Residents Affected - Few	ensure residents had the right to m	cord review, resident interview, and sta take choices about aspects of their life to of 25 sampled residents (#14 and #2	that are significant and to choose
	Findings include:		
	1. Review of the medical record for Resident #14 revealed an admitted [DATE] and diagnoses including diabetes and end stage renal disease. The resident went out of the facility for hemodialysis three times weekly (Monday, Wednesday, Friday, per physician's order). An annual Minimum Data Set assessment completed on 01/14/23 stated the resident had a brief interview for mental status score of 15, indicating intact cognition. The resident required extensive assistance from one staff for bathing. Interview with Resident #14 on 02/01/23 at 2:10 P.M. revealed she often missed showers because they we scheduled on her dialysis days. She stated she leaves around 6:00 A.M. and returns around 1:30-1:45 P. She stated she was just too tired after dialysis to get a shower. The resident took off her shoes and socks and a strong odor was noted about her feet. Review of shower records revealed Resident #14 had refused showers on 01/13/23, 01/20/23, and 02/03 (all Fridays). Review of dialysis communication records revealed Resident #14 had received dialysis on 01/13/23, 01/20/23, and 02/03/23.		
	showers on Tuesday and Friday. S	65 on 02/06/23 at 1:05 P.M. revealed Find further confirmed that Resident #14 at the shower schedule had not been a	was too tired to get a shower on
	2. Review of the medical record for Resident #29 revealed an admitted [DATE]. A Minimum Data Set assessment completed 12/15/22 stated a brief interview for mental status score of 14, indicating intact cognition. The resident required extensive assistance from one staff for bathing.		
	Observations on 02/02/23 at 10:10 A.M. revealed Resident #29's call light to be on. The resident told the surveyor, at that time, he had his call light on because he wanted a shower. Registered Nurse #119 was observed to enter Resident #29's room at 10:15 A.M. She turned off the call light and exited the room. She stated to the surveyor that she knew the resident wanted a shower.		
On 02/02/23 at 12:40 P.M. Resident #29 stated he had not yet received a			shower as requested.
	Interview with Resident #29 on 02/0 assisted him with his shower.	06/23 at 8:35 A.M. revealed his sister o	ame to the facility on [DATE] and

	Review of the plan of care dated 09 or wound care.	9/25/22 revealed the resident did not ha	ave any care plans related to pain	
	Interview and observation on 09/26/22 at 12:58 P.M. with Resident #233 revealed she was admitted on [DATE] and she had not had pin care or a dressing change to her right leg. There was no visible date on the dressing on her right leg.			
	Review of physician orders for October 2022 identified an order dated 09/28/22 at 11:32 P.M. (three days after the resident's admission) for the dressing to her right leg to be changed nightly, stiches to the inside of her right ankle to be cleansed nightly with normal saline and an oil emulsion wrap placed over area, screw placed by her knee was to be cleaned with normal saline then dried, and cover the entire leg with acrylic wrap, every night shift for a dressing change.			
	Review of the September 2022 Electronic Treatment Administration Record (E TAR) revealed the dressing was not signed off as completed until 09/29/22 (four days after the resident's admission) when the order started.			
	Interview and observation on 10/04/22 at 11:45 A.M. with Resident #233 revealed her right leg dressing dated 10/03/22. The resident stated she changed her own dressing since the nurses were not doing it. Supplies were observed at bedside. The resident stated the staff had only changed her dressing three since she had been at the facility. She stated no sutures had been removed from her left leg per orders the surgeon who also provided the order to leave her left leg wrapped until her follow up appointment with she missed on 10/03/22 due to the facility not setting up transportation. She also stated the social work her that she was unsure how the facility missed scheduling transportation for her follow up appointment it was in her hospital discharge instructions.

