NAME OF PROVIDER OR SUPPLIER Coastal Health and Rehabilitation Center		STREET ADDRESS, CITY, STATE, ZIP CODE 1530 Broad Ave Gulfport, MS 39501	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0656</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>Develop and implement a complete care plan that meets all the resident's needs, with timetables and actions that can be measured.</p> <p>43283</p> <p>Based on observation, interview, record review, and facility policy review, the facility failed to implement comprehensive care plan interventions related to the use of a mechanical lift and for Pressure Ulcers (PU) for five (5) of 12 care plans reviewed. (Resident #2, Resident # 4, Resident #5, Resident #6, and Resident #7).</p> <p>The facility did not implement the care plan intervention for a two-person transfer during a mechanical lift when the State Agency (SA) observed Certified Nurse Aide (CNA) #1 using a full body mechanical lift with Resident #2 suspended midair in a sling, without two persons. The facility also did not implement care plan interventions for treatments as ordered and assessed for PUs for Resident #4, Resident #5, Resident #6, and Resident #7.</p> <p>The facility's failure to implement care plan interventions placed these residents and other residents at risk, in a situation that was likely to cause serious harm, injury, impairment, or death.</p> <p>The situation related to the CNA using a mechanical lift without the required staff assistance was determined to be an Immediate Jeopardy (IJ) that began on 2/23/23 when the State Agency (SA) observed CNA #1 using the mechanical lift without the required number of staff. The facility Administrator was notified and presented an IJ template on 2/23/23 at 1:45 PM.</p> <p>The facility provided an acceptable Removal Plan on 2/24/23, in which they alleged all corrective actions to remove the IJ were completed and the IJ removed on 2/24/23. The SA validated the Removal Plan on 2/27/23 and determined the IJ was removed on 2/24/23.</p> <p>The SA received additional complaints on 2/27/23 and re-entered the facility on 2/28/23 to extend the survey. The SA identified that the facility did not implement care plan interventions for treatments as ordered and assessments for PUs for Resident #4, Resident #5, Resident #6, and Resident #7.</p> <p>The situation related to care plan interventions not implemented for PU treatments and assessments was determined to be an IJ that began on 2/7/23 when the facility's treatment nurse resigned which led to PU treatments and wound assessments being inconsistently performed and documented.</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>Due to additional identification of IJ, the SA notified the Administrator that the IJ Template dated 2/23/23 and the Removal Plan dated 2/24/23 were being rescinded. The facility Administrator was notified of the IJ and presented a revised IJ Template on 3/2/23 at 5:10 PM. The facility provided an acceptable Removal Plan on 3/4/23, in which they alleged all corrective action to remove the IJ were completed and the IJ removed on 3/3/23.</p> <p>The SA validated the Removal Plan on 3/6/23 and determined the IJ was removed on 3/3/23, prior to exit. Therefore, the scope and severity for CFR 483.21 (b) (1) Comprehensive Care Plans was lowered from a K to an E, while the facility develops a plan of correction to monitor the effectiveness of the systemic changes to ensure the facility sustains compliance with regulatory requirements.</p> <p>Findings include:</p> <p>Review of the facility's Policies and Procedures with the Subject: Plans of Care, revised 9/25/2017 revealed, . An individualized person-centered plan of care will be established by the interdisciplinary team (IDT) with the resident and/or resident representative(s) to the extent practicable and updated in accordance with state and federal regulatory requirements .Procedure .Develop and implement an individualized Person-Centered comprehensive plan of care by the Interdisciplinary Team .</p> <p>Resident #2</p> <p>A record review of the Comprehensive Care Plan for Resident #2 revealed a Focus of, (Proper Name of Resident #2) has self-care deficit R/T (related to) limited mobility - osteoarthritis (OA), Dementia and had Interventions including, Transfers - Total X2 and Hoyer Lift to be used for transfers.</p> <p>On 02/23/23 at 11:50 AM, during an observation, CNA #1 was operating a mechanical lift in the hallway with Resident #2 in a full body sling suspended midair, without assistance from another staff member.</p> <p>Resident #4</p> <p>Record review of the Comprehensive Care Plan for Resident #4 revealed a Focus of (Proper Name of Resident #4) was admitted with stage 4 pressure ulcer to sacrum, SDTI (Suspected Deep Tissue Injury) to tip of right 2nd toe, and arterial wound to lateral aspect of right foot r/t disease process . and had Interventions including Administer treatments as ordered to stage IV (4) sacrum, SDTI 2nd toe, and rt (right) heel wound and Assess/record/observe wound healing. Measure length, width, and depth where possible. Assess and document status of wound perimeter, wound bed, and healing progress. Report improvements and decline to the MD (Medical Doctor)/health care provider.</p> <p>Record review of the Order Summary Report with Active Orders As Of 02/28/2023 revealed Resident # 4 had a Physician's Order dated 11/17/22 for Acetic Acid Solution o.25% Apply to sacrum topically every day shift for sacrum.</p> <p>A record review of the electronic Treatment Administration Record for 2/1/23 through 2/28/23 revealed the treatment to the sacrum had 20 missed treatments.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>On 2/23/2023, at 2:00pm, an Ad Hoc QAPI Committee met to conduct Root Cause Analysis (RCA) and create Removal Plan for Immediate Jeopardies received regarding F 656 -Develop / Implement Comprehensive Care Plan, F 684 Quality of Care and F 689 - Accidents / Supervision. Attendees were ED, DON, Maintenance Director, DOR, ADON / ICP, BOM, HRD, MD attended by phone. A review of policy and procedures were: Care Plan, Transfer / Mobility Evaluation Low Lift, Anticoagulant Therapy, Notification of Change in condition which required no changes. Reviewed policy and procedure Maintenance with changes made in the notification procedure to implement maintenance repair request form. Topics discussed include: reeducate all staff on notification to Maintenance or Administrator when bed not working properly, Maintenance director to check all beds to ensure working properly, all staff to notify nurse if blood is observed, bandage noted with blood, bandage not intact and nurse to properly assess resident for adverse reactions, Licensed Nurses to assess residents for active bleeding and address any adverse outcomes for residents on anticoagulant therapy, reeducate nursing staff for transferring resident in full body lift, reeducate nursing staff to follow care plan that reflects specific resident needs related to full body lifts, review and revise if indicated residents transfer / mobility status, review and revise if indicated eMAR for assessing resident for signs and symptoms regarding anticoagulant therapy.</p> <p>F 689, RCA determined the facility failed to properly identify an improper working bed with foot board not properly fitting bed due to staff failure of notification and additional need for education. All staff need additional training on how to report beds not properly working. RCA determined the facility failed to prevent possibility of injury by using full body sling with only one staff member, due to certified nurse assistant #1 failure to follow facility lift policy.</p> <p>F 684, RCA determined the facility failed to assess Resident #1 for four hours knowing there was blood on the floor, bandages not intact and saturated with blood, did not reassess after reporting the blood with resident on anticoagulant. RCA determined additional needs for education to all staff on notifying nurse of change in condition. RCA determined LPN #1 did not reassess for active bleeding and address the care related to resident on anticoagulant therapy and was educated by RN #1 on 02/22/2023 at 2:30 PM on Anticoagulant Therapy related to reassessing for active bleeding and addressing the care related to resident on anticoagulant therapy.</p> <p>F 656, RCA determined the facility failed to properly follow Resident #2's care plan for a full body lift with two staff members to prevent the likelihood of a serious outcome by having resident dangling midair in the lift out in the hallway with no other staff members around. RCA determined Certified Nursing Assistant (CNA) #1 failed to follow facility policy and procedure related to care plan and received a corrective termination action on 02/23/2023 at 12:30 PM.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>F 686, RCA determined the facility failed to provide routine and consistent wound care, wound assessments, and wound documentation put Resident #4, Resident #5, Resident #6, and Resident #7 and all other residents who are at risk for skin breakdown at risk for serious harm, serious injury, serious impairment, or possible death. The facilities failure to implement care plan interventions related to wound care put Resident #4, Resident #5, Resident #6, and Resident #7 and all other residents who are at risk for skin breakdown at risk for serious harm, serious injury, serious impairment, or possible death. RCA determined the facility failed to have proper documentation and assessment of wounds, designated wound care nurse, complete admission body audit. RCA determined facility failed to implement new interventions related to wounds. Facility did hire new Licensed Practical Nurse three (3) weeks ago.</p> <p>Assessment</p> <p>On 2/22/23 at 1:30 PM Registered Nurse Treatment Nurse assessed Resident #1 right lateral foot with findings of a skin flap. Resident #1's bandages were changed and treatment completed following physician orders on 02/22/2023 by RN Treatment Nurse.</p> <p>On 02/22/2023 at 2:10 PM, Resident #1 was assessed by RN #1 for active bleeding and addressed the care related to resident on anticoagulant therapy.</p> <p>On 02/23/2023 at 2:10 PM, Resident #2 was assessed and a body audit was completed by RN #2 with no negative outcomes.</p> <p>On 02/23/2023 at 2:15 PM, a total of twenty-nine (29) residents were identified on anticoagulant therapy by RN #1. Resident assessments were completed by RN #2, RN #3, and RN #4 for any active or new change in conditions for residents on anticoagulant therapy. No residents at risk identified.</p> <p>On 2/23/2023, Maintenance Director completed audit of all beds for functionality. 124 beds were checked with two (2) identified with motor not working and no issues with footboard not fitting properly. Both beds identified with motor not working were replaced.</p> <p>On 2/23/2023, RN#10, completed Transfer / Mobility Status Criteria for forty-nine (49) residents identified as needing full body lift transfer.</p> <p>On 3/02/23 at 10:00 AM, Resident #4, Resident #5, and Resident #6 are currently not in the center and unable to be assessed. Resident #4, Resident #5, and Resident #6 did not have assessments completed related to a skin audit prior to leaving the center and are still out of the center as of 03/03/2023.</p> <p>On 3/02/2023, RN#10 and LPN#2 reviewed Care Plans for seventeen (17) resident with skin concerns and sixty-one (61) residents at risk for skin concerns per the Braden Scale. Three (3) Care Plans were updated for residents with skin concerns.</p> <p>On 3/2/2023, RN#1 completed Wound - Weekly Observation Tools for seventeen (17) residents with a total of thirty-five (35) wounds.</p> <p>Education</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>On 02/22/2023 at 2:30 PM, RN #1 initiated education to LPN #1 on Anticoagulant Therapy related to reassessing for active bleeding and addressing the care related to resident on anticoagulant therapy.</p> <p>On 02/23/2023 at 2:20 PM, RN #1 initiated education to licensed nurses to properly assess residents for active bleeding and address the care for adverse outcomes related to residents on anticoagulant therapy. No current licensed nurses or newly hired licensed nurses will work without the aforementioned education.</p> <p>On 02/23/2023 at 2:25 PM, RN #1 initiated education to all staff to notify a nurse if blood is observed, bandage noted with blood, and bandage not intact to properly address the resident care for adverse outcomes. No current staff or newly hired staff will work without the aforementioned education.</p> <p>On 02/23/2023 at 2:25 PM, RN #1 initiated education to nursing staff ensuring to follow the comprehensive care plans to reflect specific resident needs related to full body lifts. No current licensed nurses or newly hired licensed nurses will work without the aforementioned education.</p> <p>On 02/23/2023 at 2:30 PM, the ED/RN #1 initiated education to all staff regarding notification and identification of improper working bed with foot board fitting the bed to prevent injuries. No current staff or newly hired staff will work without the aforementioned education.</p> <p>On 2/23/2023 at 2:30, RN #1 initiated education on mechanical lift transfers and the need for two (2) staff members to assistance. No current nursing staff or newly hired nursing staff will work without the aforementioned education.</p> <p>On 03/02/2023 at 6:00 PM, the ED/RN #1 initiated education to all nurses regarding wound identification and treatment to include, admission/readmission body audit, completing Braden scale assessment, notifying provider for treatment if wound is identified, completing treatment as ordered if treatment nurse is not available, ensure documentation is completed on electronic treatment administration record (eTAR), and completing weekly skin checks. No current licensed nurses or newly hired licensed nurses will work without the aforementioned education.</p> <p>On 03/02/2023 at 6:05 PM, the ED/RN #1 initiated education with Certified Nurse Assistants (CNAs) regarding nurse notification if a skin concern is identified and following chain of command if nurse is unavailable. No current CNA or newly hired CNA will work without the aforementioned education.</p> <p>On 3/02/2023 at 6:10 PM, education with MDS RN and MDS LPN was initiated by the ED/RN #1 to ensure comprehensive care plan interventions are implemented for residents with current pressure ulcer wounds and resident who are at risk for skin breakdown. No current MDS licensed nurses or newly hired MDS licensed nurses will work without the aforementioned education.</p> <p>Corrective Action</p> <p>On 02/23/2023 at 12:30 PM, CNA #1, was removed from floor and corrective termination action by RN #1 related to not following facility policy and procedures related to not properly following Resident #2's care plan for a full body lift with two staff members.</p> <p>On 2/22/23 at 2:00 PM, the Maintenance Assistant changed out Resident #1's bed to ensure the resident was in a working bed to prevent a hazard to the resident's feet.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0684</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Few</p>	<p>43283</p> <p>Provide appropriate treatment and care according to orders, resident's preferences and goals.</p> <p>Based on observation, interviews, record review, and facility policy review, the facility failed to promptly assess a resident for bleeding for one (1) of three (3) residents reviewed on anticoagulant medications (blood thinners) for Resident #1, out of a total of 28 residents who receive medications to thin the blood and failed to ensure residents with non-pressure wounds had consistent assessments, treatments, documentation, and Physician's Orders were followed for one (1) of four (4) residents reviewed for other skin conditions. (Resident #5).