Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

| Level of Harm - Minimal harm or potential for actual harm | | HAVE BEEN EDITED TO PROTECT CO | ONFIDENTIALITY** 36219 |
| Residents Affected - Some | Based on observation, interview and record review, the facility failed to ensure three staff members (Feed Aide/Activity Aide BB, Feed Aide CC and Feed Aide DD) had successfully completed a State-approved training program for feeding assistants and failed to ensure these staff members were not providing feeding assistance to five residents (Residents #11, #18, #28, #44, and #48) in a sample of 19 residents with complicated feeding problems. The facility census was 55. | | |
| | Review of the undated facility polic | y, Paid Feeding Assistant, showed the | following: |
| | -The regulation requires that paid for (RN) or Licensed Practical Nurse (I | | |
| | -Therefore, a facility that has receive building cannot use paid feeding as | ved a waiver and does not have either a ssistants during those times; | an RN or LPN available in the |
| | Interdisciplinary Team (IDT) Asses | sment of Resident Eligibility for Feeding | g Assistance: |
| | -When determining whether a resident may be assisted by a paid feeding assistant, facility staff m resident selection on the IDT's current assessment of the resident's condition and the resident's la comprehensive assessment and plan of care; | | |
| | -Appropriateness should be reflected | ed in the resident's comprehensive care | e plan; |
| | -Paid feeding assistants are only permitted to assist residents who have no complicated eating or drinking problems as determined by their comprehensive assessment; | | |
| | -Examples of residents that a paid feeding assistant may assist include residents who are independent in eating and/or those who have some degree of minimal dependence, such as needing cueing or partial assistance, as long as they do not have complicated eating or drinking problems; | | |
| | -Paid feeding assistants are not permitted to assist residents who have complicated eating problems, such as (but not limited to) difficulty swallowing, recurrent lung aspirations, or who receive nutrition through parenteral or enteral means; | | |
| | -Nurses or nurse aides must continue to assist residents who require the assistance of staff with more specialized training to eat or drink; | | |
| -Paid feeding assistants may assist eligible residents to eat or drink at meal tir activities or social events as needed, whenever the facility can provide the needed. | | | |

| F 0880 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Many | During an interview on 3/18/22 at 2:15 P.M., the administrator said the former DON used to be responsible for the employee TB testing. When the former DON left employment at the facility in August 2021, the MDS Coordinator was responsible for the employee TB testing. When a new staff were at the facility completing pre-hire paperwork, she or the Office Manager/HumanResourcess staff sent the new staff to the MDS Coordinator or another licensed nurse (if the MDS Coordinator was not in the building) to administer the TB test. The MDS Coordinator was responsible to ensure the results of the TB tests were read and the second test was given. The Office Manager/Human Resources staff was responsible for overseeing this process. | | |
| | During an interview on 3/18/22 at 3:25 P.M., the Office Manager/Human Resources Staff said she complete a new hire checklist at pre-hire which included the TB tests. She gave the form to the MDS Coordinator or a licensed nurse who was available to complete the TB tests. The nurse administered the TB test and then to the new employee when they were to come back to the facility so a nurse could read the results. He/She was not sure who was responsible for ensuring the new employee received the second TB test. | | |
| | 8. Review of the facility's Handwas | hing Policy, updated 1/1/22, showed th | e following: |
| | -Proper handwashing technique is | used for the prevention of transmission | of infectious disease; |
| | 60% alcohol-based sanitizer, befor | are required to wash their hands before and after performing any procedure, no food, and when hands become obvious | after sneezing or blowing nose, |
| | 9. Review of Resident #207's face | sheet showed the following: | |
| | -The resident's diagnoses include fracture of lumbosacral spine and pelvis (a broken bone in the lower s and pelvic region), chronic congestive heart failure (a progressive condition that affects the pumping pow of the heart muscle), chronic kidney disease (longstanding disease of the kidneys leading to kidney failu and diabetes mellitus (a group of diseases that result in too much sugar in the blood). | | |
| | Review of the resident's February 2 | 2022 physician order sheet showed the | following: |
| | -Clean open area to coccyx (tailbot to treat wounds) and cover with a c | ne) with wound cleanser, apply hydrogo fry dressing daily; | el (an insoluble hydrophilic gel used |
| | | ankle) with wound cleanser, apply calr and cover with bordered foam dressing | |
| | Observation on 2/15/21 at 1:40 P.M | A., showed the following: | |
| | -The resident lay on his/her right si | de in bed for a dressing change to his/ | her coccyx; |
| | -Licensed Practical Nurse (LPN) D amount of light brown drainage; | removed the old soiled wound dressing | g. The dressing had a quarter size |
