some	was a significant weight loss of 23.9 pounds in 90 days (12.9%). The RD recommended changes gastrostomy tube nutritional supplement formula from Glucerna 1.2 at 45 ml per hour for 24 hours.			
	nutritional supplement formula orde	G		
	A weight obtained on [DATE] docu pounds, a further loss of 6.9 pound	mented a further weight loss from 161. ls.	5 pounds on [DATE] to 154.6	
	2. Resident #8 was admitted to the facility on [DATE] and had diagnoses that included history of respirate failure, pneumonia, dysphagia, encephalopathy, cerebral infarction, atherosclerotic heart disease, hypertension, heart failure, gastroesophageal reflux disease, anemia, contractures, hemiplegia affecting non-dominant side, protein-calorie malnutrition, diabetes, and aphasia. A review of the clinical record revealed that R#8 received all nutrition and hydration via gastrostomy tube.			
	A Quarterly Minimum Data Set (MDS) assessment, dated [DATE] and an Annual MDS assessment, dated [DATE] were completed by nursing staff. The assessments both documented a significant weight loss of 5 or more in a month or 10% or more in six months. However, the comprehensive care plan was not revised include R#8's significant weight loss. The Registered Dietician assessed R#8 on [DATE] and documented in a Dietary Progress Note that he triggered for a severe weight loss. His BMI at 136.6 pounds was 18.5 (normal). The notes included the weight fluctuation from 148 pounds on [DATE] to 165 pounds on [DATE] to 136.6 pounds on [DATE]. The RD recommended weekly weights for four weeks to determine accurate weight. The NP documented weight loss on [DATE] and included a plan to continue the current gastrostomy tube feedings and water flushes and weights weekly. The RD assessed R#8 again on [DATE] and documented a Dietary Progress Note, a [DATE] weight of 134.2 pounds and calculated the BMI at 18.2 (now underweig and 11.1% weight loss in 180 days. The RD recommended increasing the gastrostomy tube nutritional supplement formula from Osmolite 60 ml per hour to 70 ml per hour. Further review of the clinical record revealed that the RD recommendation to increase the Osmolite was ordered on [DATE]. Additional weights obtained for [DATE] and [DATE]: ,d+[DATE] (135.8), ,d+[DATE] (135.9), and ,d+[DATE] (135.9) indicated R#8 remained within an underweight BMI of 18.4 (based off the [DATE] weight of 135.9#).			
	During an interview on [DATE] at 10:25 a.m. DON LL (as of [DATE]) stated that the facility's weight system was broken; the facility needed systems and education.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		ion)
F 0692 Level of Harm - Immediate jeopardy to resident health or safety	In addition to R#10's weight loss not being thoroughly monitored and addressed after [DATE] and R#10 being observed receiving the incorrect amount of nutritional supplement formula via gastrostomy tube, there was incomplete documentation of the 2cal nutritional supplement formula being administered during the time frame of significant weight loss.		
Residents Affected - Some	Review of the clinical record revealed #10's weights showed a decrease in weight from 83 pounds (on [DATE]) to 75.8 pounds (on [DATE]), despite an increase in 2cal nutritional supplement formula on [DATE]. A review of the [DATE] and [DATE] Medication Administration Records (MAR's) revealed multiple blank entries that did not document that the ordered feedings were administered as scheduled by licensed nursing staff. For [DATE], after the last increase in the 2cal nutritional supplement formula on [DATE], 28 of the 93 times the supplement was scheduled to be administered, were blank. For [DATE] of the 150 times the supplement was scheduled to be administered were blank.		
	During an interview on [DATE] at 3:00 p.m. R#10's weight loss from 83 pounds to 75.8 pounds was discussed with his physician. When the surveyor asked if there would be a reason R#10's weight wound decrease to 75.8 pounds even though his nutritional supplement formula was increased, the physician stated he did not know; he was not aware of anything new going on with R#10 and that R#10 was dependent (on staff) for nutrition and hydration. He further stated that a 9 % weight loss needed to be addressed and he would expect the facility to carry out the NP's orders for weights.		
	2. Resident #6 was admitted to the facility on [DATE]. A review of NP Notes revealed that R#6 was transferred to the facility for tracheostomy downsizing and had diagnoses that included basal ganglia bleed, tracheostomy and gastrostomy tube placement, respiratory failure, dysphagia, left hemiparesis, Lupus, Cerebrovascular Accident (CVA), seizures and chronic kidney disease (CKD). Further review of the clinical record revealed that R#6 was dependent on nursing staff for nutrition and hydration via her gastrostomy tube.		
