(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0550</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Honor the resident's right to a dignified existence, self-determination, communication, and to exercise his or her rights.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 32503</p> <p>Based on observations, resident interviews, staff interviews and record review the facility failed to 1) respond to the call bell when toileting assistance was required resulting in a resident who was occasionally incontinent becoming soiled causing the resident to feel frustrated and upset; 2) respond to a resident's need to go to bed and alleviate pain by not answering the call light for 40 minutes; and 3) stood up over a resident at the bedside while providing eating assistance for 3 of 3 residents (Residents #14, #6, & #16) reviewed for dignity.</p> <p>The findings included:</p> <p>1. Resident #14 was admitted to the facility on [DATE]. Her diagnoses included Diabetes, muscle weakness and amyotrophic lateral sclerosis (ALS).</p> <p>The quarterly Minimum Data Set assessment dated [DATE] reported Resident #14 was cognitively intact. She required extensive assistance for toileting and transfers. Resident #14 required staff assistance for moving on and off the toilet. She was occasionally incontinent of bowel and bladder.</p> <p>The care plan revised on 1/3/22 indicated Resident #14 had an alteration in musculoskeletal status related to ALS. The interventions included Anticipate and meet needs. Be sure call light is within reach and respond promptly to all request for assistance. The care plan also indicated Resident #14 had an ADL (Activities of Daily Living) self-care performance deficit related to her disease process of ALS. The intervention included Toilet Use: The resident requires extensive assistance by staff for toileting.</p> <p>On 6/13/22 at 4:02 PM Resident #14 stated she had to wait over an hour to go to the bathroom. She said she used her call bell to ask for assistance, but no one came to provide her assistance to the bathroom. She said she did not remember the exact date but had it in a text message on her telephone. She explained the time of the text messages verified the length of time she had to wait before anyone came to assist her to the bathroom.</p> <p>On 6/14/22 at 5:26 PM a review of the text messages on Resident #14's telephone revealed on 4/3/22 no one responded to her call bell for over an hour and a half (messages at 8:59 am and 10:37 am), and she had a bowel movement on herself due to no one responding to her call bell.</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0550</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>On 6/14/22 at 5:26 PM during an interview Resident #14 stated having a bowel movement on herself made her feel upset. She stated she was frustrated and more concerned about the damage it could cause to have stool in and around her peritoneal area which could cause some infection or lead to an ulcer.</p> <p>A review of the Nursing Assignment for 4/3/22 revealed only Nursing Assistant (NA) #4 and NA #5 worked on the 7:00 AM -3:00 PM shift.</p> <p>Attempts to interview NA #4 and NA #5 were unsuccessful.</p> <p>On 6/17/22 at 10:10 AM Scheduler #1 stated she was a nursing assistant and on 4/3/22 worked the 3:00 PM - 11:00 PM shift. She stated she was not aware of Resident #14 having soiled herself that day.</p> <p>On 6/16/22 at 3:45 PM the Assistant Director of Nursing reported she was unaware Resident #14 had soiled herself due to her call bell not being answered.</p> <p>37468</p> <p>2. Resident #6 was admitted to the facility on [DATE]. The resident's active diagnoses included stroke, anemia, coronary artery disease, spinal stenosis of lumbar region with neurogenic claudication, and lower back pain.</p> <p>Resident #6's Minimum Data Set assessment dated [DATE] revealed she was assessed as cognitively intact and had no behaviors. She required extensive assistance with bed mobility and transfers.</p> <p>Resident #6's care plan dated 3/31/22 revealed she was care planned to have an activities of daily living self-care performance deficit related to activity intolerance, confusion, and impaired balance. The interventions included the resident required extensive assistance by staff for transfers.</p> <p>During a continuous observation on 6/13/22 from 2:45 PM - 3:28 PM, Resident #6's call light was observed on. Resident #6 was observed up in her wheelchair in her room watching TV. The resident stated to the surveyor that her legs would get tired and start hurting around 3:00 PM when she was up in her wheelchair. She stated it was okay if the surveyor observed how long it would take for staff to answer her call bell. She stated it would probably be a while because she would request to go to bed and sometimes it took 'hours.' She stated she told the nurse about five minutes ago that she was in pain and needed to be put to bed which always alleviated the pain to her legs from being in the chair all day. Resident #6 stated the nurse gave her some pain medication and then informed her she would get the nurse aide. She stated she had considered going on the hall to find someone but she self-propelled with her feet and she believed it would cause her more pain to find someone than to wait for an hour. The resident stated her pain was at a 5 out of 10 which she considered bearable but being left in the chair made her feel uncomfortable. Resident #6 concluded she would let the surveyor know if the pain became unbearable and needed the surveyor to find staff for her but would rather the surveyor see how long it took for the call light to be answered.</p> <p>(continued on next page)</p>

<p>F 0550</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>The continuous observation continued and on 6/13/22 at 3:24 PM Nurse Aide #2 entered the resident's room and asked what Resident #6 needed. Resident #6 informed the nurse aide she needed to go to bed. The nurse aide went to find another staff to assist, and Resident #6 was put in bed at 3:28 PM. Nurse Aide #2 stated she was not Resident #6's nurse aide but she had noted the call light was on, so she was helping. She did not know where the resident's nurse aide or nurse was.</p> <p>During an interview on 6/13/22 at 4:07 PM Nurse Aide #1 stated she was Resident #6's nurse aide. She further stated she was unaware of Resident #6's call light being on because she had a split assignment and was on another hall, she then checked the halls before going to break at 3:00 PM. She stated she did not know how she missed her light was on at 2:45 PM as she had checked the hallways prior to break. She stated breaks lasted 30 minutes, so the issue was resolved before she returned to the hall. She concluded from 2:45 PM to 3:24 PM was too long for a call light to be on and it should have been answered immediately or within five minutes depending on if she was with another resident.</p> <p>During an interview on 6/13/22 at 4:09 PM Nurse #1 stated she was Resident #6's nurse. She further stated call lights were to be answered as soon as they were noted to be on. She stated a call light being unanswered from 2:45 PM to 3:24 PM was too long for a call light to remain unanswered. She stated she went to break at 3:00 PM and it was a thirty-minute break which was why she had not identified Resident #6 had her light on.</p> <p>During an interview 6/13/22 at 4:16 PM the Director of Nursing stated 40 minutes was not an acceptable amount of time for a resident to wait on a call light and that staff responsible for the same residents should coordinate their breaks to be staggered in order to have someone monitoring the hall during the other staff member's break.</p> <p>40200</p> <p>3. Resident #16 was admitted to the facility on [DATE] with diagnoses which included non-Alzheimer's dementia and dysphagia (difficulty swallowing foods or liquids).</p> <p>The quarterly Minimum Data Set indicated Resident #16 had severe cognitive impairment and was totally dependent on staff for eating.</p> <p>On 6/13/22 at 12:45 PM an observation was made of Nurse Aide (NA) #2 standing at Resident #16's bedside while feeding the resident her lunch. The resident's head of bed was in an upright position and the NA stood above the resident's eye level during the dining experience. There was no chair in the room for the NA to use.</p> <p>On 6/13/22 at 12:54 PM an interview was conducted with NA #2 who stated she had never been trained to sit while feeding a resident.</p> <p>On 6/13/22 at 12:59 PM an interview was conducted with the Director of Nursing (DON) stated that staff should know to sit while feeding a resident and she did not know why the NA had not done so.</p> <p>On 6/15/22 at 3:31 PM an interview was conducted with the Administrator who stated that staff should not stand to feed a resident and he did not know why this had occurred.</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0657</p> <p>Level of Harm - Potential for minimal harm</p> <p>Residents Affected - Some</p>	<p>Develop the complete care plan within 7 days of the comprehensive assessment; and prepared, reviewed, and revised by a team of health professionals.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 32503</p> <p>Based on resident and staff interviews and record review the facility failed to update the care plan for over a year when a resident (Resident #20) no longer received palliative care. This was for 1 of 5 residents reviewed for unnecessary medications.</p> <p>The findings included:</p> <p>Resident #20 was admitted to the facility on [DATE]. Her diagnoses included emphysema, chronic obstructive pulmonary disease, and arthritis.</p> <p>The quarterly Minimum Data Set assessment dated [DATE] revealed Resident #20 was moderately cognitively impaired.</p> <p>The care plan revised on [DATE] indicated the advance directive was DNR (Do Not Resuscitate), Palliative services in place. The care plan indicated the name of the palliative care provider.</p> <p>On [DATE] at 4:42 PM Resident #20 stated she did not have any family left since her daughter got sick and could no longer care for her. She said she was going to continue to live at the facility until she died .