F 0657 Level of Harm - Minimal harm or	Develop the complete care plan within 7 days of the comprehensive assessment; and prepared, reviewed, and revised by a team of health professionals.			
potential for actual harm	**NOTE- TERMS IN BRACKETS H	AVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 28398	
Residents Affected - Few	THIS IS A REPEAT DEFICIENCY	FROM THE SURVEY COMPLETED O	N 09/23/21.	
	Based on observation, record review, policy review, and resident and staff interview, the facility failed to review and revise the comprehensive care plans to reflect the residents' current status for 2 of 12 sampled residents (Resident #2 and #10). Failure to update the care plans as needed may result in delayed treatmen interventions and inadequate/inconsistent care delivery.			
	Findings include:			
	Review of the facility policy titled Care Plan and Care Conference occurred on 12/08/22. This policy, dated 02/09/17, stated, . The Care Plan will [sic] completed in accordance with the State and Federal guidelines. Each resident is assessed on a quarterly basis by the members of the Care Planning Team. The team members then meet to go over each assessment at least quarterly and at a minimum of two times per year.			
	 Review of Resident #10's medical record occurred on all days of survey. Diagnoses included non-pressure chronic ulcer of other part of right foot with unspecified severity and type 2 diabetes mellitus with other skin ulcer. 			
	Resident #10's physician's orders in	ncluded:		
		4th and 5th toe apply iodine and 2x2 [t veeks if not improving schedule with D		
	* 11/18/22, use silicone spacer bet	ween 4th and 5th toe of right foot one ti	ime a day for ulcer	
	The podiatry consult, dated 11/16/22, stated, dx [diagnosis] diabetic ulcer r. [right] 5th toe, hx [history surgery r. 5th toe. no s/s [sign/symptom] infection, faint pulse bil [bilaterally], debrided ulcer today, sh narrow, causing condition to begin with likely. need wider shoes, use silicone spacer b/t [between] 4-may need surgery in office, f/u [follow-up] 1 month. During an interview on 12/05/22 at 3:57 p.m., Resident #10 stated she had a sore between her 4th a right toes, now healed. The podiatrist told her to wear wider shoes, but she does not like them, but lit current shoes which she thought fit well. Observation showed the resident's laced shoes appeared sher feet. During an interview on 12/08/22 at 12:53 p.m., an administrative nurse (#1) stated Resident #10's ulhealed, the facility notified the resident and family of the podiatrist's recommendation for wider shoes resident refused and family is okay with that.

	The primary care provider note, dated 12/01/22 at 10:30 a.m., stated, . Chief complaint: Re-check bilater feet. History of present illness: The patient is seen today resting comfortably in her wheelchair. The patient had chemical removal of all 10 of her toenails by podiatry two weeks ago. We are doing regular dressing changes and is seen today just to recheck these feet. She does state some mild discomfort with dressing changes, otherwise no pain noted. Assessment: chronic dystrophic toenails, status post chemical matrixectomy [removing the growth area of the nail that is leading to the curved ingrown toenail]. Plan: no sign of any active inflammation or infection currently. We will continue the dressing changes as recommended per podiatry, otherwise will continue to follow for regular scheduled rounds and sooner if a problems arise.			
	The progress notes stated the follo	wing:		
	* 12/1/2022 at 12:27 p.m., . Dr. [name of primary care provider] here and assessed resident's toes due Nursing staff voicing concerns. Toes continue to drain and large [sic] to right foot is quite red. Residen increased pain in her toes also. Dr. [name] will consult Dr. [name of podiatrist] for any further instruction			
	* 12/8/2022 at 9:26 a.m., . Dressing	g change complete, drainage noted. Ac	e wraps applied.	
	During an interview on 12/05/22 at 12:46 p.m., Resident #2 stated her toenails were removed. The resident stated her toes were sore and that her stockings rubbed. She liked when they wrapped them, but she must for that. Observation showed the stockings had dried blood.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0725	Provide enough nursing staff every day to meet the needs of every resident; and have a licensed nurse in charge on each shift.			
Level of Harm - Immediate jeopardy to resident health or safety		HAVE BEEN EDITED TO PROTECT CO		
Residents Affected - Many	Based on review of the Payroll Based Journal (PBJ) Staffing Data Report, information from the complainant, review of nurse staffing schedules, and staff interview, the facility failed to provide the services of a licensed nurse for 24 hours a day, seven days a week, on 48 of 168 days of nursing schedules ([DATE]-[DATE]) reviewed. Failure to schedule a nurse 24 hours a day may result in inefficient or lack of coordination of care/services, limited ability to promptly respond to residents' needs or administrative concerns, and could lead to confusion and/or an adverse outcome in an emergency; therefore, endangering residents' health, safety and well-being.			
	During the on-site recertification and complaint survey, the team determined a potential Immediate Jeopardy (IJ) situation existed on [DATE] at 4:19 p.m. The IJ potential resulted from review of the nurse staffing schedules indicating lack of licensed nurse coverage 24 hours a day. This finding placed residents in immediate danger due to the lack of a licensed nurse present to assess and manage resident health and safety.			
	* [DATE] at 1:45 p.m., During an interview, an administrative nurse (#9) and an administrative staff member (#13) stated the practice to staff a medication aide in place of a nurse from 6:00 p.m. to 10:00 p.m. started sometime in the past year per a prior administrative staff member's suggestion, so management or other nurses would not have to cover those hours. They stated the hospital emergency room (ER) nurses were available to call if needed. The administrative staff member (#13) stated, We have changed that practice now, and will never staff that way again. We have fixed the schedule right away.			
	* [DATE] at 4:19 p.m., The survey discuss potential IJ.	team contacted the State Survey Agend	cy (SSA) to report the findings and	
		ntacted the survey team after discussic ation and verified the presence of IJ.	on with the CMS (Centers for	
	* [DATE] at 5:28 p.m., The survey team notified the assistant director of nursing (ADON), who notified the administrator and director of nursing by phone/email, of the IJ situation, provided them with the IJ template, and requested they develop a plan for removal of the immediate jeopardy.			
	* [DATE] at 6:44 p.m., The ADON presented the IJ removal plan which the survey team reviewed and accepted. The ADON stated the current schedule ended on [DATE] and there were no medication aides scheduled to work alone for that time period. Review of the schedule confirmed this statement.			
	* [DATE] at 10:13 a.m., The survey team verified the facility carried out the IJ removal plan and the survey team removed and reduced the IJ situation from a scope/severity of L or a scope/severity of F.			
	* [DATE] at 2:58 p.m., The SSA no	tified the CMS location of the removal of	of IJ.

Level of Harm - Immediate jeopardy to resident health or safety		ainant stated concern for cares and ass on aide and certified nurse aides sched			
Residents Affected - Many	The facility provided a copy of the nurse staffing schedules for the time period of [DATE] - [DATE]. A review of the schedules identified 48 days the facility scheduled a medication aide instead of a licensed nurse during a portion of the 24-hour day. The facility lacked nurse coverage from 6:00 p.m. to 10:00 p.m. on 45 days and from 7:00 p.m. to 10:00 p.m. on three days. The last day scheduled without a nurse for 24 hours was [DATE].				
	Medical record review of the past four months identified six of 12 sampled residents (Resident #18, #24, #25, #27, #28, and #29) with falls with or without injuries, a resident (#29) on intravenous (IV) antibiotics per a PICC line (peripherally inserted central catheter, a form of IV access) who pulled out the PICC line twice, two residents (#21 and #28) with wander guards of which one resident eloped, and one resident on comfort cares who expired. The nurse staffing schedule showed at the time of the resident's death, only one medication aide and five certified nurse aides scheduled, with one administrative nurse on-call.				
	without a nurse present, the medical	:28 p.m., the ADON stated when a meation aide was supposed to call one of DON stated, I don't think the ER nurse or come in.	the nurse managers before		
	During an interview on [DATE] at 6:09 p.m., a certified nurse aide/medication aide (#14) who worked evenings and nights, stated the last time she worked without a nurse present was last week from ,d+[DATE] p.m. We were told that a nurse from the hospital was available if needed, but were told to call the nurse on-call first. The medication aide clarified the on-call nurse as the facility director of nursing (DON), ADON, or other nurse manager. She stated she never called a hospital nurse for assistance as she always called the DON or ADON first, for example, when a resident needed an as-needed (PRN) medication or questions from family members.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)				
F 0727	Have a registered nurse on duty 8 hours a day; and select a registered nurse to be the director of nurses on a full time basis.				
Level of Harm - Minimal harm or potential for actual harm	28398				
Residents Affected - Some	THIS IS A REPEAT DEFICIENCY FROM THE SURVEY COMPLETED ON 09/23/21. Based on review of the Payroll Based Journal (PBJ) Staffing Data Report, policy review, review of nurse staffing schedules, and staff interview, the facility failed to provide the services of a registered nurse (RN) for eight consecutive hours a day, seven days a week, for six days of the 100-day period from 08/27/22 to 12/04/22. Failure to ensure sufficient, qualified nursing staff are available on a daily basis has the potential to affect the health and safety of all the residents residing in the facility. Findings Include: Review of the facility policy titled RN Coverage occurred on 12/07/22. This policy, dated 03/16/06, stated, . a Registered Nurse will be on duty for 8 consecutive hours every 24 hours. Mountrail Bethel Home will define the 24 hour period of time from 0600-0600. Review of the PBJ Staffing Data Report, for the quarter of July 1 - September 30, 2022, showed the facility triggered for No RN Hours on four different days.				
	The facility provided a copy of the nurse staffing schedules for the time period of June 26 - December 10, 2022. A review of the schedules showed the facility designated RN coverage with an RN scheduled the same shift in the hospital on six weekend days: August 27 and 28, September 25, October 9 and 23, and December 4, 2022.				
	During an interview on 12/07/22 at 10:15 a.m., three administrative nurses (#1, #2, and #9) stated they staffed 8-hour RN coverage with a hospital emergency room RN only as a last resort. The hospital RN was available to call for questions/assistance, but was not physically present in the skilled nursing facility as required. They agreed assigning a hospital RN does not meet the requirement for 8-hour RN coverage.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)				
F 0759	Ensure medication error rates are not 5 percent or greater.				
Level of Harm - Minimal harm or potential for actual harm	28398				
Residents Affected - Few	Based on observation, record review, review of facility policy, and staff interview, the facility failed to ensure a medication error rate of less than five percent for 2 of 5 residents observed during medication administration (Resident #10 and #32). Two medication errors occurred during staff administration of 32 medications, resulting in a 6% error rate. Failure to properly administer medications may result in residents receiving an ineffective dose and experiencing adverse reactions.				
	Findings include:				
	Review of the facility policy titled Insulin Pen occurred on 12/07/22. This policy, dated December 2020, stated, . Attach safety pen needle . Prime the insulin pen: a. Dial 2 units by turning the dose selector clockwise. b. With the needle pointing up, push the plunger, and watch to see that at least one drop of insulin appears on the tip of the needle. If not, repeat until at least one drop appears.				
	Review of the facility policy titled Medication Administration occurred on 12/07/22. This policy, dated December 2020, stated, . Review MAR [Medication Administration Record] to identify medications to be administered. 11. Compare medication source (bubble pack, vial, etc.) with MAR to verify resident name, medication name, form, dose, route, and time.				
	Observation of medication pass showed the following:				
	* 12/06/22 at 11:40 a.m., a nurse (#10) attached a needle to Resident #10's Novolog insulin flex pen, dial the dose to two units, held the pen horizontally and pushed the button to expel the air. The nurse then dia the dose selector to three units prior to administering the insulin to Resident #10. The nurse failed to hold insulin pen upright to prime it or watch for a drop of insulin at the tip of the pen.				
	* 12/07/22 at 8:20 a.m., a nurse (#12) administered magnesium oxide 400 milligrams (mg) from a stock bottle to Resident #32. The medical record showed the order for the resident's magnesium oxide stated 500 mg. The nurse gave an incorrect dose of magnesium oxide to Resident #32.				
	During an interview on 12/07/22 at 3:32 p.m., a nurse (#12) verified 500 mg as the correct magnesium oxide dose.				
	During an interview on 12/07/22 at pens with 2 units, pointing the pen	3:43 p.m., an administrative nurse (#1) upward.	stated staff should prime insulin

F 0880	Provide and implement an infection prevention and control program.				
Level of Harm - Minimal harm or potential for actual harm	46259				
Residents Affected - Few	Based on observation, review of facility policy, and staff interview, the facility failed to follow infection control practices for 1 of 6 sampled residents (Resident #4) observed during perineal care. Failure to follow infection control practices related to hand hygiene has the potential to transmit infections to other residents, staff, and visitors. Findings include:				
	Review of the facility policy titled Hand Hygiene Policy at Mountrail Bethel Home occurred on 12/07/22. This policy, dated December 2020, stated, . All staff will perform proper hand hygiene procedures to prevent the spread of infection to other personnel, residents and visitors. Hand hygiene is indicated and will be performed . Before applying and after removing personal protective equipment (PPE), including gloves. When, during resident care, moving from a contaminated body site to a clean body site. After assistance with personal body functions (e.g., elimination, hair grooming, smoking) .				
Observation of Resident #4 showed the following:					
	* 12/06/22 at 8:53 a.m., two certified nursing assistants (CNAs) (#5 and #6) transferred the resident from wheelchair to bed and completed perineal cares. One CNA (#5) cleansed the rectal area with disposal wipes. The CNA (#5) removed her gloves, applied new gloves, assisted the CNA (#6) to place brief, a adjusted the resident's pants. The CNA (#5) removed her gloves, applied new gloves, and covered the resident with a blanket. The CNA (#5) failed to perform hand hygiene after cleansing the resident's recarea and between glove use.				
	*12/06/22 at 11:13 a.m., two CNAs (#5 and #7) completed perineal cares. One CNA (#5) lowered the resident's pants, removed the brief, cleansed the perineal area with a disposable wipe, and removed her gloves. The CNA (#5) applied new gloves, assisted the CNA (#7) to place brief, and removed her gloves. The CNA (#5) failed to perform hand hygiene after cleansing the resident's perineal area and between glove use.				
	*12/06/22 at 4:11 p.m., two CNAs (#5 and #8) completed perineal cares. One CNA (#8) cleansed the resident's rectal area with a disposable wipe, placed a new brief on the resident, removed her gloves, donned new gloves, and continued to assist CNA (#5) with dressing of the resident. The CNA (#8) failed to perform hand hygiene after cleansing the resident's rectal area and between glove use.				
	During an interview on 12/08/22 at follow the facility's policy regarding	1:57 p.m., two administrative nurses (# hand hygiene.	#1 and #2) confirmed staff failed to
