F 0677	Provide care and assistance to per	form activities of daily living for any res	ident who is unable.	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS F	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 41652	
Residents Affected - Some	Based on observation, interview, and record review, the facility failed to provide ADL assistance to residents who required staff assistance with bathing, for 6 (#s 2, 12, 26, 60, 72, and 254) of 11 sampled residents; and failed to provide necessary assistance with eating, for 1 (#23), of 1 sampled resident. The deficient practice resulted in residents not receiving a minimum of a weekly shower. Findings include:			
	1. During an interview on 1/31/23 at 11:31 a.m., NF2 stated she visited the resident every day. NF2 stated resident #12 needed assistance with bathing. NF2 stated she had requested resident #12's hair be washed so it could be fixed. NF2 stated resident #12 got a bed bath on 1/30/23, but her hair was not washed as requested. NF2 stated she had to wash her hair on 1/31/23 so it could be fixed.			
	Review of resident #12's care plan bathing up to twice a week.	, dated 1/10/23, showed the resident w	as to receive assistance with	
	Review of resident #12's bathing records, dated from 12/27/22 through 2/1/23, showed the resident had been showered once on 1/15/23, and there was one refusal on 12/28/22. The record showed resident #12 had only been offered a shower twice in approximately 30 days, rather than twice per week per her preference.			
	2. During an interview on 1/31/23 at 12:41 p.m., resident #26 stated he was told by the facility he would be getting two showers a week. Resident #26 stated he got one a week, and said the second shower never happens.			
	Review of resident #26's care plan, dated 8/4/22, showed the resident required assistance with bathing, and he preferred showering twice per week.			
	Review of resident #26's bathing records, dated from 11/1/22 through 1/31/23, showed the resident had 23 opportunities for a shower, and received 11 showers during the months of November and December of 2022 and January of 2023. Based on the information received, resident #26 went without a shower or a bath for more than seven days five times during the timeframe, with the maximum being 13 days between showers.			
	3. During an interview on 1/31/23 a day, but the facility told her she wo	at 11:57 a.m., resident #60 stated she li uld receive two showers per week.	ked having a shower every other	
	Review of resident #60's care plan and was to be offered a shower up	, dated 12/14/22, showed the resident r to twice a week.	required assistance with bathing	
	Review of resident #60's bathing records, dated from November of 2022 through January of 2023, showe the resident had 19 opportunities to shower. The bathing records showed eight showers total were given during the months of November and December 2022, and January 2023. Based on the documentation provided by the facility, resident #60 went 11 days in November 2022 without a shower, and 22 days in la December 2022 and early January 2023 between showers.

F 0677 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	During an interview on 2/1/23 at 1:35 p.m., staff member J stated she worked on Monday, Tuesday, and Wednesday as a bath aide. Staff member J stated she had a resident list which showed each resident's (bathing/shower) preference, and most residents wanted at least two showers per week. Staff member J stated there was not a bath aide scheduled on the days she was not working, so most of the residents only got one shower per week. Staff member J stated the CNA assigned to a resident could try to get a shower or bath done, if she (staff member J) was not able to get at least one done per week.			
	464004. During an observation and interview on 2/1/23 at 1:17 p.m., resident #2 stated it was going on her second week without a shower.			
	Review of resident #2's care plan, dated 10/13/22, showed, I require staff to assist me with 1 to 2 showers per week.			
	Review of resident #2's ADL task Bathing, dated January - February 2023, showed resident #2 had receive two showers out of a minimum five opportunities.			
	5. During an observation and interview, on 2/2/23 at 9:21 a.m., resident #72 stated he was feeling, . miserable. You can't get a shower around here, they keep giving excuses. Resident #72 was wearing sweatpants, and a T-shirt, which had various food and liquid stains on the front of it.			
	Review of resident #72's Bathing Preference Questionnaire, no date, showed, We offer routine bathing two times per week. In the space provided for the resident to detail their bathing preferences, resident #72 wro Monday, Wednesday, and Friday is when I like showers.			
	Review of resident #72's ADL task Bathing, for the dates of January - February 2023, showed his last shower was on 1/22/23, 11 days prior. There were no documented shower refusals.			
	_	at 9:38 a.m., resident #23 was in the door staff, in the dining room to assist he	-