</p> <p>A review of Resident #20's record revealed notes from the nurse practitioner and the facility physician. None of the notes indicated Resident #20 was on palliative care.</p> <p>On [DATE] at 9:39 AM the Social Worker stated Resident #20 was not on palliative care. He stated he called the palliative care provider and confirmed Resident #20's palliative care was discontinued on [DATE]. He said the care plan was not accurate and he was unsure why or how it was not changed on the care plan when it was revised on [DATE], but he would fix it.</p> <p>On [DATE] at 8:45 AM the Administrator stated the care plan should have been updated when the resident palliative care was stopped.</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0684</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Provide appropriate treatment and care according to orders, resident's preferences and goals.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40200</p> <p>Based on observations, record review, and resident, staff, and Physician interviews, the facility failed to obtain orders and provide treatment of a right heel vascular ulcer (Resident #53) for 1 of 1 resident reviewed for wound care.</p> <p>Findings included:</p> <p>Resident #53 was admitted to the facility on [DATE]. She had diagnoses which included congestive heart failure, Diabetes Mellitus and renal insufficiency.</p> <p>Review of Resident #53's hospital discharge instructions dated 4/11/22 read, in part, to apply Medihoney to right heel ulcer. Medihoney is a gel wound dressing.</p> <p>The admission Minimum Data Set (MDS) dated [DATE] indicated Resident #53 was cognitively intact and required limited or extensive assistance for most activities of daily living. Her MDS was also coded to have no behaviors and to have 1 stage 3 pressure ulcer present on admission, 1 venous ulcer, and 1 surgical wound present on admission.</p> <p>Resident #53's admitting daily skin assessment dated [DATE] read, in part, that resident had a vascular right lateral leg wound. No wound measurements were included.</p> <p>Resident #53's wound care consultant note dated 4/12/22 read, in part, that the right foot was wrapped with kerlix (gauze bandage) with drainage on the bandage.</p> <p>Physician's orders revealed an order dated 4/18/22 for right heel vascular ulcer to be cleansed with wound cleanser, apply silver alginate (an absorbent antimicrobial dressing) and cover with gauze and kerlix wrap every day shift for wound care.</p> <p>Resident #53's Treatment Administration Record (TAR) for April 2022 revealed this order was signed as completed on 4/19, 4/20, 4/21, 4/22. There were no signatures on 4/18 or 4/23.</p> <p>An interview on 6/14/22 at 2:25 PM with the Wound Care Nurse revealed she first observed Resident #53's right heel wound on 4/18/22. She stated she initiated wound care orders and put a note in the Physician's communication book to notify him of the wound. She stated she completed the dressing change for the right heel wound on 4/18/22 and must have forgotten to sign the TAR. The Wound Care Nurse stated she only worked part-time so was unable to say when or if she had seen the wound before or when the dressing had been changed.</p> <p>An interview on 6/16/22 at 9:24 AM with Nurse #2 revealed she was responsible for wound care on 4/23/22 and did not remember if she had changed Resident #53's wound dressings or not. She stated if she had changed the dressing, she would have signed it.</p> <p>An interview on 6/15/22 at 4:29 PM with the Physician revealed he did not remember if he was notified of Resident #53's right heel vascular wound. He stated he expected the facility to follow hospital orders or notify him if they had questions.</p> <p>(continued on next page)</p>

<p>F 0688</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Provide appropriate care for a resident to maintain and/or improve range of motion (ROM), limited ROM and/or mobility, unless a decline is for a medical reason.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40200</p> <p>Based on observations, record review, and resident, staff, and Physician interviews, the facility failed to follow Physician orders to apply a right-hand splint daily (Resident #12) for 1 of 1 resident reviewed for range of motion.</p> <p>Findings included:</p> <p>Resident #12 was admitted to the facility on [DATE] with diagnoses which included traumatic brain injury and hemiplegia.</p> <p>The quarterly Minimum Data Set (MDS) dated [DATE] indicated Resident #12 had moderately impaired cognition and required limited or extensive assistance for most activities of daily living. Her MDS was also coded to have no behaviors or rejection of care. She was coded to have a right upper extremity impairment on one side.</p> <p>Resident #12's care plan last revised on 4/12/22 revealed a focus on limited physical mobility related to impaired balance and hemiparesis. This focus had an intervention which included for resident to have a light blue resting hand/wrist splint applied daily for 4 continuous hours as resident allows with a skin inspection before and after splint application.