</p> <p>The facility's failure to promptly assess Resident #1, who was prescribed an anticoagulant (medication group that decreases the blood's ability to clot) for approximately four (4) hours after a Licensed Practical Nurse (LPN) observed him with bandages to both feet that were not intact and were saturated with blood and observed blood on the floor of his room, put Resident #1 and other residents on anticoagulant medications at risk of bleeding, in a situation that was likely to cause serious harm, injury, impairment, or death. The facility's failure to provide routine and consistent wound care, wound assessments, Physician's Orders, and wound documentation put Resident #5 and all other residents with wounds at risk for skin breakdown at risk for serious harm, injury, impairment, or death.</p> <p>The situation was determined to be an Immediate Jeopardy (IJ) that began on 2/7/23 when the facility's treatment nurse resigned and was not replaced, which led to wound treatments and assessments being inconsistently performed and documented.</p> <p>The facility Administrator was notified of the IJ on 2/23/23 at 1:45 PM. The facility provided an acceptable Removal Plan on 2/24/23, in which they alleged all corrective actions to remove the IJ were completed and the IJ removed on 2/24/23.</p> <p>The State Agency (SA) validated the Removal Plan on 2/27/23 and determined the IJ was removed on 2/24/23, prior to exit.</p> <p>Due to additional identification of IJ, the SA notified the Administrator that the IJ Template dated 2/23/23 and the Removal Plan dated 2/24/23 were being rescinded. The facility Administrator was notified of the IJ and presented a revised IJ Template on 3/2/23 at 5:10 PM. The facility provided an acceptable Removal Plan on 3/4/23, in which they alleged all corrective action to remove the IJ were completed and the IJ removed on 3/3/23.</p> <p>The SA validated the Removal Plan on 3/6/23 and determined the IJ was removed on 3/3/23, prior to exit. Therefore, the scope and severity for CFR 483.25 Quality of Care was lowered from a J to a D, while the facility develops a plan of correction to monitor the effectiveness of the systemic changes to ensure the facility sustains compliance with regulatory requirements.</p> <p>Findings include:</p> <p>Review of the facility's policy, Anticoagulant Therapy, revised 1/11/2019, revealed, Procedure .Monitor the resident for signs of bleeding .use pressure-dressing PRN (as needed) until bleeding stops .document in the medical record .</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0684</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Few</p>	<p>Review of the facility's policy Skin and Wound with a revision date 01/24/2021 revealed, Policy: To provide a system for identifying risk, and implementing resident centered interventions to promote skin health, prevention, and healing of pressure injuries. Process: Pressure Injury Prevention: 1. Resident's skin will be evaluated upon admission/re-admission and documented in the medical record. 2. Nurse to complete skin evaluation and document in the medical record. 3. CNA (Certified Nurse Aide) to complete skin observations and report changes to nurse .Skin Impairment Identification: 1. Document presence of skin impairment(s)/new skin impairment(s) when observed. 2. Nurse to report changes in skin integrity to the physician/physician extender, resident/resident representative and document in the medical record .4. Monitor residents' response to treatment, modify as indicated .</p> <p>Resident #1</p> <p>At 12:20 PM on 02/22/23, during an interview and observation, Resident #1 was lying in bed, the mattress was approximately 12 inches shorter than the footboard, and the resident's right foot was in the gap, wedged between the footboard and the bed frame. There was an area of dried blood on the side of the bed that was approximately the size of a golf ball. Resident #1 had wound bandages to both feet that were loose, not intact and both bandages were saturated with blood. He explained he had wounds to his heel and under his feet. Resident #1 reported that a housekeeper came into his room earlier in the morning to clean up the blood that had gotten on the floor from his feet, but no one had come and looked at his bandages or checked on him.</p> <p>On 02/22/23 at 12:30 PM, during an interview with Licensed Practical Nurse (LPN) #3, she explained that when she was on her medication pass around 8:00 AM, she noticed Resident #1's bandages were bloody and loose, and that there was blood on the floor. She explained she notified the housekeeper to clean the blood from the floor and Registered Nurse (RN) #11 that the resident's bandages needed to be changed, but she did not follow up to check on the resident or to ensure the bandages were changed.</p> <p>On 02/22/23 12:40 PM, during an interview with Housekeeper #1, she explained that at approximately 8:30 AM, LPN #3 was giving Resident #1 his medications and had noticed blood on the floor. LPN #3 advised Housekeeper #1 to wear shoe covers in the resident's room to clean up the blood. Housekeeper #1 stated that she cleaned the blood off the floor, and she also noticed the resident had bandages to both feet that were covered with blood, with one of the bandages hanging loosely on his foot. She said she told LPN #3 that the resident continued to have blood on his bandages.</p> <p>On 02/22/23 at 12:50 PM, during an interview with CNA #2, she explained she was informed by LPN #3 earlier that morning that Resident #1 had blood on the floor and to be careful when going into his room. She explained she had noticed bloody areas on the resident's floor and that there were bloody bandages that were loose and coming off his feet. She confirmed he still had the same bloody bandages on his feet now that she had noticed earlier that morning. She also confirmed there was blood on his floor.</p> <p>On 02/22/23 at 1:30 PM, in an observation and interview with RN #11, she assessed Resident #1's right foot and stated he had a laceration flap to the lateral side that measured 5.5 centimeters (cm) x 3.0 cm. There was a large amount of dried blood noted around the laceration and down the lateral side of the right foot.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0684</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Few</p>	<p>On 02/22/23 at 1:50 PM, during an interview with Resident #1, he explained he had cut his foot on the bed frame or the footboard, but he was unable to recall exactly when because he cannot feel his feet very much and he cannot tell if his feet are hurting.</p> <p>A record review of the Admission Record revealed the facility admitted Resident #1 on 11/01/2020 with diagnoses including Paroxysmal Atrial Fibrillation, Chronic Embolism and Thrombosis of Other Specified Veins, and Type 2 Diabetes Mellitus.</p> <p>A record review of the Quarterly Minimum Data Set (MDS) with an Assessment Reference Date (ARD) of 1/6/23, revealed Resident #1 had a Brief Interview for Mental Status (BIMS) score of 15, which indicated he was cognitively intact. Further review of Section M revealed Resident #1 received an anticoagulant medication.</p> <p>A record review of the Order Summary Report with Active Orders As Of: 02/23/2023, revealed a Physician's Order for Rivaroxaban (Generic Name for Xarelto) 20 MG (Milligrams) one table by mouth at bedtime.</p> <p>On 02/23/23 at 09:40 AM, during an interview with the Assistant Director of Nursing (ADON), he reported he would expect a nurse who had observed a resident with bloody bandages to check for bleeding, stop the bleeding, and notify him, a supervisor, treatment nurse, and if needed, the Nurse Practitioner.</p> <p>On 02/23/23 at 09:55 AM, during an interview with the Administrator, she explained that if a resident had blood on the floor and had bloody bandages, she would expect her staff to notify the resident's nurse and then the nurse notify the ADON or the Director of Nursing (DON) after changing the dressing or notifying the treatment nurse.</p> <p>On 02/23/23 at 11:20 AM, during an interview with LPN #3, she stated the mattress has not fit the resident's bed for a long time. She also said that on 02/22/23, she asked a CNA (couldn't recall which one) to tell the treatment nurse about the condition of Resident #1's bandages because she was busy on her medication pass. She reported she had seen the wound care nurse going down the hallway and thought she was going to check on Resident #1 and that is why she never followed up regarding his bleeding. She confirmed Resident #1 is currently on Xarelto which is an anticoagulant medication. She confirmed that she should have addressed Resident #1's wound yesterday (02/22/23) morning and should have checked him for active bleeding since the bandages were saturated in blood and there was blood on the floor.</p> <p>At 03:15 PM on 02/23/23, during an interview with the Director of Nursing (DON), she stated she expects when a resident is seen to have bloody, loose bandages, the nurse who had knowledge would clean the wound and assess the resident for active bleeding, especially if resident is on anticoagulant medication. The physician or nurse practitioner should be notified, and the wounds rewrapped.</p> <p>Resident #5</p> <p>At 11:45 AM on 02/28/23, during an interview with CNA #15, she explained Resident #5 was in the hospital, but she had provided care to Resident #5 while he was at the facility. She stated that he a bad wound on his back side and there was a large amount of drainage and an odor. She said that she had reported to the ADON and the DON several times regarding the increased drainage and odor.</p> <p>(continued on next page)</p>