F 0684	Provide appropriate treatment and	care according to orders, resident's pre	eferences and goals.	
Level of Harm - Actual harm	44770			
Residents Affected - Few	Based on interview and record review, the facility failed to change a wound vacuum dressing on a diabetic ulcer, for 1 (#54), of 1 sampled resident, causing the resident increased skin breakdown above her original wound. Findings include:			
	During an interview on 2/2/23 at 8:51 a.m., resident #54 stated having the wound vac treatment helped her wound to heal. Resident #54 stated, The nurses had some confusion in the beginning and didn't know when or how to change it (vac treatment). It went for a while not getting changed, but the wound clinic got it straightened out.			
	Review of a physician order for res	ident #54, dated 10/18/22, showed:		
	1. Remove old dressing.			
	2. Cleanse with NS.			
	3. Protect the peri-ulcer area with 0	Cavilon.		
	4. Use versitel/black foam as the pr	rimary dressing.		
	5. Use VacOpsite as the secondary	y dressing.		
	6. This order to be carried out 2 tim	nes per week .		
	Please send patient with wound va returns, set at 125mmHg.	c supplies so we can reapply it, please	reapply wound vac when patient	
	Review of resident #54's Wound Clinic Note, dated 11/22/22, showed, [Resident] is being seen today for he reports of new area of breakdown above ulceration. Staff at [Facility] report they have not been changing wound vac as they do not know how often to change it.			
	Review of a Facility Reported Incident, reported to the State Survey Agency, dated 11/25/22, showed, Interviews with nursing staff revealed [Resident #54] had complained of pain to her wound for a few days. Her medication was administered as scheduled per physician orders. Resident was seen at her wound ca appointment on Tuesday 11/15/22. She had her wound vac changed at the appointment. The orders revealed the wound vac was to be changed 2 times a week on Thursday and Sunday. The wound vac did not get changed on Thursday 11/17/22. Record review did reveal the wound vac was changed on Sunday 11/20/22. The investigation was substantiated. Education was given to the nurses to follow physician order on wound care.			
	During an interview on 2/2/23 at 11:03 a.m., staff member C stated there was no additional investigation or documentation for resident #54's wound vacuum incident.			
	The wound care nurse was not available for interview during the survey.

Level of Harm - Actual harm Residents Affected - Some	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 44770	
	Based on interview and record review, the facility failed to prevent falls with significant injuries requiring residents to go to the emergency department, for 3 (#s 47, 229, and 279), of 5 sampled residents; and, # had a significant skin tear; #279 had multiple falls and injury to her head; #229 broke open a knee incisio and had surgery to clean and repair the incision, and resident #47 was transferring himself to the bathroc independently, due to a lack of staff assistance at the time of the fall. The facility also failed to prevent a with fracture to a resident's patella, for 1 (#55), and failed to protect a resident from significant burns, for (#24), of 8 sampled residents. Findings include:			
	1. Review of a facility reported incident, dated 1/22/23, showed, [Resident #47] had an unwitnessed fathe main dining room which caused a significant skin tear to his left hand. Due to the significant skin tearsident was sent to the ER for evaluation and treatment.			
	Review of resident #47's MDS, date fall care area was triggered.	ed [DATE], with an ARD of 1/4/23, sect	tion V0200, showed, resident #47's	
	•	ensive care plan showed the resident have plan. The care plan did not include fa	· · · · · · · · · · · · · · · · · · ·	
	During an interview on 2/1/23 at 3:03 p.m., staff member I was looking at resident #47's comprehensive car plan. There were only two areas of concern listed on the comprehensive care plan. Staff member I stated, I don't know what happened here. There should be way more stuff on this care plan. His initial assessment looks like it wasn't completed, so neither was the care plan. Staff member I stated, there was a care plan from a previous admission that included falls as a concern, but the new admission care plan did not have falls included until the fall on 1/22/23. 2. During an interview on 1/31/23 at 9:02 a.m., resident #229 stated he fell in his bathroom, and he broke open the surgical incision, which was from his total knee surgery. He stated he got out of bed around 4:00 a m., to go to the bathroom, and forgot his walker. He made it to the bathroom, but when he got up from the toilet, he fell on to his knee with the incision, and it broke open. He stated he was able to get to his recliner, but then he thought he must have passed out because he woke up with the CNA and the nurse there, and he was covered in blood. He stated he was sent to the hospital, and the wound (opened incision) had to have another surgery to clean it out, a wound vacuum was placed, and then it had to be sutured closed again.			
	During an interview on 2/1/23 at 1:54 p.m., resident #229 stated, There has been four times I have piss pants waiting for them to come help. Resident #229 stated, the night he fell in the bathroom and reoper his surgical incision, he couldn't wait any longer, so he went to the bathroom on his own.