</p> <p>Resident #12's Treatment Administration Record (TAR) for May 2022 revealed an order to apply the right resting hand/wrist splint daily for 4 continuous hours and to inspect the skin before and after the splint application. Further review of the May TAR revealed Nurse #2 had signed this order as completed 8 times. Review of the May TAR also revealed the Wound Care Nurse had signed this order as completed 10 times. There were also 7 days that this splint order had no signature as being completed.</p> <p>Resident #12's TAR for Jun 2022 from June 1 through Jun 15, 2022, revealed that Nurse #2 had signed the right-hand splint order as completed 7 times, the Wound Care Nurse had signed as completed 4 times, and 1 day with no signature.</p> <p>Resident #12's nurses' progress notes revealed no documentation that the resident refused to wear the right-hand splint.</p> <p>An observation on 6/14/22 at 8:14 AM revealed the right-hand splint was laying on the bedside table.</p> <p>An observation and interview on 6/14/22 at 8:46 AM with Resident #12 revealed she was not wearing her splint. Further observation revealed the splint lying on top of the bedside table and not within the resident's reach. Resident #12 stated the staff did not put the splint on her right hand and she did not refuse to wear the splint.</p> <p>An interview on 6/15/22 at 11:43 AM with the Wound Care Nurse revealed she had never seen Resident #12's right-hand splint and had never applied it. She stated that she should have looked for the splint and applied it as ordered.</p> <p>(continued on next page)</p>

<p>F 0692</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Provide enough food/fluids to maintain a resident's health.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 32503</p> <p>Based on observations, record review and consultant Registered Dietitian and facility staff interviews the facility failed to provide the tube feeding as ordered and failed to put in interventions for significant weight loss for 1 of 1 resident (Resident #5). Resident #5 experienced a significant weight loss of 13.9 percent in 2 months.</p> <p>The findings included:</p> <p>Resident #5 was admitted to the facility on [DATE]. His diagnoses included cerebral infarct, gastrostomy feeding tube, and aphasia.</p> <p>The current Care Plan revised on 12/22/21 indicated Resident #5 had potential for nutritional risk related to receiving 100% of nutrition via PEG (percutaneous endoscopic gastrostomy) tube. The interventions included observe/report to MD (physician) PRN (as needed) signs/symptoms of malnutrition .significant weight loss.</p> <p>The current physician order dated 2/1/21 read, (Commercial nutritional tube feeding formula) 1.5 calories liquid, Give 75 ml/hr. (milliliters per hour) via G-tube (gastrostomy tube) every day and night shift. Off from 10:00 AM to 12:00 PM.</p> <p>The quarterly Minimum Data Set assessment dated [DATE] revealed Resident #5 had no speech. He was assessed as severely cognitively impaired and totally dependent for all activities of daily living. He had range of motion impairment on both upper extremities. He had no significant weight loss.</p> <p>A progress note dated 5/26/22 written by Registered Dietitian (RD) #2 read in part, current body weight (CBW) 176.1 pounds. Despite current regiment exceeding his estimated nutritional needs he triggers for new onset of significant weight loss of 28.5#s (pounds) (13.9%) X (times) 2 months. No signs or symptoms of intolerance. The recommendations were to 1) stop the current commercial nutritional tube feeding formula and to 2) restart the same formula at a rate of 80 ml/hr for 22 hours. Off at 10:00 AM, on at 12:00 PM/noon plus to 3) re-weigh resident and 4) obtain weekly weights x 4 weeks.</p> <p>An observation of the feeding pump on 6/15/22 at 2:43 PM revealed the feeding pump was off.</p> <p>Observations on 6/16/22 revealed the feeding pump was off from 1:00 PM until 3:30 PM when the Assistant Director of Nursing (ADON) entered the room to restart the tube feeding.</p> <p>A progress note from the ADON on 6/16/22 documented she restarted the tube feeding at 3:45 PM and notified the Nurse Practitioner (NP) of the tube feeding not being restarted at 12:00 PM as the current order specified. The ADON also documented she notified the NP that Resident #5 ' s had weight loss.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0692 Level of Harm - Actual harm Residents Affected - Few	<p>RD #2 was interviewed via telephone on 6/16/22 at 4:30 PM. RD #2 stated she had made recommendations to increase the rate of the tube feeding formula due to weight loss identified on her visit on 5/26/22. She said the order to have the feedings held for 2 hours from 10:00AM until 12:00PM was in place prior to her contract as RD for this facility. She stated if the tube feeding was not infusing for 22 hours Resident #5 could experience weight loss. RD #2 added it was not good for Resident #5 not to receive the full amount of formula because it was his sole source of nutrition and could contribute to weight loss.</p> <p>On 6/17/22 at 10:50 AM the DON stated the tube feeding should have been restarted based on the orders. She added the Unit Manager was the person who turned off Resident #5 ' s tube feeding on 6/16/22 but she forgot to restart the tube feeding.</p>

<p>F 0693</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Ensure that feeding tubes are not used unless there is a medical reason and the resident agrees; and provide appropriate care for a resident with a feeding tube.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 32503</p> <p>Based on observations, staff interviews and record review the facility failed to provide the residents tube feeding according to the physician's orders for 1 of 1 resident (Resident #5) reviewed for tube feeding. Resident #5 experienced significant weight loss of 13.9 percent.</p> <p>The findings included:</p> <p>Resident #5 was admitted to the facility on [DATE]. His diagnoses included cerebral infarct, gastrostomy feeding tube, and aphasia.</p> <p>Resident #5's Care Plan last reviewed on 12/22/21 indicated he required tube feeding related to dysphagia. The interventions included, See MAR (medication administration record) for current feeding orders. The Care Plan also indicated Resident #5 had the potential for nutritional risk related to receiving 100% of nutrition via PEG (percutaneous endoscopic gastrostomy) tube. The interventions included observe/report to MD (physician) PRN (as needed) signs/symptoms of malnutrition .significant weight loss.</p> <p>A record review revealed a progress note dated 1/20/20 by Registered Dietitian (RD) #1 which read in part, resident may benefit from time off of tube feeding. The recommendation read to change the tube feeding to run for 22 hours and to be off from 10:00 AM until 12:00 PM.</p> <p>The current physician order dated 2/1/21 read, (Commercial nutritional tube feeding formula) 1.5 calories liquid, Give 75 ml/hr. (milliliters per hour) via G-tube (gastrostomy tube) every day and night shift. Off from 10:00 AM to 12:00 PM.</p> <p>The quarterly Minimum Data Set assessment dated [DATE] revealed Resident #5 had no speech. He was assessed as severely cognitively impaired and totally dependent for all activities of daily living. He had range of motion impairment on both upper extremities. He had no significant weight loss.</p> <p>A progress note dated 5/26/22 written by RD #2 read in part, despite current regiment exceeding his estimated nutritional needs he triggers for new onset of significant weight loss of 28.5#s (pounds) (13.9%) X (times) 2 months.</p> <p>On 6/15/22 at 2:43 PM the feeding pump was observed to be off. There was no feeding infusing and the pump screen was no illuminated.</p> <p>On 6/16/22 at 1:00 PM the feeding pump was observed to be off.</p> <p>On 6/16/22 at 1:43 PM the feeding pump was observed to be off.</p> <p>On 6/16/22 at 2:22 PM the feeding pump was observed to be off.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0693</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>On 6/16/22 at 2:23 PM the Medication Aide #1 assigned to the hall of Resident #5 stated she was not responsible for the tube feeding because she was Medication Aide. She stated she was not sure who turned the feeding pump off and she does not do anything with tube feedings.</p> <p>On 6/16/22 at 2:54 PM the feeding pump was observed to be off.</p> <p>On 6/16/22 at 2:57 PM the Nurse #2 who was the only nurse scheduled on 6/16/22 on the 7:00 - 3:00 PM shift was observed talking on the telephone at the nursing station.</p> <p>On 6/16/22 at 3:22 PM the feeding pump was observed to be off. The Director of Nursing (DON) was present in the room for this observation. The DON stated the Medication Aide did not have any responsibility for the tube feeding and it would be the supervising nurse who would be taking care of the tube feeding for Resident #5. She stated today it was Nurse #2. When the DON was informed by Medicatin Aide #1 that Nurse #2 had gone on break, she said the Assistant DON would be next in command of responsibility for Resident #5.</p> <p>On 6/16/22 at 3:28 PM the Assistant DON said it was Nurse #2 who as responsible for Resident #5's tube feeding. The Assistant DON said she would turn his pump back on, but she needed to flush it first and check his orders. She stated she was not the nurse who turned the pump off and she did not know what time it was turned off.</p> <p>On 6/16/22 at 4:51 PM Nurse #2 stated she was aware Resident #5's tube feeding was off for 2 hours each day, but she did not remember the exact time it was to be turned off or on. She stated she did not turn off his feeding today and was not aware of who was responsible for his care today. She stated she gave Resident #5 his scheduled morning medications, but she did not check his finger stick for blood sugar monitoring. She said there were usually 2 nurses and 1 medication aide scheduled during the week. One nurse worked the 100 hall and 1 nurse worked the 300 hall. She said today she was responsible for all of the 100 & 300 halls. She added she did not turn Resident #5's feeding pump off but she was blamed for not turning it back on. She said she did not remember it being on when she gave Resident #5 his morning medications.