<p>F 0684</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Few</p>	<p>Record review of the Progress Notes Details, dated 2/17/23, completed by Wound Care Nurse Practitioner (WCNP), .Right Great Toe .Full Thickness .Burn .Not Healed. Initial wound encounter measurements are 1. 95cm length x 1.43cm width .There is a small amount of sero-sanguineou drainage noted which has no odor. Wound bed has 51-75% granulation, 1-25% slough, 1-25% eschar .Wound Orders .Silver Alginate - Maxsorb or Durafiber every other day and prn .</p> <p>Review of the medical record revealed the wound care orders dated 2/17/23 by the WCNP were not executed by the facility.</p> <p>Resident #5 Right Lateral Lower Leg</p> <p>Record review of the Order Recap Report, with order dates from 2/1/23 through 2/28/23, revealed there were no Physician's Orders for treatment to the Right Lateral Leg.</p> <p>Record review of the Progress Notes Details, dated 2/17/23, completed by Wound Care Nurse Practitioner (WCNP), .Right, Lateral Lower Leg .Full Thickness Trauma Wound .Not Healed .4.85cm length x 2.61cm width x 0.1 cm depth .There is a Moderate amount of sero-sanguineous drainage noted which has no odor. Wound bed has 76-100% granulation, 1-25% slough .Wound Orders .Pack wound with Acetic Acid 0.25% . Every day for 15 days .</p> <p>Review of the medical record revealed the wound care orders dated 2/17/23 by the WCNP were not executed by the facility.</p> <p>Review of the medical record for Resident #5 revealed there were no weekly wound assessments or documentation for the month of February 2023 to include wound measurements, characteristics, and progression for any of his wounds. There was also no Braden Scale For Predicting Pressure Sore Risk Braden Scale (used to assess pressure ulcer risk factors) in the medical record for Resident #5.</p> <p>On 02/28/23 at 12:20 PM, during an interview with RN #1, he confirmed there had not been a Braden Scale completed for Resident #5 upon admission.</p> <p>Record review of Resident #5's Admission MDS with an ARD of 2/21/23 revealed Resident #5 had a BIMS score of 15, which indicated he was cognitively intact. Section G revealed he needed extensive assistance with two staff for bed mobility and transfers.</p> <p>On 2/28/23 at 3:10 PM, during an interview with Resident #5 at an acute care hospital, he stated that he did not believe his wounds were treated consistently. While at the facility, he noticed his wounds were draining more than usual and the nurses at the facility complained the drainage from the wounds smelled like urine, but no one ever did anything about it.</p> <p>On 03/01/23 at 1:30 PM, during an interview with the RN #1, he confirmed the facility did not execute wound care orders from the WCNP as listed on her progress notes on 2/17/23. He also confirmed there were no active Physician Orders for Resident #5 for the Stage 4 Pressure Ulcer to the sacrum from 02/22/23 through 02/26/23. He expected nurses to complete wound care as ordered and to notify him and document any resident refusals for treatment. RN #1 verified that Resident #5 had no weekly wound assessments or weekly skin evaluations completed from the date of admission (2/14/23) through the date he was admitted to an acute care hospital (2/26/23).</p> <p>(continued on next page)</p>

<p>F 0684</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Few</p>	<p>03/02/23 at 03:40 PM, during a phone interview with the facility's WCNP, she stated that she had written wound care orders for Resident #5 on the day she assessed him. She expected the wound care orders to be carried out and wound care to be provided as ordered.</p> <p>The facility submitted the following acceptable Removal Plan on 03/4/23:</p> <p>Quality Assessment:</p> <p>On 2/21/2023, at 10:00am, an Ad Hoc Quality Assurance Performance Improvement (QAPI) Committee met to review / develop / implement wound care program. Attendees were Executive Director (ED), Director of Nursing (DON), Maintenance Director, Director of Rehabilitation (DOR), Assistant Director of Nursing / Infection Control Preventionist (ADON / ICP), Business Office Manager (BOM), Human Resources Director (HRD), Medical Director (MD) attended by phone. A review of policy and procedures were: Skin and Wound Guidelines. Areas discussed: Reeducation of staff regarding wound management / treatment, reeducation of staff on wound identification, reeducate nursing staff on wound documentation to include Licensed Nurse Weekly Skin Integrity form, completing Weekly Wound Observation Tool, completing and documenting body audit on admission / readmission, one hundred (100) percent skin audits to ensure all wound are identified and treatment in place, reeducate certified nursing assistant on notifying nurse if skin concern is identified.</p> <p>On 2/23/2023, at 2:00pm, an Ad Hoc QAPI Committee met to conduct Root Cause Analysis (RCA) and create Removal Plan for Immediate Jeopardies received regarding F 656 -Develop / Implement Comprehensive Care Plan, F 684 Quality of Care and F 689 - Accidents / Supervision. Attendees were ED, DON, Maintenance Director, DOR, ADON / ICP, BOM, HRD, MD attended by phone. A review of policy and procedures were: Care Plan, Transfer / Mobility Evaluation Low Lift, Anticoagulant Therapy, Notification of Change in condition which required no changes. Reviewed policy and procedure Maintenance with changes made in the notification procedure to implement maintenance repair request form. Topics discussed include: reeducate all staff on notification to Maintenance or Administrator when bed not working properly, Maintenance director to check all beds to ensure working properly, all staff to notify nurse if blood is observed, bandage noted with blood, bandage not intact and nurse to properly assess resident for adverse reactions, Licensed Nurses to assess residents for active bleeding and address any adverse outcomes for residents on anticoagulant therapy, reeducate nursing staff for transferring resident in full body lift, reeducate nursing staff to follow care plan that reflects specific resident needs related to full body lifts, review and revise if indicated residents transfer / mobility status, review and revise if indicated eMAR for assessing resident for signs and symptoms regarding anticoagulant therapy.</p> <p>F 689, RCA determined the facility failed to properly identify an improper working bed with foot board not properly fitting bed due to staff failure of notification and additional need for education. All staff need additional training on how to report beds not properly working. RCA determined the facility failed to prevent possibility of injury by using full body sling with only one staff member, due to certified nurse assistant #1 failure to follow facility lift policy.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0686</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>Provide appropriate pressure ulcer care and prevent new ulcers from developing.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 43283</p> <p>Based on observation, interview, record review, and facility policy review, the facility failed to ensure residents were assessed and routine and consistent Pressure Ulcer (PU) care, assessments, and documentation related to PUs were completed for four (4) of five (5) residents reviewed for PUs. (Resident # 4, Resident #5, Resident #6, and Resident #7).</p> <p>The facility's failure to provide routine and consistent wound care, wound assessments, and wound documentation put Resident #4, Resident #5, Resident #6, and Resident #7 and all other residents who are at risk for skin breakdown at risk for serious harm, injury, impairment, or death.</p> <p>The situation was determined to be an Immediate Jeopardy (IJ) that began on 2/7/23 when the facility's treatment nurse resigned and was not replaced, which led to PU treatments and wound assessments being inconsistently performed and documented.</p> <p>The facility Administrator was notified of the IJ and presented an IJ Template on 3/2/23 at 5:10 PM. The facility provided an acceptable Removal Plan on 3/4/23, in which they alleged all corrective action to remove the IJ was completed and the IJ removed on 3/3/23.</p> <p>The SA validated the Removal Plan on 3/6/23 and determined the IJ was removed on 3/3/23, prior to exit. Therefore, the scope and severity for CFR 483.25 (b) (1) Pressure Ulcers was lowered from a K to an E, while the facility develops a plan of correction to monitor the effectiveness of the systemic changes to ensure the facility sustains compliance with regulatory requirements.</p> <p>Findings include:</p> <p>A record review of the facility's policy Skin and Wound with a revision date 01/24/2021 revealed, Policy: To provide a system for identifying risk, and implementing resident centered interventions to promote skin health, prevention, and healing of pressure injuries. Process: Pressure Injury Prevention: 1. Resident's skin will be evaluated upon admission/re-admission and documented in the medical record. 2. Nurse to complete skin evaluation and document in the medical record. 3. CNA (Certified Nurse Aide) to complete skin observations and report changes to nurse .Skin Impairment Identification: 1. Document presence of skin impairment(s)/new skin impairment(s) when observed. 2. Nurse to report changes in skin integrity to the physician/physician extender, resident/resident representative and document in the medical record . 4. Monitor residents' response to treatment, modify as indicated .</p> <p>Resident #4</p> <p>Record review of the Admission Record revealed the facility admitted Resident #4 on 08/09/2022 with diagnoses of Paraplegia, Pressure Ulcer of Sacral Region Stage 4, and Type 2 Diabetes Mellitus with Hyperglycemia.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0686</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>At 10:00 AM on 02/28/23, during an interview with CNA #13, she reported Resident #4 would sometimes complain about night shift not turning him, but she was unable to recall exactly when or who he had complained about. She said that Resident #4 would request that his wound care be completed daily before he got up. CNA #13 stated that the resident had a bad wound to his buttocks and to his foot and he complained that the nurses were not doing his wound care.</p> <p>On 02/28/23 at 10:20 AM, during an interview with Licensed Practical Nurse (LPN) #9, she explained Resident #4 spoke very little English but could make his needs known. He was admitted to the facility with a wound to his coccyx, and he complained that the facility was not completing his wound care daily as he expected.</p> <p>Resident #4 Sacrum</p> <p>Record review of the Order Summary Report with Active Orders As Of 02/28/2023 revealed Resident # 4 had a Physician's Order dated 11/17/22 for Acetic Acid Solution 0.25% Apply to sacrum topically every day shift for sacrum.</p> <p>A record review of the electronic Treatment Administration Record for 2/1/23 through 2/28/23 revealed Acetic Acid Solution 0.25% Apply to sacrum topically every day shift for sacrum was not documented as administered on 2/3/23, 2/4/23, 2/5/23, 2/8/23, 2/9/23, 2/10/23, 2/11/23, 2/12/23, 2/13/23, 2/14/23, 2/15/23, 2/16/23, 2/17/23, 2/18/23, 2/19/23, 2/20/23, 2/21/23, 2/22/23, 2/23/23, and 2/24/23, which was a total of 20 missed wound treatments.</p> <p>Record review of the Order Summary Report with Active Orders As Of 02/28/2023 revealed Resident # 4 had a Physician's Order dated 12/30/22 to Cleanse Sacrum with NS/Wound Cleanser, pat dry, Apply Puraply Skin sub x 2. cover with zeroform and border dressing leave on for 7 days. If border dressing comes loose, change only outer border dressing one time a day and as needed for sacrum.</p> <p>A record review of the electronic Treatment Administration Record for 2/1/23 through 2/28/23 revealed, Cleanse Sacrum with NS/Wound Cleanser, pat dry, Apply Puraply Skin sub x 2. cover with zeroform and border dressing leave on for 7 days. If border dressing comes loose, change only outer border dressing one time a day and as needed for sacrum was not documented as administered on 2/3/23, 2/4/23, 2/5/23, 2/8/23, 2/9/23, 2/10/23, 2/11/23, 2/12/23, 2/13/23, 2/14/23, 2/15/23, 2/16/23, 2/17/23, 2/19/23, 2/20/23, 2/21/23, 2/22/23, 2/23/23, and 2/24/23, which was a total of 19 missed wound treatments.</p> <p>Review of the medical record revealed there were no weekly wound assessments or documentation for the month of February 2022 to include wound measurements, characteristics, and progression of the wound to the sacrum.</p> <p>A record review of Skin Substitute Application for Resident #4 with date and time 1/26/23 at 0902 AM revealed . Sacrum size (cm) LxWxD (length x width c depth) 5.3 x 5 x 1.6 cm Ttype: Pressure Injury . Stage IV Pressure Injury Full Thickness damage extends to muscle, bone, and/or tendon .</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0686</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>On 2/28/23 at 4:05 PM, during an interview with Social Worker (SW) #1 (Acute Hospital Social Worker), she explained Resident #4 does not want to go back to the facility and had asked to be placed somewhere else. Resident #4 told her he was not getting wound care and was not getting turned.</p> <p>On 2/28/23 at 4:10 PM, during an observation and interview with Resident #4, he was in bed wearing a gown with air pressure devices on both lower legs and feet. He stated that he was afraid he was going to die in the facility and he did not want to return. He said that the staff did not turn him, especially the night shift, and he was unable turn himself completely over because he was paralyzed from the waist down. He complained that he was left up for hours at a time in his wheelchair even after he had requested to be placed back in bed and he had not received wound care for two (2) weeks.</p> <p>Record review of the Quarterly Minimum Data Set (MDS) with an Assessment Reference Date (ARD) of 02/10/2023 revealed Resident #4 had a Brief Interview for Mental Status (BIMS) score of 14, which indicated he was cognitively intact. Section G revealed he required extensive two-person assistance for bed mobility and was totally dependent upon two staff members to assist with transfers.</p> <p>At 04:30 PM on 02/28/23, during a phone call with Resident #4's interpreter, he explained Resident #4 had complained that he was not getting wound care at the nursing home.</p> <p>On 03/01/23 at 10:00 AM, during an interview with RN #1, he confirmed the last Braden Scale For Predicting Pressure Sore Risk for Resident #4 was completed on 11/14/2022 and that the Braden Scale should be completed on admission, re-admission, quarterly, and with a significant change resident assessment.</p> <p>On 03/01/23 at 1:30 PM, during an interview with RN #1, he explained the facility used the Wound-Weekly Observation Tool to document measurements and characteristics of resident wounds, including pressure ulcers and that they should be completed weekly. He confirmed that Resident #4 did not have any weekly wound documentation completed for the month of February 2023.</p> <p>Resident #5</p> <p>At 11:45 AM on 02/28/23, during an interview with CNA #15, she explained Resident #5 was in the hospital, but she had provided care to Resident #5 while he was at the facility. She stated that he had a bad wound on his back side and there was a large amount of drainage and an odor. She said that she had reported to the ADON and the DON several times regarding the increased drainage and odor.</p> <p>Record review of Physician/Prescriber Telephone Orders for Resident #5 dated 02/26/23 at 11:19 AM revealed . Send resident to ER (emergency room) for eval (evaluation) & TX (Treatment) RE: Resident pulled out foley catheter .</p> <p>Record review of Resident #5's Admission Record revealed the facility admitted resident on 02/14/23 with the diagnoses of Osteomyelitis, Sepsis, Elevated [NAME] Blood Cell Count, Unspecified, Metabolic Encephalopathy, Acute Cystitis with Hematuria, and Paraplegia.</p> <p>(continued on next page)</p>