F 0689	3. Review of resident #279's EMR,	showed the resident was admitted to t	he facility on [DATE]. Resident		
Level of Harm - Actual harm		cility was advised by NF3 the resident five times (7/7/22, 7/9/22, 7/12/22, 7/1			
	admission on 7/6/22 and her discha	arge to home from the facility on 8/10/2	22. Resident #279 was sent to the		
Residents Affected - Some	emergency department for two of the	ne falls, for injuries to her head, and a l	nematoma on her hip.		
	During an interview on 2/1/23 at 12:14 p.m., NF3 stated, She (resident #279) was not being closely monitored. I told them up front that you have to watch her all the time. They did not have enough staff to really watch her the way they needed to. We brought her home. They did finally manage to move her to a room next to the nurse's station and that helped some. She fell more at the facility than she did at home. She also hurt herself more there than at home. They (the facility) did not have the staffing to keep a close enough eye on her. I think she fell seven times there and went to the hospital twice!				
	During an interview on 2/1/23 at 12:18 p.m., NF4 stated, They knew she (resident #279) was confused. She had several falls there, and we have all these bills from her having to go to the ER. They also didn't get all the staples out of her head. After she was home, she kept complaining of pain, and when EMS came to my house, they found two more staples. I can guarantee you no one in my family will ever go there again. She hasn't fallen once since she has been home. After several weeks, they moved her closer to the desk after she fell so many times. I know they were having horrible staffing problems.				
	Review of resident #279's compret and the resident required frequent	nensive care plan, dated 7/6/22, showe rounding.	d resident #279 was at risk for falls,		
	During an interview on 2/2/23 at 8:39 a.m., staff member E stated, Management is who follows up on the falls. We can make suggestions, but management is usually who changes the care plans. We are the ones that fill out the fall report, and we can put suggestions on there, but then management does their thing and makes the changes.				
	During an interview on 2/2/23 at 8:53 a.m., staff member Q stated, We don't have time to look at care plans, you have to understand the staffing around here. Hopefully, we get changes in care information from report, but some nurses are good at giving report, and others are not. I usually just ask the resident how they transfer or what kinds of things we do for them. Like I said, I don't know most of the residents on this hall, so it is easier to just ask them. If a resident has a fall, PCC will put up an alert task for extra charting for three days. The alert does not tell you if there is anything to be done differently to prevent falls. It just means we have more to chart.

	4. Review of resident #24's Facility Reported Incident, sent to the State Survey Agency, dated 8/13/22, showed the resident was given a hot cup of coffee during the lunch meal, and it spilled onto his lap. The liquid burn resulted in blisters to both of his inner thighs. The on-call physician was notified.

F 0689 Level of Harm - Actual harm Residents Affected - Some	Review of resident #24's facility investigation, not dated, showed Initially the burns were not painful, just slight discomfort noted. However, they became painful as the days passed, and on 8/20/22 the resident went to the ER. (for the burns) The intervention initiated was for the resident to have hot liquids with a lid. The staff were unable to determine where the coffee came from. The nurse who delivered the coffee to the resident said it came from the unit coffee pot. The CNA working the floor stated the coffee in the pot was cold, and the nurse must have put the coffee in the microwave. The nurse stated she did not put the coffee in the microwave.

F 0725 Level of Harm - Actual harm Residents Affected - Some	residents said the call lights had a long wait time to be answered.			
	like to have more showers, but the			
	Review of resident #21's comprehensive care plan, dated 4/5/18, showed resident #21 preferred threshowers per week.			
	Review of resident #21's bath record, from 1/1/23 to 1/31/23, showed resident #21 received eight showers out of 27 opportunities, and there were no refusals documented.			
	During an interview on 2/1/23 at 1:54 p.m., resident #229 stated, There has been four times I pissed my pants waiting for them to help. NF5 said resident #229 has never had a problem with incontinence. She stated he just can't wait that long all the time. She stated he waited for a long time when he used his call light; and sometimes, they came in and told him there were other people ahead of him, and turned the call light off.			
	During an interview on 2/1/23 at 9:26 a.m., resident #230 stated, I was having to wait too long to go to the bathroom, so I had to become self-sufficient in here (the facility). Some days I feel neglected here. Last night, they only gave me chicken. When I asked for some salad, they told me the kitchen was closed. One nurse brought me the wrong inhalers because there is another resident with the same initials as me. I cry at least one time a day over something going on here. I had to wait 45 minutes for my pain medication last night. I don't get showers on a consistent schedule. They said we would get showers twice a week. I refused showers a couple of times, but that was because I was in too much pain, and they had not given me my pain medication on time. They did not come back and offer another shower after the medication kicked in. There just isn't enough staff here to take care of all of us.			
	Review of resident #230's late medication audit, dated from 1/1/23 through 1/31/23, showed resident #230's oxycodone was over one hour late 24 times and over 30 minutes late 36 times.			
	Review of resident #230's bath record, dated from 1/12/23 through 1/31/23, showed the resident received two showers, and refused two showers, out of five opportunities.

F 0725 Level of Harm - Actual harm Residents Affected - Some	During an observation and interview, on 1/31/23 at 9:40 a.m., resident #235 stated, I have only had one shower, and I am supposed to get one two times a week. Resident #235 said she was admitted to the facility on [DATE]. Resident #235 stated, I feel hot and sweaty, and I get sinus headaches when I don't get a shower often enough. They don't even give us a bed bath. I asked once, and they told me they were too busy. I get told there are 'two or three people ahead of you,' when I use my call light. Resident #235's hair appeared unkempt and had a hair clip that was falling out.				
	Review of resident #235's bathing record, dated from 1/10/23 through 1/31/23, showed the resident received two showers out of seven opportunities.				
	During an interview on 2/2/23 at 8:53 a.m., staff member Q stated, We don't have time to look at care plans. You have to understand the staffing around here. I had to take over this cart (medication) in the hall that I don't know hardly anyone, and there is over twenty people here that I have to give meds to. Most nurses won't even do this job anymore because it is just too hard since there isn't enough staff. Hopefully, we get changes in care information from report, but some nurses are good at giving report, and others are not. Sometimes we don't even have time for any report. I usually just ask the resident how they transfer or what kinds of things we do for them.				
	Review of the Resident Council Minutes, dated 8/8/22, showed the residents stated they were turning their call lights on, and not getting a timely response. They also stated they felt bad when reporting grievances related to the concerns.				
	Review of the Resident Council Minutes, dated 9/8/22, showed Less and less showers are being given.				
	Review of the Resident Council Minutes, dated 10/3/22, showed Copper [NAME] - only 1 CNA, need more help.				
	Review of the Resident Council Minutes, dated 11/10/22, showed the call lights were getting turned off, and then staff left. This is still happening. Review of the Resident Council Minutes, dated 1/12/23, showed Call lights are getting turned off by CNA's, leave and don't return. Residents are having to wait too long for their call lights.				
		50 p.m., staff member A stated it was tl uncil concerns, but she may need to pr

F 0760	Ensure that residents are free from significant medication errors.				
Level of Harm - Actual harm	41652				
Residents Affected - Few	Based on observation, interview, and record review, the facility failed to ensure a resident was free from significant medication errors for 1 (#432) of 1 sampled resident, which resulted in a resident experiencing a seizure related to the cumulative effect of the wrong dose for three days. Findings include:				
	1. Review of an incident reported to the State Survey Agency, dated 7/17/22, showed resident #432 was administered an incorrect dosage of aripiprazole, an antipsychotic medication, on 7/14/22, 7/15/22, and 7/16/22, and experienced seizure-like activity on 7/17/22.				
	Review of the investigative file associated with resident #432s medication incident, provided by the facility on 1/31/23, showed the following events:				
	- resident #432's discharge orders from acute care, dated 7/13/22, showed an order for aripiprazole 5 mg tablet, Take 1 tablet by mouth every day 7 days, then take 2 tab(s) by mouth daily thereafter,				
	- resident #432's physician orders, dated 7/13/22, and entered into the EMR by staff member F on 7/13/22 at 4:09 p.m., showed aripiprazole, Give 5 mg by mouth one time a day related to OTHER SYMPTOMS AND SIGNS INVOLVING COGNITIVE FUNCTIONS AND AWARENESS (R41.89) for 7 Days AND Give 10mg by mouth one time a day related to .(R41.89),				
	- resident #432's MAR, dated July of 2022, showed the resident received a total of 15 mg of aripiprazole on 7/14/22, 7/15/22, and 7/16/22, and				
	the aripiprazole order was entered	gress note, dated 7/17/22, showed the resident had a seizure on 7/17/22 and tered incorrectly resulting in a larger dose being administered, the aripiprazole sident's anti-seizure medication was restarted.			
	Review of resident #432's nursing progress note, dated 7/17/22, showed the resident had been ta Keppra (an anti-seizure medication) recently, and the provider was unable to determine if the seiz adverse reaction to the high dose of aripiprazole or the recent tapering of Keppra.				
	During an interview on 2/1/23 at 4:38 p.m., staff member B stated the incident was investigated by the previous DON who was no longer employed by the facility. Staff member B stated the entry error by staff member F resulted in a larger dose of aripiprazole being given to resident #432. Staff member B stated admission orders were supposed to be double checked by a second licensed nurse, and there was no documentation showing the double check had occurred. Staff member B stated she had left a message with the consultant pharmacist, but had not heard anything back regarding why the entry error was not identified during the medication regimen review which was done shortly after admission.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0808 Level of Harm - Minimal harm or potential for actual harm	Ensure therapeutic diets are prescribed by the attending physician and may be delegated to a registered or licensed dietitian, to the extent allowed by State law. 33796			
Residents Affected - Few	Based on observation, interview, and record review, the facility failed to provide food with the correct and safe diet texture, as ordered by the physician, placing the resident at risk for choking and inadequate intake for 1 (#33), of 8 sampled residents. Findings include: Review of resident #33's physician diet order, dated 4/26/22, showed Level 2 mechanical soft solids, mince meats with gravy. During an observation of lunch, on 1/31/23 at 12:50 p.m., resident #33 received a whole rice krispee bar, which she could not eat. She was observed to have no teeth. Review of the menu spreadsheet for the lunch meal showed residents on a Dysphagia level 2 diet texture			
	should receive a pureed or slurried peanut butter cookie instead of the rice krispee bar. During an observation on 1/31/23 at 5:29 p.m., resident #33 received regular green beans, with no modification to the beans, as the side dish. The menu spreadsheet showed the Dysphagia level 2 diet should have received a soft and chopped or mashed vegetable.			
	During an observation of breakfast on 2/1/23 at 8:30 a.m., resident #33 received an English muffin sandwich with a whole slice of ham. She was unable to eat the sandwich, and had it torn apart with her fingers on the table and the plate. She was attempting to gum the pieces of the sandwich.			
	Review of the facility menu spreadsheet, for the breakfast meal, on 2/1/23, showed residents on a Dysphagia level 2 diet should receive a pureed breakfast sandwich.			
	During an observation and interview of lunch on 2/1/23 at 12:32 p.m., resident #33 received turkey that was served in one inch chunks. She was attempting to eat the turkey and could not. She tried to cut the turkey with a knife while she held the turkey piece in her hand. She stated she could not cut the turkey. Staff member Y was requested to come to the table to look at resident #33's turkey. She stated the family had signed a waiver to allow the resident to eat a regular textured diet. She did not know why the physician diet order did not reflect the regular texture.			
	The facility was not able to provide a waiver for #33's upgrade in texture for her meals.