F 0686	Provide appropriate pressure ulcer	care and prevent new ulcers from deve	eloping.	
Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS H	HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 38522	
Residents Affected - Few	Based on interview, record review and policy review, the facility failed to provide pressure ulcer wound care as ordered by the physician. This affected one resident (Resident #240) of one resident reviewed for pressure ulcers. The facility census was 84 residents.			
	Findings include:			
	I .	I record revealed an admitted [DATE] a prbid obesity, colostomy and anemia.	and diagnoses including	
	Review of Resident #240's admission minimum data set (MDS) assessment dated [DATE] revealed Reside #240 was cognitively intact, did not display behaviors and had an indwelling catheter and ostomy. Resider #240 was at risk for developing pressure ulcers and had had two Stage 3 pressure ulcers (defined as full-thickness loss of skin, in which subcutaneous fat may be visible in the ulcer and granulation tissue and rolled wound edges are often present. Slough and/or eschar may be visible but does not obscure the dept of tissue loss) that were present upon admission/entry or reentry. Treatments coded included pressure reducing device for chair, pressure reducing device for bed, pressure ulcer care and applications of ointments/medications other than to feet.			
	Review of Resident #240's physician's orders revealed an order dated 09/07/22 for cleanse wound on right thigh with normal saline, pat dry and apply a mepilex dressing daily every day shift for Stage 3 [pressure ulcer].			
	Review of Resident #240's September 2022 Treatment Administration Record (TAR) revealed Resident #240's right thigh dressing was blank and not completed as ordered on 09/07/22, 09/08/22, 09/09/22 and 09/16/22.			
	Review of the most recent wound evaluation dated 09/22/22 revealed Resident #240 had a Stage 3 pressure ulcer to the right buttock measuring 0.2 centimeters (cm) long by 0.2 cm wide by 0.2 cm depth. The pressure ulcer was present on admission. The evaluation indicated the pressure ulcer was improving.			
	Review of Resident #240's nurses' care.	notes for September 2022 revealed no	refusals of pressure ulcer dressing	
	Phone interview on 09/28/22 at 12:08 P.M. with Regional Director of Clinical Services (RDCS)/Registere Nurse (RN) #165 verified Resident #240's dressing should have been completed daily as ordered and indicated wound care was not documented anywhere else in the medical record so if it was not marked on the TAR it was not done.			
		d Care, dated October 2010 revealed the bund care was given was to be recorded.

F 0693 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Further review of the progress notes revealed the resident was not seen by the Dietitian until four days later on 9/27/2022 at 9:54 A.M. when Dietician #888 acknowledged the resident extensive history regarding her digestive system, weight loss (close to 200 lbs.), need for total parental nutrition (TPN) during hospital stay, need for an NG tube, need for several vitamins and supplements, history of poor oral intake, and the residents need for Vital AF 1.2 at 90 ml/hr at night from 7:00 P.M. to 7:00 A.M.) or until 1080 ml was infused. The Dietitian did not change the Resident #243's TF order.		
	Review of the physician order dated 09/24/22 revealed the resident was to have Vital AF 1.2 cal liquid (tube feed) running through her NG tube at 90 ml/hr every night. Further review of the orders revealed no orders for weights.		
	Review of the Electronic Medication Administration Record (EMAR) for September 2022 revealed the order for nocturnal tube feeds was not signed off on 09/23/22.		
	Review of the EMAR dated 10/02/22 through 10/04/22 revealed Resident #243's ordered tube feed was marked 9 rather than administered, indicating to see the notes.		
	Review of the progress note dated 10/3/2022 at 9:22 A.M. by Registered Nurse (RN) #125 revealed she informed supply staff about being out of the resident's ordered TF and being informed that the TF had been ordered.		
	Review of the progress note dated 10/03/22 at 11:30 P.M. (day two of no TF) by RN #115 revealed she called and informed the on-call provider of the facility being out of the resident's ordered TF when she was informed that the provider was not trained in the field of TF and recommended the RN to call the pharmacy. The RN called the pharmacy and informed her that the pharmacy was not sure of the equivalence of the resident's ordered tube feeding since the pharmacy was not trained in tube feeding. RN #115 then called and informed the on-call provider who informed RN #115 she and the resident would have to await the delivery of the ordered tube feeding.		
	Review of the progress note dated 10/04/22 and signed on 10/04/22 at 6:36 P.M. by the Certified Nurse Practitioner revealed the resident was to continue nocturnal feedings (12 hours) and had suspected chronic hypotension due to poor oral intake.