</p> <p>The RD #2 was interviewed via telephone on 6/16/22 at 4:30 PM. RD #2 stated she had made recommendations to increase the rate of the tube feeding formula due to weight loss identified on her visit on 5/26/22. She said the order to have the feedings held for 2 hours from 10:00AM until 12:00PM was in place prior to her contract as RD for this facility. She stated if the tube feeding was not infusing for 22 hours Resident #5 could experience weight loss. RD #2 added it was not good for Resident #5 not to receive the full amount of formula because it was his sole source of nutrition and could contribute to weight loss.</p> <p>On 6/17/22 at 10:50 AM the DON stated the tube feeding should have been restarted based on the orders.</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0842</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>An interview on [DATE] at 2:25 PM with the Wound Care Nurse revealed she first observed Resident #53's right heel wound on [DATE]. She stated she completed the dressing change for the right heel wound on [DATE] and must have forgotten to sign the TAR. The Wound Care Nurse stated she only worked part-time so was unable to say when or if she had seen the sacrum pressure ulcer or left foot wounds before or when the dressings had last been changed. The Wound Care Nurse was unable to say whether or not she had completed the resident's wound care on the days the TAR had not been signed.</p> <p>An interview on [DATE] at 9:24 AM with Nurse #2 revealed she was responsible for wound care on [DATE] and [DATE] and did not remember if she had changed Resident #53's wound dressings or not. She stated if she had changed the dressing, she would have signed it.</p> <p>An interview on [DATE] at 1:43 PM with Nurse #1 revealed she was responsible for wound care on [DATE] and [DATE]. She stated she completed wound care but forgot to sign it.</p> <p>An interview on [DATE] at 3:01 PM with the Director of Nursing (DON) revealed that Resident #53 should have been assessed with documented wound measurements and wound care orders initiated on admission for her right heel wound. She stated she did not know why her right heel wound had no treatment orders until [DATE] or why her wound care treatment had been missed on [DATE]. The DON revealed she expected staff to complete wound care prior to signing as completed. She stated that staff should not sign an order as completed if they had not done so.</p> <p>An interview on [DATE] at 3:33 PM with the Administrator revealed he was not at the facility in April and was unaware of Resident #53. He stated he expected the facility to follow established policies and procedures regarding wound care.</p> <p>2. Resident #12 was admitted to the facility on [DATE] with diagnoses which included Diabetes Mellitus.</p> <p>The quarterly Minimum Data Set (MDS) dated [DATE] indicated Resident #12 had moderately impaired cognition and required limited or extensive assistance for most activities of daily living. Her MDS was also coded to have no behaviors or rejection of care. She was coded to have a right upper extremity impairment on one side.</p> <p>Review of Resident #12's care plan last revised on [DATE] revealed a focus on limited physical mobility related to impaired balance and hemiparesis. This focus had an intervention which included for resident to have a light blue resting hand/wrist splint applied daily for 4 continuous hours as resident allows with a skin inspection before and after splint application.</p> <p>Review of Resident #12's Treatment Administration Record (TAR) for [DATE] revealed an order to apply the right resting hand/wrist splint daily for 4 continuous hours and to inspect the skin before and after the splint application. Further review of the May TAR revealed Nurse #2 had signed this order as completed 8 times. Review of the May TAR also revealed the Wound Care Nurse had signed this order as completed 10 times. There were also 7 days that this splint order had no signature as being completed which were ,d+[DATE], ,d+[DATE], ,d+[DATE], ,d+[DATE], ,d+[DATE], ,d+[DATE].</p> <p>Review of Resident #12's TAR for Jun 2022 from [DATE] through Jun 15, 2022, revealed that Nurse #2 had signed the right-hand splint order as completed 7 times, the Wound Care Nurse had signed as completed 4 times, and 1 day with no signature ([DATE]).</p> <p>(continued on next page)</p>