<p>F 0686</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>Record review of the Order Summary Report with Active Orders As Of: 03/08/2023 revealed a Physician's Order, dated 2/6/23 to Cleanse Sacrum with NS/Wound cleanser, pat dry, Apply santyl with Vashe wet to dry, cover with Foam border dressing QD (Every Day) and PRN .</p> <p>A record review of the Progress Note Details, dated 02/08/23, completed by the facility's WCNP revealed . Wound Assessment(s) Wound #1 Sacral is an Unstageable Pressure Injury Obscured full-thickness skin and tissue loss Pressure Ulcer .Not Healed. Initial wound encounter measurements are 14.54cm length x 12.79cm width x 0.1 cm depth . There is a Large amount of purulent drainage noted which has a Strong odor . Wound Orders .Apply wound with Collagenase Santyl Ointment 30 g every day for 15 days .</p> <p>A record review of the electronic Treatment Administration Record for 2/1/23 through 2/28/23 for Resident #6 revealed, Cleanse Sacrum with NS/Wound cleanser, pat dry, Apply santyl with Vashe wet to dry, cover with Foam border dressing QD (Every Day) and PRN . was not documented as administered at 9:00 AM on 2/8/23, 2/9/23, 2/10/23, 2/12/23, 2/13/23, 2/14/23, 2/15/23, 2/16/23, 2/17/23, 2/18/23, 2/19/23, 2/20/23, 2/21/23, 2/22/23, 2/23/23, and 2/24/23, which was a total of 16 missed administrations before Resident #6 was admitted to the hospital on 2/24/23.</p> <p>On 03/01/23 at 11:40 AM, during a phone interview with Resident #6's sister who is the Resident Representative (RR), she stated that when Resident #6 was admitted to the facility, he did not have any open areas to his buttocks. She reported the area to his buttocks started out with redness and kept getting worse to the point to where the wound had a black discoloration. She said she could not get anyone at the facility to talk to her about her brother's wound and that staff was not turning the resident. She stated that the facility's CNAs commented that it was the worse they had ever seen and the hospital staff commented that the wound was bad. She said the wound was debrided at the hospital on 02/28/23 and Resident #6 was getting a colostomy today (3/1/23) to help in wound healing.</p> <p>Record review of Resident #6's Physician/Prescriber Telephone Orders, dated 2/24/23 revealed an order for send resident to ER (emergency room) .for eval (evaluation) and tx (treatment) .</p> <p>A record review of Resident #6's Wound Care Consultation from the hospital dated 02/25/23 revealed . Reason for consultation .sacrum-large unstageable pressure ulcer, large green/black necrotic tissue, positive odor .</p> <p>During an interview with RN #1 on 03/01/23 at 2:05 PM, he confirmed there had not been a Braden Scale completed for Resident #6 upon admission to assess his risk for developing pressure ulcers. RN #1 verified that Resident #6 had no weekly wound assessments and one (1) weekly skin evaluation completed for the month of February 2023. He stated that the LPNs are to complete weekly skin evaluations and the DON should complete the weekly wound assessments.</p> <p>A record review of the Admission MDS with an ARD of 01/23/23 revealed Resident #6 had a BIMS score of 15, which indicated he was cognitively intact. Section G revealed he required extensive assist of two staff members for bed mobility and transfers.</p> <p>(continued on next page)</p>

<p>F 0686</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>At 3:15 PM on 3/01/23, during an interview with Resident #6, in the acute hospital, he stated when he first went to the facility, he had no open areas on his skin. He said he felt like the night shift got very lazy and they began increasing the increments of turning him from every two (2) hours to every six (6) hours. He reported that his wound care was not completed daily and there were some weeks he did not receive wound care at all. He said that only certain nurses would do his wound care and his wound got worse and staff would leave him up for hours in his wheelchair.</p> <p>At 3:30 PM on 03/01/23, during an interview with the Acute Hospital Social Worker #4, he explained that the pressure ulcer for Resident #6 had been debrided and is treated with a wound vacuum system. Resident #6 is also scheduled to have an ostomy in place to help with wound healing.</p> <p>At 1:15 PM on 03/02/23, during an interview with CNA #15, she explained Resident #6 did not have any wounds when he was first admitted to the facility, but then he developed redness about the size of a golf ball that went from white discoloration to black discoloration. She said that before Resident #6 was transferred to the hospital, the wound was all black, draining, and had an odor and she had informed the nurses and the ADON.</p> <p>Resident #7</p> <p>A record review of Admission Record revealed the facility admitted Resident #7 on 02/01/23 with diagnoses including Diffuse Traumatic Brain Injury with loss of Consciousness Greater than 24 hours without Return to Pre-Existing Conscious Level with Patient Surviving, Subsequent Encounter and Hemiplegia and Hemiparesis following Nontraumatic Subarachnoid Hemorrhage Affecting Right Dominant Side.</p> <p>Record review of the Five (5) Day MDS with an ARD of 2/08/23, revealed Resident #7 was severely impaired with cognitive skills for daily decision making. Review of Section M revealed he had no unhealed pressure ulcers/injuries.</p> <p>At 11:50 AM on 2/28/23, during an interview with Resident #7's girlfriend, she stated that the resident was not being turned and he had gotten two (2) wounds since his admission to the facility on [DATE]. She said he had gotten a bed sore on his buttocks, but she was putting cream on the area to keep it from getting worse.</p> <p>On 3/02/23 at 1:00 PM, during an interview and observation of wound care of by RN #1, Resident #7 had a wound to the bony prominence near the right small toe. The area had a brown discoloration that was scabbed over. The sacrum was healed and did not have any open areas. RN #1 confirmed the wounds were acquired at the facility and that no weekly wound assessments were completed to stage, describe, or measure the wounds.</p> <p>At 1:15 PM on 3/02/23, during an interview with CNA #15, she explained when Resident#7 first was admitted to the facility he did not have any wounds or open areas. She stated she informed the nurses and the DON when he developed an open area to his buttocks and foot.</p> <p>On 3/02/23 at 1:30 PM, during an interview with CNA #12, she explained Resident #7 did acquire a wound to his buttocks and his foot after admission, and still has the wound to his foot.</p> <p>Resident #7 Right Outer Foot</p> <p>(continued on next page)</p>		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 255092	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 03/06/2023

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>Ensure that a nursing home area is free from accident hazards and provides adequate supervision to prevent accidents.</p> <p>43283</p> <p>Based on observation, interviews, record review, and facility policy review, the facility failed to ensure that the residents' environment remained free from actual harm for Resident #1 and the likelihood for harm for Resident #2 for two (2) of five (5) sampled residents, as evidenced by the facility's failure to identify an inoperable mechanical bed with an improperly fitting footboard that resulted in a flap laceration to Resident #1's right lateral foot and failure to prevent the likelihood of injury when the State Agency (SA) observed Certified Nurse Aide (CNA) #1 using a full body mechanical lift with Resident #2 suspended mid-air in a sling, without required two (2) person assistance.</p> <p>The facility's failure to ensure that the residents' environment remained free from accidents/hazards placed these residents and other residents, in a situation that was likely to cause serious harm, injury, impairment, or death.</p> <p>The situation was determined to be an Immediate Jeopardy (IJ) that began on 2/22/23 when Resident #1 was observed with his right foot wedged between the mechanical bed's footboard and the mattress and Resident #2 was suspended in mid-air. The facility Administrator was notified of the IJ on 2/23/23 at 1:45 PM and provided an IJ Template. The facility provided an acceptable Removal Plan on 2/24/23, in which they alleged all corrective actions to remove the IJ were completed and the IJ removed on 2/24/23.</p> <p>The SA validated the Removal Plan on 2/27/23 and determined the IJ was removed on 2/24/23, prior to exit.</p> <p>Due to additional identification of IJ, the SA notified the Administrator that the IJ Template dated 2/23/23 and the Removal Plan dated 2/24/23 were being rescinded. The facility Administrator was notified of the IJ and presented a revised IJ Template on 3/2/23 at 5:10 PM. The facility provided an acceptable Removal Plan on 3/4/23, in which they alleged all corrective action to remove the IJ were completed and the IJ removed on 3/3/23.</p> <p>The SA validated the Removal Plan on 3/6/23 and determined the IJ was removed on 3/3/23, prior to exit. Therefore, the scope and severity for CFR 483.25 (d) (1) Accidents was lowered from a K to an E, while the facility develops a plan of correction to monitor the effectiveness of the systemic changes to ensure the facility sustains compliance with regulatory requirements.</p> <p>Findings include:</p> <p>A review of the facility's policy, Maintenance, dated 11/30/14, revealed, Policy: The facility's physical plant and equipment will be maintained through a program of preventive maintenance and prompt action to identify areas/items in need of repair. Procedure .All employees will report physical plant areas or equipment in need of repair or service to their supervisor. All items needing maintenance assistance will be reported to maintenance using the Maintenance Repair Request form .</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>A review of the facility's policy, Transfer/Mobility Evaluation Low Lift, revised 11/1/2019, revealed, .Procedure .3. Two staff members are required when using a mechanical lift .</p> <p>A review of the User Manual for the mechanical lift revealed, .Warning .recommends that two assistants be used for all lifting preparation, transferring from and transferring to procedures .</p> <p>Resident #1</p> <p>At 12:20 PM on 02/22/23, during an interview and observation, Resident #1 was lying in bed, the mattress was approximately 12 inches shorter than the footboard, and the resident's right foot was in the gap, wedged between the footboard and the bed frame. There was an area of dried blood on the side of the bed that was approximately the size of a golf ball. He explained that not only did his footboard not fit appropriately, but his mechanical bed was broken, and he could not raise or lower the bed; it would only lie flat.</p> <p>On 02/22/23 at 1:00 PM, during an interview and observation of Resident #1 with Registered Nurse (RN) #11, she confirmed that the bed looks faulty, and the resident's right foot was observed between the bed frame and the footboard.</p> <p>On 2/22/23 at 1:15 PM, in an interview and observation of Resident #1 with CNA #1, she confirmed that his right foot was under the foot board of the bed between the bed frame and the foot board and stated, the mattress does not fit the bed. She said that the bed had been broken for months and that it did not have any hand cranks to manually raise or lower the bed or a remote control to do it electronically. She said that Maintenance and Administration had been notified verbally of the broken bed because it is easier to tell them during the day. She stated that there are slips to fill out when something needs to be repaired by Maintenance.</p> <p>A review of the facility's maintenance repair request form revealed there were no written requests to repair Resident #1's bed.</p> <p>In an observation and interview with RN #11 on 02/22/23 at 1:30 PM, she assessed Resident #1's right foot and stated he had a laceration flap to the lateral side that measured 5.5 centimeters (cm) x 3.0 cm. There was a large amount of dried blood noted around the laceration and down the lateral side of the right foot. She confirmed it was a flap laceration and not a diabetic wound and the laceration could have been caused by the faulty bed or the footboard. She explained that this was the first time she had seen Resident #1 and his bed, but it was obvious the mattress does not fit the bed, and anyone should have seen the faulty bed.</p> <p>During an interview with Resident #1 on 02/22/23 at 1:50 PM, he explained he had cut his foot on the bed frame or the footboard, but he was unable to recall exactly when because he cannot feel his feet very much and he cannot tell if his feet are hurting.</p> <p>A record review of Wound-Weekly Observation Tool for Resident #1, dated 02/22/23, identified the wound location as Right Lateral Foot and the wound type as Skin flap.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>On 02/22/23 at 03:40 PM, during an interview with CNA #16, she explained when equipment needs to be repaired, she completes a request form and gives it to Maintenance. She explained Resident #1's bed had been broken since Thanksgiving and Administration and Maintenance had been made aware. She denied completing the request form but stated she had verbally told Maintenance and Administration.</p> <p>On 02/22/23 at 04:15 PM, during an interview with the Maintenance Director, he reported there were no repair request forms for Resident #1's bed. He explained about two weeks ago, he had been told that the bed was broken and needed a new remote. He said he had told his staff that he needed to know when a remote is broken because Resident #1's bed is a rental and is not like the other beds in the facility.</p> <p>On 02/23/23 at 09:40 AM, during an interview with the Assistant Director of Nursing (ADON), he explained he did know Resident #1's bed was broken.</p> <p>On 02/23/23 at 09:55 AM, during an interview with the Administrator, she stated that she walks throughout the building and that she was not advised until yesterday (02/22/23) that Resident #1's bed was not working properly. She was also not aware of any changes to the mattress or bed. She said that she expected her staff to provide care to the residents and if a hazard is identified in a resident's room, she would expect the staff to notify Maintenance or herself immediately.</p> <p>On 02/23/23 at 11:20 AM during an interview with Licensed Practical Nurse (LPN) #3, she stated that Resident #1's bed had been in that condition for a long time, with the bed not working and the mattress not fitting the bed. She said that she gave a verbal report to the Maintenance Department but was unable to recall how long ago that had been.</p> <p>A record review of the Admission Record revealed the facility admitted Resident #1 on 11/01/2020 with diagnoses including Paroxysmal Atrial Fibrillation, Chronic Embolism and Thrombosis of Other Specified Veins, and Type 2 Diabetes Mellitus.</p> <p>A record review of the Quarterly Minimum Data Set (MDS) with an Assessment Reference Date (ARD) of 1/6/23, revealed Resident #1 had a Brief Interview for Mental Status (BIMS) score of 15, which indicated he was cognitively intact.</p> <p>Resident #2</p> <p>On 02/23/23 at 11:50 AM, during an observation, CNA #1 was operating a mechanical lift in the hallway with Resident #2 in a full body sling suspended midair. CNA #1 was operating the lift without assistance from another staff member. The resident's wheelchair was noted to be approximately five (5) feet away from the CNA and lift. LPN #9 was at her medication cart approximately five (5) doors away for the resident's door and went over to assist and complete the transfer.</p> <p>At 11:55 AM on 02/23/23, during an interview, LPN #9, she explained she was passing medications and observed CNA #1 using the mechanical lift while out in the hallway with Resident #2 in a sling and his wheelchair far away from the lift. She stated she was unsure of why the CNA was transferring the resident in the hallway. She said that two (2) staff members must be present at all times when using a mechanical lift and that staff has received training on this. She said the CNA could have dropped the resident from the lift or the resident could have hit his head and caused serious damage.</p> <p>(continued on next page)</p>

<p>F 0689</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>At 12:05 PM on 02/23/23, in an interview with CNA #1, she explained that Resident #2 assists her with transfers by holding on to the locked wheelchair when she lowers him into the chair from the mechanical lift. She confirmed she was operating a mechanical lift by herself. She explained that she had begun the transfer in the resident's room, took the wheelchair out into the hallway, and then transferred resident. She reported there was no one to help her and she had planned on using the mechanical lift to transfer other residents by herself, but she wasn't now since I'm being watched. She reported she had been trained to work independently.</p> <p>At 1:45 PM on 02/23/23, during an interview with the Administrator, RN #1, and RN #5, the Administrator stated that they all had heard about the CNA transferring the resident with a mechanical lift in the hallway alone. She said she expected staff to have two (2) staff members at all times when using a mechanical lift and all nursing staff had previously been trained. She stated that CNA #1 had been educated and given a return demonstration on using the lift.</p> <p>On 2/23/23 at 2:50 PM, during an interview with Resident #2, he stated that CNA #1 had transferred him by herself before and he helped her by using the arms of the wheelchair. He stated that everyone else transfers him with two people assisting.</p> <p>At 03:15 PM on 02/23/23, during an interview with the Director of Nursing (DON), she explained that when a mechanical lift is in use, two (2) staff members should be present at all times for a transfer and she had informed her staff to come get her if no one else is available.</p> <p>A record review of the Admission Record revealed the facility admitted Resident #2 on 9/20/2013 and he had diagnoses including Diabetes Mellitus and Unspecified Dementia.</p> <p>A record review of the MDS with an ARD of 11/16/22, revealed Resident #2 had a BIMS score of 13 which indicated he was cognitively intact.</p> <p>A record review of the Order Summary Report with Active Orders As Of: 02/23/2023, revealed Resident #2 had a Physician's Order dated 6/28/22 for Hoyer lift to be used for transfer.</p> <p>A record review of the Orientation In-Service Acknowledgement revealed CNA #1 received training on resident handling on 12/16/21.</p> <p>A record review of an In-Service Sign-In Sheet dated 12/8/22 revealed CNA #1 attended a training on 12/8/22 related to Hoyer Lift Training.</p> <p>The facility submitted the following acceptable Removal Plan on 03/4/23:</p> <p>Quality Assessment:</p> <p>(continued on next page)</p>

<p>F 0689</p> <p>Level of Harm - Immediate jeopardy to resident health or safety</p> <p>Residents Affected - Some</p>	<p>On 2/21/2023, at 10:00am, an Ad Hoc Quality Assurance Performance Improvement (QAPI) Committee met to review / develop / implement wound care program. Attendees were Executive Director (ED), Director of Nursing (DON), Maintenance Director, Director of Rehabilitation (DOR), Assistant Director of Nursing / Infection Control Preventionist (ADON / ICP), Business Office Manager (BOM), Human Resources Director (HRD), Medical Director (MD) attended by phone. A review of policy and procedures were: Skin and Wound Guidelines. Areas discussed: Reeducation of staff regarding wound management / treatment, reeducation of staff on wound identification, reeducate nursing staff on wound documentation to include Licensed Nurse Weekly Skin Integrity form, completing Weekly Wound Observation Tool, completing and documenting body audit on admission / readmission, one hundred (100) percent skin audits to ensure all wound are identified and treatment in place, reeducate certified nursing assistant on notifying nurse if skin concern is identified.</p> <p>On 2/23/2023, at 2:00pm, an Ad Hoc QAPI Committee met to conduct Root Cause Analysis (RCA) and create Removal Plan for Immediate Jeopardies received regarding F 656 -Develop / Implement Comprehensive Care Plan, F 684 Quality of Care and F 689 - Accidents / Supervision. Attendees were ED, DON, Maintenance Director, DOR, ADON / ICP, BOM, HRD, MD attended by phone. A review of policy and procedures were: Care Plan, Transfer / Mobility Evaluation Low Lift, Anticoagulant Therapy, Notification of Change in condition which required no changes. Reviewed policy and procedure Maintenance with changes made in the notification procedure to implement maintenance repair request form. Topics discussed include: reeducate all staff on notification to Maintenance or Administrator when bed not working properly, Maintenance director to check all beds to ensure working properly, all staff to notify nurse if blood is observed, bandage noted with blood, bandage not intact and nurse to properly assess resident for adverse reactions, Licensed Nurses to assess residents for active bleeding and address any adverse outcomes for residents on anticoagulant therapy, reeducate nursing staff for transferring resident in full body lift, reeducate nursing staff to follow care plan that reflects specific resident needs related to full body lifts, review and revise if indicated residents transfer / mobility status, review and revise if indicated eMAR for assessing resident for signs and symptoms regarding anticoagulant therapy.</p> <p>F 689, RCA determined the facility failed to properly identify an improper working bed with foot board not properly fitting bed due to staff failure of notification and additional need for education. All staff need additional training on how to report beds not properly working. RCA determined the facility failed to prevent possibility of injury by using full body sling with only one staff member, due to certified nurse assistant #1 failure to follow facility lift policy.</p> <p>F 684, RCA determined the facility failed to assess Resident #1 for four hours knowing there was blood on the floor, bandages not intact and saturated with blood, did not reassess after reporting the blood with resident on anticoagulant. RCA determined additional needs for education to all staff on notifying nurse of change in condition. RCA determined LPN #1 did not reassess for active bleeding and address the care related to resident on anticoagulant therapy and was educated by RN #1 on 02/22/2023 at 2:30 PM on Anticoagulant Therapy related to reassessing for active bleeding and addressing the care related to resident on anticoagulant therapy.</p> <p>F 656, RCA determined the facility failed to properly follow Resident #2's care plan for a full body lift with two staff members to prevent the likelihood of a serious outcome by having resident dangling midair in the lift out in the hallway with no other staff members around. RCA determined Certified Nursing Assistant (CNA) #1 failed to follow facility policy and procedure related to care plan and received a corrective termination action on 02/23/2023 at 12:30 PM.</p> <p>(continued on next page)</p>