	R#6 had a physician's order for a bolus of 120 ml of water to be administered every four hours via pump and gastrostomy tube from [DATE] through [DATE]. In further review of the clinical record, including physician's orders and MAR's there was also another bolus flush order for 150 ml of water every four hours, starting on [DATE]. Therefore, both bolus water flush orders (120 ml every four hours and 150 ml every four hours) would have been active at the same time, as of [DATE]. However, in reviewing the [DATE] MAR, the [DATE] water flush order (for 150 ml every four hours) was only initialed as being administered on [DATE] and [DATE]. After that the order is not initialed, by licensed nursing staff, on the MAR as being carried out. The 120 ml every four hours water flush order (ordered on [DATE]) is initialed as being completed for the month ([DATE]). After [DATE], the 150 ml every four hours water flush order does not appear on any more MAR's and the 120 ml water flush order stopped after [DATE].		
	On [DATE], the 120 ml every four hours bolus water flush order (ordered on [DATE]) was discontinued by the NP. A review of the order revealed an administrative note on the discontinued order that documented that the flush was discontinued and increased to 150 ml. However, no order for 150 ml of water was entered into R#6's electronic clinical record after [DATE], until after surveyor inquiry on [DATE], at which time, the [DATE] 150cc flush order was revised by licensed nursing staff and reappeared on the [DATE] MAR.

F 0692 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Some	On [DATE], in a Dietary Progress Note, the RD documented that there is no [DATE] weight and documented the same concerns from her [DATE] dietary note, and again recommended to change the gastrostomy tube nutritional supplement formula order to address the weight loss. However, there is no evidence the [DATE] RD recommendations were acted on until [DATE], after further weight loss. A weight obtained on [DATE] documented a further weight loss from 161.5 pounds on [DATE] to 154.6 pounds, a further loss of 6.9 pounds.			
		:00 p.m. R#6's physician confirmed tha y nursing staff and provided to him or t		
	In addition to there being no evidence of a bolus water flush being administered after [DATE] until surveyor inquiry on [DATE], and R#6 experiencing a significant weight loss and possible weight discrepancy that we not addressed timely, R#6 was observed on [DATE] to not be receiving water at the correct rate via gastrostomy tube. Review of the clinical record revealed a bolus water flush of 150 ml every four hours was ordered since [DATE]. However, during an observation on [DATE] at 10:30 a.m. the water flush rate was set incorrectly the gastrostomy pump at 40 ml per hour (which would be a total of 160 ml of water in four hours), not 150 every four hours as ordered.			
	3. Resident #8 was admitted to the facility on [DATE]. Review of the clinical record revealed R#8 had diagnoses that included history of respiratory failure, pneumonia, dysphagia, encephalopathy, cerebral infarction, atherosclerotic heart disease, hypertension, heart failure, gastroesophageal reflux disease, anemia, contractures, hemiplegia affecting left non-dominant side, protein-calorie malnutrition, diabetes, an aphasia. R#8 received all nutrition and hydration via gastrostomy tube.			
	Review of the clinical record revealed R#8 had a weight fluctuation from April to [DATE]. The [DATE was 148 pounds, the [DATE] weight was 165 pounds, and the [DATE] weight was 136.6 pounds. A Note entry on [DATE] documented addressing the notable weight increase from 148 pounds on [DATE] that the weight was taken twice to verify, and the resident would be weight for four weeks for accuracy. However, a review of the clinical records revealed no further weights a [DATE] until [DATE], at which time R#8's weight was 136.6 pounds.			
	During an interview on [DATE] at 2	:00 p.m. DON LL stated she was unabl	le to locate any additional weights.	
	The RD assessed R#8 on [DATE] and documented in a Dietary Progress Note that he triggered for a seven weight loss. His BMI at 136.6 pounds was 18.5 (normal). The notes included the weight fluctuation from 14 pounds on [DATE] to 165 pounds on [DATE] to 136.6 pounds on [DATE]. The RD recommended weekly weights for four weeks to determine accurate weight.			
	After the RD recommendation on [DATE] for weekly weights for four weeks, weights of 136.6 pounds on [DATE] and 134.2 pounds on [DATE] were documented. However, there was no evidence additional week weights were obtained until [DATE], at which time R#8 remained at 134.2 pounds.

F 0692 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Some	nutritional supplement formula from Osmolite 60 ml per hour to 70 ml per hour. Further review of the clinical record revealed that the RD recommendation to increase the Osmolite was ordered on [DATE].		
	4. Resident #14 was admitted to the facility on [DATE]. Review of the clinical record revealed R#14 had diagnoses that included dementia with behavior disturbance, protein-calorie malnutrition, dysphagia, macular degeneration, osteoarthritis, ataxic gait, cognitive communication deficit, hypertension, iron deficiency anemia, generalized anxiety disorder, and constipation.		
	R#14 had a physician's order since [DATE] for 120 ml of a house nutritional supplement to be administe three times daily. A review of the clinical record revealed a [DATE] Dietary Progress Note by the RD that documented a [DATE] weight of 118.2 pounds, BMI 20.3 (normal), a weight loss of 15.8 pounds in 90 da (11.8%), 17.6 pound weight loss in 180 days (13.1% severe weight loss) and that weight continued to tredown for 30 days. On [DATE] weight was 122 pounds and on [DATE] weight was 118.2 pounds. The not included that R#14 was fed by nursing staff at mealtime. The RD recommended to increase the house nutritional supplement to 120 ml four times daily.		
	However, further review of the clini the nutritional supplement for signif	cal record revealed no evidence that th ficant weight loss was addressed.	e RD recommendation to increase
	R#14 had a diet order since [DATE] that included a no added salt, mechanical soft texture, double por ground meat diet. However, during an observation on [DATE] at 12:20 p.m. R#14 was observed with a tray with single portions of beef stew, peppers and onions, cooked carrots, a roll and orange cream icc cream cup. During the observation, Certified Nursing Assistant (CNA) PP stated that she usually assis R#14 to eat and that he usually eats everything. During a subsequent interview on [DATE] at 12:05 p. CNA stated that R#14 ate 85% of his lunch meal on [DATE].		
	During an observation on [DATE] at 12:30 p.m. R#14 was again observed to have been served a lunch trawith only single portions of ground chicken, mixed vegetables, a biscuit, rice with gravy, apple crisp, and a orange cream ice cream cup.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0692 Level of Harm - Immediate jeopardy to resident health or safety	A review of monthly weights for R#14 in the clinical record since [DATE] revealed weights of 121.2 pounds on [DATE], 119 pounds on [DATE], and 119 pounds on [DATE]. An additional weight obtained on [DATE], after surveyor inquiry, reflected a further weight loss to 115.6 pounds.			
Residents Affected - Some	5. Review of the clinical record revealed R#12 was admitted to the facility on [DATE] diagnoses including bipolar disorder, unspecified protein-calorie malnutrition, chronic kidney disease, dysphagia, major depressive disorder with recurrent severe psychotic symptoms, heart failure, diabetes, anxiety, and adult failure to thrive.			
	The resident had a physician's orded	er since [DATE] for regular concentrate er.	d sweets diet, pureed texture with	
	However, during observations of the lunch meal on [DATE] at 12:26 p.m., and [DATE] at 1:00 p.m., R#12 was not served double portions. Observation of the diet card that was on the resident's lunch tray revealed the portion size was specified as double portion.			
	During an observation of the meal service tray line on [DATE] at 12:25 p.m., the dietary staff was observed serving only regular portions on the resident's plate. Although the dietary aide called out a puree diet to staff plating the food, she did not include double portions.			
	During an interview with Cook NN on [DATE] at 2:45 p.m., she was not aware the resident was supposed to have double portions.			
	Review of the 2021 Weight Record for R#12 revealed the following weights in pounds:			
	115, [DATE]- 115, [DATE]- 116, [D	[DATE]- 143, [DATE]-133, [DATE]- 128, [DATE]- 114, [DATE]- 116, [DATE]- 111, [DATE]- 114.6, [DATE]- 115, [DATE]- 115, [DATE]- 116, [DATE]- 119, [DATE]- 116, [DATE]- 113.6, [DATE]- 108, [DATE]- 105.2, no [DATE] weights, [DATE]- 97.8, and [DATE]- 96.		
	The resident was evaluated by the RD on [DATE], [DATE] and [DATE] who noted weight loss and a BMI of 21.9. There were no recommendations given and noted the resident was receiving double portions at lunch and supper and Med Pass 2.0 120 cubic centimeters (cc) three times a day.			
	The NP noted on [DATE] the resident had a gastrointestinal bleed with significant weight loss. She noted unexplained weight loss was worsening and continue Med Pass 120 cc three times a day. She further noted the resident was receiving double portions.			
	There was not a [DATE] RD evaluation for R#12. However, on [DATE] the RD noted a weight of 113.6 for [DATE] with a BMI of 21.5. She further calculated a 29.4-pound weight loss x 180 days (20.6% severe wt. loss) and recommended sugar free ice cream with lunch and supper.			
	ice cream, there was no evidence t	er review of the Physician Recommendation Sheet for R#12 dated [DATE] with the recommendation for the ecream, there was no evidence this was communicated to the physician as the recommendation was not sted on by noting either a reject or accept.

safety Residents Affected - Some	Nursing, and staff interviews, facilit	the Job Summary's for Nursing Home Ayy administration failed to effectively over I hydration via non-oral and oral routes	ersee the facility's nutrition system
	On [DATE] a determination was made that a situation in which the facility's noncompliance with one or requirements of participation had the likelihood to cause serious injury, harm, impairment, or death to residents.		
	The facility's Administrator and Director of Nursing (DON) LL were informed of the Immediate Jeopardy (IJ on [DATE] at 1:55 p.m. The noncompliance related to the first IJ was identified to have existed on [DATE]. The noncompliance related to the second IJ was identified to have existed on [DATE].		
	1.) The first IJ is outlined as follows	::	
	Resident (R) #5 was admitted to the facility on [DATE] and required bilateral below the knee amputation (BKA's) due to severe peripheral artery disease (PAD) with occlusion on [DATE]. Upon return from hospitalization status post bilateral BKA's on [DATE], the facility failed to clarify/obtain treatment orders the surgical wounds. R#5 was diagnosed on [DATE] at the hospital emergency room with a wound infet to the left BKA. R#5 underwent a revision to the left BKA on [DATE] and returned to the facility the sam The facility again failed to clarify/obtain treatment orders on return from the hospital on [DATE]. There we no evidence of wound care being provided from [DATE] through [DATE]. In addition, the left BKA revisisite was not accurately assessed by nursing staff on hospital return and a scheduled follow up appointr with the surgeon was not kept on [DATE]. The resident expired at the facility on [DATE]. The death cert listed diabetes as the cause of death.		
	2.) The second IJ is outlined as foll	ows:	
	nutrition and hydration through a ga on [DATE] to 83 pounds on [DATE] formula. The last increase was on a Practitioner (NP) on [DATE] for a for was followed. However, a nutritional there was no [DATE] weight but incomet the resident's needs. Despite Fourtritional supplement formula, no until [DATE]. On [DATE], a weight [DATE] weight of 75.8 pounds, while physician's order for biweekly weight continuous nutritional supplement for	ear-old resident with a diagnosis of cerebral palsy was dependent on staff and receive dration through a gastrostomy tube (g-tube). Weights for R#10 trended down from 89 p pounds on [DATE], despite repeated increases of bolus g-tube nutritional supplement tincrease was on [DATE]. There was no evidence that a documented plan from the Nt on [DATE] for a follow-up weight and Registered Dietician (RD) evaluation in two weed on the properties of the properties of the RD acknowledge and the remaining assessment was completed on [DATE] when the RD acknowledge and RTE] weight but indicated that the ordered nutritional supplement formula and water flut is needs. Despite R#10's downtrend of weight, even with incremental increases in the element formula, no weight was obtained, to continue to monitor his progress, after [DAT [DATE], a weight of 75.8 pounds was documented. There is no acknowledgement of the formula of the reflects actual, further significant weight loss. On [DATE] there were for biweekly weights (between "d+[DATE] and [DATE]), and if weight decreased, resultional supplement feedings via g-tube. However, no weights were obtained between [December 1] except when surveyor inquired on [DATE].

F 0837	At the time of exit on [DATE], the IJ remained ongoing.		
Level of Harm - Immediate jeopardy to resident health or	Findings include:		
safety Residents Affected - Some	A review of the facility policy titled Quality Assurance Performance Improvement Management dated [DATE] documented, in part, the following: Authority: The Governing Body of this facility shall be ultimately responsible for the QAPI Performance Improvement Program. The Administrator represents the Governing Body of this facility.		
	Review of the QAPI Committee Meeting Agenda/ Minutes revealed meetings held on [DATE], [DATE], [DATE], [DATE], [DATE], [DATE], and [DATE] with the Administrator present for all meetings except the [DATE] meeting. No other members of the governing body were present for any of the above meetings. During the [DATE] meeting, weights were discussed. However, there was no discussion regarding dietary staffing.		
	During interview and observation of the lunch meal service on [DATE] at 12:05 p.m., there were two did staff observed working in the kitchen. Cook NN stated they have been working with two dietary staff on day shift for the past three months. She stated three people would be better because they have to prep cook, serve and clean. She stated they also have been without a Dietary Manager for three months. She stated corporate told them two was enough to work in the kitchen. She stated since they have been with Dietary Manager, she must place the food orders, do the schedule, print tray cards and cook. Registered Dietician MM stated on [DATE] at 12:15 p.m. that ideally, they need three staff in the kitche especially since Cook NN has been acting as the Dietary Manager and having to order food.		
	During an interview with the Administrator on [DATE] at 3:10 p.m. and 3:35 p.m., he stated when he started employment at the facility in [DATE], the kitchen was already staffed with two people. He stated the kitchen staff have not complained to him about only having two people in kitchen and did not know who from corporate told them they could only have two staff in the kitchen.		
	During an interview with Dietary Aide RR on [DATE] at 1:00 p.m., she stated corporate told them about three months ago that two people were enough to work in the kitchen on day shift. She stated day shift has to do breakfast and lunch and wash dishes and that it was just too much. At times they don't have time to make dessert for lunch or supper. She stated she has talked to the Administrator about it several times and he tells her just work with me, I'm trying to get people in.