<p>F 0842</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>Review of Resident #12's nurses' progress notes revealed no documentation that the resident refused to wear the right-hand splint.</p> <p>An observation on [DATE] at 8:14 AM revealed the right-hand splint was laying on the bedside table.</p> <p>An observation and interview on [DATE] at 8:46 AM with Resident #12 revealed she was not wearing her splint. Further observation revealed the splint lying on top of the bedside table and not within the resident's reach. Resident #12 stated the staff did not put the splint on her right hand and she did not refuse to wear the splint.</p> <p>An interview on [DATE] at 11:43 AM with the Wound Care Nurse revealed she had never seen Resident #12's right-hand splint and had never applied it. She was unable to state why she had signed the order as completed on the TAR. She stated that she should have looked for the splint and applied it as ordered.</p> <p>An observation and interview on [DATE] at 9:17 AM with Nurse #2 confirmed that Resident #12 was not wearing a right-hand splint. Nurse #2 stated the resident usually refused to wear the splint. Nurse #2 applied the splint to the resident's right hand and stated, I don't know how to do this. Nurse #2 also stated she did not know why she had signed the order as completed on [DATE], 14, 15, 21, 22, 27, 30 and [DATE], 11, 12.</p> <p>An interview on [DATE] at 3:29 PM with the Director of Nursing revealed she expected staff to complete treatments prior to signing as completed. She stated that staff should not sign an order as completed if they had not done so.</p> <p>An interview on [DATE] at 3:33 PM with the Administrator revealed he was not at the facility in April and was unaware of Resident #12. He stated he expected the facility to follow established policies and procedures regarding physician's orders.</p>

<p>F 0880</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Provide and implement an infection prevention and control program.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 37468</p> <p>Based on observations, record review, and staff interviews the facility failed to remove their Personal Protective Equipment (PPE) prior to exiting an isolation room for 1 of 1 resident reviewed for COVID-19 isolation (Resident #155 and Nurse Aide #1).</p> <p>Findings included:</p> <p>The Centers for Disease Control and Prevention (CDC) guideline entitled Interim Infection Prevention and Control Recommendations to Prevent SARS-CoV-2 Spread in Nursing Homes updated 2/2/22 contained the following statements:</p> <p>In general, all residents who are not up to date with all recommended COVID-19 vaccine doses and are new admissions and readmissions should be placed in quarantine, even if they have a negative test upon admission, and should be tested as described in the testing section above; COVID-19 vaccination should also be offered.</p> <p>The CDC guideline entitled Stay Up to Date with Your COVID-19 Vaccines Updated 5/24/22 contained the following statements:</p> <p>You are up to date with your COVID-19 vaccines when you have received all doses in the primary series and all boosters recommended for you, when eligible.</p> <p>Resident #155's COVID-19 vaccination record revealed he received his first dose of the COVID19 vaccine on 3/26/21 and second dose on 4/16/22. He had not received any COVID19 booster doses.</p> <p>Resident #155 was admitted to the facility on [DATE].</p> <p>During observation on 6/14/22 at 8:29 AM Resident #155's room was observed to have PPE at the entrance to his room and signage which read that staff must wear a gown and gloves when entering the room and remove the gown and gloves prior to exiting the room.</p> <p>During observation on 6/14/22 at 8:30 AM Nurse Aide #1 was observed to exit Resident #155's isolation room. The nurse aide had on a N95 mask, face shield, gown, and a glove on her left hand. The nurse aide was observed to walk across the hall to the clean linen cart, open the linen cart with her ungloved hand and reach inside and move some linen on the cart with her ungloved hand. She then returned to the resident ' s room and closed the door. At 8:43 AM the nurse aide exited the room as she removed her gown and glove and rolled it up and walked with the rolled-up PPE in her hands down the 300 hall to the 200 hall, entered the shower room, and discarded her PPE in the 200 hall shower room.</p> <p>During an interview on 6/14/22 at 8:45 AM Nurse Aide #1 stated she was not supposed to exit isolation rooms with PPE on. She further stated the room did not have a trash bag or trash can available, so she first checked to see if the linen cart had any trash bags and when it did not, she then discarded her PPE in the shower room.</p> <p>(continued on next page)</p>

<p>F 0925</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>Make sure there is a pest control program to prevent/deal with mice, insects, or other pests.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 32503</p> <p>Based on observations, interviews with residents and facility staff and record review the facility failed to implement an effective pest control program to control the presence of live flies observed throughout 2 of 3 resident halls.</p> <p>The findings included:</p> <p>A review of the contracted pest control company logs from January 2022 through June 2022 revealed the facility was treated each month for cockroaches and mice. There were no treatments for flies.</p> <p>1a. Resident #35 was admitted to the facility on [DATE]. Her quarterly Minimum Data Set (MDS) revealed she was cognitively intact.</p> <p>On 6/14/22 at 8:18 AM Resident #35 stated she was still trying to sleep but the flies were bothering her. She was observed to swat at a fly that landed on her face 3 times until it landed on the bed linens.</p> <p>b. Resident #47 was admitted to the facility on [DATE]. His quarterly MDS dated [DATE] revealed he was cognitively intact.