	Findings include:		
	Resident #25 admitted to the Facility in 1/2019 with diagnoses which included Alzheimer's Disease, dementia with behavioral disturbance, psychotic disorder with delusions.		
		n Data Set (MDS), dated [DATE], indicastance to move both on and off the nu	
	that Resident #25 had a history of a	ent Evaluation, completed 1 year and 5 actual elopement or attempted elopement t risk of getting to a potentially dangero	ent, and had a history of wandering
		are for risk for elopement related to cog it indicated an intervention was initiated e is not attempting to leave.	
	Review of the nurses note written on 7/6/21 at 12:13 A.M., indicated that Resident #25 had been agitated since the morning of 7/5/21, saying somebody stole his/her child. Reassurance and redirecting done with little or no effect. He/she eloped through the back door and had an unwitnessed fall. Transferred out to the hospital for further evaluation.		
	During an interview on 7/7/21, at 12:35 P.M., Unit Manager #1 said that 15 minute checks were initiated whenever Resident #25 became agitated. The checks were documented on 15 minute check forms and kept in the resident record. She reviewed the medical record with the surveyor and was unable to locate a 15 minute check sheet for 7/5/21.		
	During a phone interview on 7/7/21, at 1:30 P.M., Certified Nursing Assistant (CNA) #2 said that on 7/5/21, Resident #25 had been agitated the entire 3-11 shift, attempting to get on the elevator to leave. She said no one was assigned to watch Resident #25, but everyone knows he/she can't be left alone when he/she is agitated like that. CNA #2 said that just after 9:30 P.M. she needed to provide care to another resident and left Resident #25 being supervised by Nurse #2. CNA #2 said that when she came out of the room she could hear Resident #25 yelling for help so she began searching room to room and was not able to locate him/her. CNA #2 said she finally looked in the stairway next to room [ROOM NUMBER] and saw Resident #25 at the bottom of the stairs and yelled for help.

F 0880	Provide and implement an infection prevention and control program.				
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40928				
Residents Affected - Few	Based on observation, interview, and policy review the facility failed to ensure infection control practices for catheter care were maintained in accordance with facility policy for 1 Resident (#28) out of a total sample of 27 residents.				
	Findings include:				
	Review of facility policy titled 'Cathe	eter: Indwelling Urinary- Care of, revise	ed 6/01/21, indicated the following:		
	-Secure catheter tubing to keep the drainage bag below the level of the patient's bladder and off the floor. Resident #28 was admitted to the facility in June 2017 with diagnoses including cerebellar stroke syndrome, muscle weakness, and obstructive uropathy. Review of Resident #28's Minimum Data Set assessment dated [DATE] indicated the resident had an indwelling catheter and required extensive assistance with care activities. On 6/30/21 at 9:41 A.M., Resident #28 was observed in bed with his/her catheter bag on the floor of his/her room.				
	On 7/01/21 at 9:46 A.M., Resident #28 was observed in bed with his/her catheter bag on the floor of his/her room. On 7/01/21 at 3:31 P.M., Resident #28 was observed in bed with his/her catheter bag under the bed on the floor of his/her room.				
	During an interview on 7/01/21 at 3:43 P.M., Nurse #1 said that for infection control purposes, a catheter bag should not be on the floor.				
	During an interview on 7/01/21 at 3:52 P.M., Unit Manager #1 said that the catheter bag should not be on the floor.				
	During an interview on 7/01/21 at 4 always be off the floor.	:51 P.M., The Director of Nursing said	that the catheter bag should
