F 0684 Level of Harm - Actual harm Residents Affected - Few	Telephone interview with CNP #190 on 02/01/23 at 12:51 P.M. revealed on 12/30/22 at approximately 10:30 P.M. she was alerted that FR #73 was hypotensive by the night staff. The CNP ordered immediate blood work which included a complete metabolic pane (CMP), a complete blood count (CBC), and a urinalysis. She also ordered 0.45% normal saline via IV for hydration. The CNP stated the following morning she received a call from LPN #127 who informed her the previous orders were never followed, and FR #73 continued to be hypotensive and lethargic. The CNP decided to send the resident out to be evaluated at the local hospital. CNP #190 revealed it was possible, but hard to say if the hospitalization was a result from FR #73 failing to received the ordered IV fluids.  Interview with the Director of Nursing on 01/18/23 at 10:33 A.M. verified the night nurse on 12/31/22 failed to implement the orders provided from CNP #190. The DON stated The night nurse obviously did nothing.  Review of Resident #57's medical record revealed an admitted [DATE]. Diagnoses included multiple sclerosis, acute kidney failure, pressure ulcer stage three to the buttock, crohns disease with a colostomy, and peripheral vascular disease.  Review of Resident #57's quarterly Minimum Data Set (MDS) dated [DATE] revealed she had a high cognitive function. The resident was dependent on staff for bathing and toilet use. An extensive two person assist was used for bed mobility.  Review of Resident #57's social Service note dated 12/23/22 revealed the social worker had spoke with the resident's sister who reported the resident having ants in her bed. The sister required the resident receive a bath and have the linens changed. The Director of Nursing and Unit Manager completed a bed bath and changed her gown and her linens. The resident was educated on not eating in her bed and asked if she would like to move to another room. Resident #57 refused either option choosing to stay in her current room and bed.  Review of Resident #57's medical record revealed		on 12/30/22 at approximately 10:30 CNP ordered immediate blood d count (CBC), and a urinalysis. Ed the following morning she enever followed, and FR #73 resident out to be evaluated at the ospitalization was a result from FR one night nurse on 12/31/22 failed to at nurse obviously did nothing.  Diagnoses included multiple crohns disease with a colostomy,  E] revealed she had a high silet use. An extensive two person one esocial worker had spoke with the ter required the resident receive a ager completed a bed bath and ang in her bed and asked if she moosing to stay in her current room one country.  2/25/22 which stated the resident ming sounds. Vitals were assessed, pital.  I revealed the resident presented to be status and sores/wounds to her attent at the nursing facility with the case to the Ombudsman who and been working with Resident #57

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0684  Level of Harm - Actual harm  Residents Affected - Few	Interview with the Administrator and DON on 01/18/23 at 12:25 P.M. revealed Resident #57 was hospitalized and ants were found in her peri-area in the emergency room. The Administrator revealed the ants were due to the resident eating in bed and dropping crumbs. The room had since been treated by an extermination company and the problem was resolved.  Interview with Resident #57 on 01/18/23 at 1:07 P.M. revealed the ants she recently had ants in her room.			
	She reported she had only seen one ant recently.  Review of the facility policy titled Pest Control dated 2018 revealed it was the policy of the center to maintain a routine pest control program that consisted of monthly visits from the pest control company and monthly visits would include the resident's rooms.			
	Review of Resident #71's medical record revealed an admitted [DATE]. Diagnoses included schizoaffective disorder, diabetes mellitus, chronic kidney disease, peripheral vascular disease, and congestive heart failure.			
	Review of Resident #71's physician's order dated 12/13/22 revealed an order to treat the left gluteal fold by cleansing with soap and water, pat dry, and apply Triad wound paste every shift and as needed.			
	Review of Resident #71's Treatment Administration Record (TAR) for December 2022 revealed there was no documentation showing completion of the treatment to the gluteal fold on 12/18/22, 12/21/22, 12/23/22, and 12/27/22 on the day shift and on 12/16/22, 12/23/22, 12/24/22 on the night shift. On 12/20/22 on the day shift, the TAR read 9 which indicated other/see progress note. Review of Resident #71's progress notes for 12/20/22 revealed no documentation regarding the missed dressing change for that day.			
	Review of Resident #71's physician's orders revealed an order dated 11/08/22 to treat the right lower extremity by scrubbing the leg with dandruff shampoo, allow to sit for 10-20 minutes, rinse well, pat dry, apply thick layer of ammonium lactate lotion, apply Medi honey, cover with abdominal dressing, and wrap with kerlix from the base of the toes to below the knee every other night shift and as needed.			
		ed December 2022 revealed the treatm 12/06/22, 12/12/22, 12/16/22, 12/24/22,	,	
	Review of Resident #71's January 2023 TAR revealed staff were to apply Medi honey to the right lower extremity wound bed twice daily and as needed. The staff failed to complete the treatment on 01/02/23, 01/05/23, 01/09/23, and 01/12/23 in the morning and on 01/02/23 on the evening shift.			
	Further review of Resident #71's physician's order revealed an order to apply Aquaphor ointment to open sores every shift for sores to the arms and legs.			
	Review of Resident #71's TAR for December 2022 revealed staff failed to complete the Aquaphor ointment application on 12/02/22, 12/07/22, 12/08/22, 12/18/22, 12/121/22, 12/24/22, 12/27/22, and 12/31/22 on the day shift. The night shift failed to be completed on 12/06/22 and 12/28/22.

F 0694	Provide for the safe, appropriate ac	dministration of IV fluids for a resident v	when needed.	
Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS H	NAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 31638	
Residents Affected - Few	Based on record review, staff interview, review of hospital records, and policy review the facility failed to follow a health practitioner order to administer intravenous (IV) fluids to a resident with a change of condition. This resulted in actual harm for one resident (#73) who was ordered IV hydration after being found hypotensive. The IV fluid orders were never written by the facility staff and were not administered. The following morning the resident remained hypotensive and was lethargic requiring transfer and admission to the hospital for hypotension. This affected one (#73) of three residents reviewed for IV therapy. The facility census was 59.			
	Findings include:			
	Review of Former Resident (FR) #73 revealed an admitted [DATE]. Diagnoses included chronic obstructive pulmonary disease, diabetes mellitus, intracardiac thrombosis, lupus, chronic kidney disease, and congestive heart failure.			
	Review of FR #73's medical record revealed a progress note dated 12/31/22 at 9:59 A.M. which revealed the nurse went in to administer medications and found the resident's blood pressure to be 66/45 and the heart rate was 116. When the nurse notified the Certified Nurse Practitioner (CNP) of the findings, the CNP inquired about the orders for fluids that were given to the night nurse. The day nurse did not note any orders in the electronic medical system and was not informed of these orders by night nurse in report. The day nurse followed through with the orders given on the previous shift and pulled the fluids. FR #73 was stating repeatedly that she did not feel good. The nurse asked her if she would like to go to the hospital, or receive fluids here and let the facility treat her low blood pressure. FR #73 stated Yes, hospital. The resident was transferred to the local hospital and did not return to the facility.			
	Review of the hospital record revea was transferred to a hospice facility	aled FR #73 was admitted to the hospit r from the hospital.	al for hypotension. The resident	
		ng on 01/18/23 at 10:33 A.M. verified th IV fluids for FR #73. He stated The nig	•	
	Interview with Licensed Practical Nurse (LPN) #127 on 02/01/23 at 12:35 P.M. revealed 0.45% normal saline was ordered for FR # about 11:00 P.M. on 12/30/22 by the CNP. LPN #127 revealed on the morning of 12/31/22 she found FR #73 lethargic and hypotensive. The LPN contacted CNP #190 to inform her of the situation and the CNP was upset because the orders she gave to the night nurse were not carried out. It was decided to send FR #73 to a local hospital due to her condition.