</p> <p>On 6/14/22 at 8:27 AM Resident # 47 stated the flies were bothering him all the time. He said there were none in his room right now because the nursing assistant killed 5 in his room yesterday. He said he could not remember the nursing assistant's name.</p> <p>c. Resident #5 was admitted to the facility on [DATE]. His quarterly MDS dated [DATE] revealed he had no speech and was rarely/never understood and rarely/never understands. He had range of motion limitations on both upper extremities and was totally dependent on staff for all of his activities of daily living.</p> <p>On 6/15/22 at 8:36 AM a fly was observed in the room of Resident #5. The resident was observed to be unable to shoo the fly due to his physical limitations. He was also nonverbal.</p> <p>On 6/15/22 at 4:15 PM a fly was observed to land on the towel on Resident #5's chest. The fly was present on the towel approximately 30 seconds then it flew away as the nurse walked closer to the resident.</p> <p>d. Resident # 28 was admitted to the facility on [DATE]. His annual MDS revealed he was cognitively intact.</p> <p>On 5/15/22 at 4:47 PM Resident #28 stated the facility had a very large fly problem. He said he purchased his own fly swatter because the flies were so bad in his room. He said the number of flies he saw today were much less than any other day this week. He said the flies have been bad in the facility for the last year.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0925</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>During an interview with the Maintenance Director on 6/15/22 at 3:08 PM he reported the contracted pest control company treated for cockroaches and put out traps for mice and cockroaches. He said the contracted pest control company did not complete any other service and they don't do anything to treat the facility for flies. He reported he had asked his corporate office for permission to add fly prevention services to the contract over a year ago due to the facility having livestock farms on both sides of the facility. He said the corporate office would not agree to add the fly service to the contract with the pest control company. He stated he was aware of the flies being in the building and most were on the 200 hall because more residents were present on that hall. He said fly lights were used to attract and kill the flies with the sticky pad located inside the lights. He reported he changed out the sticky pads monthly. The Maintenance Director added he had just changed the pads today hoping it would help reduce the number of flies. He reported he also had an insect spray he obtained from the contracted pest control company that he could use however it did not correct the fly problem. A review of the instructions on the bottle of insect spray revealed it was designed for immediate kill but had to be sprayed directly on the insect.</p> <p>During an interview on 6/17/22 at 8:58 AM the Administrator stated he worked at the facility since last week on Wednesday and had some concerns with flies in the facility Monday and Tuesday. He stated on 6/15/22 the Maintenance Director spoke to him about his concerns with the flies and they called the pest control company on 6/15/22 to ask them to treat for flies.</p> <p>37468</p> <p>2. Resident #154 was admitted to the facility on [DATE].</p> <p>Review of a brief interview for mental status assessment dated [DATE] revealed she was assessed as cognitively intact.</p> <p>During an interview on 6/13/22 at 4:37 PM Resident #154 stated her only concern at the facility was the fly problem. She stated flies would get on food and in her drinks.</p> <p>During observation on 6/13/22 at 4:39 PM a fly was observed to land on the mouth of the water pitcher's straw for Resident #154. The fly entered the straw briefly and then exited the straw and continued to circle the resident.</p> <p>During an interview on 6/15/22 at 3:12 PM the Maintenance Director stated he was aware the facility had an ongoing fly problem. He requested the fly program from the pest control company but corporate had not approved it so the pest control company only treated for cockroaches and mice. He stated there were fly lights in the facility and he changed the sticky strips monthly. This intervention helped a little bit, but it was not enough as there were still flies in the facility. There were also fly fans at the back entrance and one at the back patio entrance. He stated he had asked a previous administrator to get the fly program added by cooperate, but he was told to do it himself, so he continued to request through his vender.</p> <p>During an interview on 6/17/22 at 8:58 AM the Administrator stated he had been working at the facility since last week and had some concerns with flies in the facility. He stated on 6/15/22 the maintenance director spoke to him about his concerns with the flies and they called the pest control company on 6/15/22 to ask them to treat for flies. He concluded residents should be able to have their food and their drinks without worrying about flies landing on them.</p>