Residents Affected - Few	Based on observation, record review, policy review, and staff interviews, the facility failed to ensure pharmacy recommendations were accurately reviewed by the physician, failed to ensure physician approved pharmacy recommendations were implemented, and failed to ensure medications were necessary. This affected three residents (#32, #51, and #59) out of the five residents reviewed for unnecessary medications during the annual survey. The facility census was 84.			
	Findings include:			
	Record review for Resident #32 revealed this resident was admitted to the facility on [DATE] and had diagnoses including anxiety disorder, hyperlipidemia, hypertension, and major depressive disorder.			
	Review of the quarterly Minimum Data Set (MDS) assessment, dated 07/06/22, revealed this resident had moderately impaired cognition evidenced by a Brief Interview for Mental Status (BIMS) assessment score of 04. This resident was assessed to require extensive assistance from one staff member for bed mobility and toileting and to be independent with setup help only for eating.			
	Review of the active physicians order, dated 09/27/21, revealed an order to administer six milligrams of melatonin at bedtime for insomnia.			
	Review of the pharmacy recommendation, dated 02/02/22, revealed the pharmacy recommended a dose reduction for the residents melatonin. The physician reviewed and signed the recommendation on 03/02/22 and ordered the melatonin to be changed from scheduled to as needed.			
	Review of the pharmacy recommendation, dated 04/05/22, revealed the pharmacy recommended a dose reduction for the resident melatonin. The physician reviewed and signed the recommendation on 05/13/22 and ordered the melatonin dosage to be decreased from six milligrams to three milligrams.			
		Clinical Services #165 on 10/04/22 at 4 mmendations, had not been implement		
	 Record review for Resident #59 revealed this resident was admitted to the facility on [DATE] and had diagnoses including Parkinson's disease, cognitive communication deficit, hyperlipidemia, unspecified dementia with behavioral disturbances, and depression. 			
	Review of the admission MDS assessment, dated 08/15/22, revealed this resident had moderately impaired cognition evidenced by a BIMS assessment score of 04. This resident was assessed to require extensive assistance from one staff member for bed mobility and transfers and to be dependent upon one staff member for toileting.			
	Review of the active physicians order for this resident, dated 08/08/22, revealed an order to administer one 100 milligram capsule of Nitrofurantoin Macrocrystal (Macrodantin) one daily. The order did not specify an indication for usage.

F 0757 Level of Harm - Minimal harm or potential for actual harm	Review of the progress note for 08/17/22 by Medical Director (MD) signed on 08/20/22 at 11:20 P.M. and revealed nursing staff had concerns for inappropriate, sexual, behavior with staff. Review of the progress note for 09/14/22 signed by the MD on 09/17/22 8:10 P.M. revealed no new mood changes or behavioral concerns noted.			
Residents Affected - Few	Interview on 10/04/22 at 2:17 P.M. with Unit Manager Licensed Practical Nurse (LPN) #120 confirmed the only documented behavior for the resident was on 08/17/22 when the nursing staff revealed concerns for inappropriate, sexual, behavior with staff. She confirmed she believed the inappropriate behavior occurred more than once but stated there was no further documented evidence outside of the provider note dated 08/17/22.			
	Interview on 10/04/22 at 3:00 P.M. by Registered Nurse (RN) #145 revealed she had not seen any hypersexual behaviors from the resident but had heard from other employees that he had inappropriate behaviors.			
	Review of the facility policy titled, Medication Utilization and Prescribing-Clinical Protocol revised 07/2016 revealed symptoms were to be characterized in sufficient detail (onset, duration, frequency, intensity, location, etc.) to help identify whether a problem exists or whether a symptom is just a variation of normal. Furthermore, a symptom (confusion, pain, etc.) may have diverse causes, so it is usually relevant to try to identify likely causes and pertinent non-pharmacological interventions.

Review of physician orders for October 2022 identified an order dated 09/20/22 for two oxycodone five milligram (mg) tablets one time only for pain rated six through 10. The order was discontinued after the dose was provided on 09/20/22. A new order was placed on 09/21/22 for two oxycodone give five mg tablets for pain rated five through six every four hours as needed. The order was discontinued on 09/21/22 and a new order was placed on 09/21/22 for oxycodone 10 mg every four hours as needed for pain rated six through 10.	Residents Affected - Few	to failed to ensure resident medical	records contained complete and accu	rate information. This affected four
embolism and thrombosis of unspecified deep veins of the right lower extremity, atherosclerotic heart disease, syncope and collapse, idiopathic gout, hypertension (HTN), arthritis, sickle-cell trait, peripheral vascular disease (PVD), chronic kidney disease (CKD), alcohol dependence, tobacco use, hyperlipidemia, obstructive sleep apnea (OSA), hematemesis, and nausea. Review of the comprehensive Minimum Data Set (MDS) assessment, dated 09/22/22, revealed the resident had intact cognition with a Brief Interview of Mental Status (BIMS) score of 15 out of 15 (no impairment). The resident required supervision and set up for all Activities of daily Living (ADL's). Further review of his MDS revealed he received opioid medication. Review of the care plan dated 10/05/22 revealed the resident was at risk for an alteration in comfort related to PVD, gout, and arthritis. The interventions included medications as ordered to manage pain. Review of physician orders for October 2022 identified an order dated 09/20/22 for two oxycodone five milligram (mg) tablets one time only for pain rated six through 10. The order was discontinued after the dose was provided on 09/20/22. A new order was placed on 09/21/22 for two oxycodone give five mg tablets for pain rated five through six every four hours as needed. The order was discontinued on 09/21/22 and a new order was placed on 09/21/22 for oxycodone 10 mg every four hours as needed for pain rated six through 10.		Findings include:
