(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0689 Level of Harm - Actual harm Residents Affected - Few	Interview on 05/10/23 at 3:47 P.M. with Transport Staff #200 revealed he was the driver who transported Resident #68 and her husband (Resident #67) on 05/03/23. Transport Staff #200 confirmed after picking the residents up from their appointment and enroute to pick up Resident #31, Resident #68's wheelchair tipped backwards, and Resident #68 hit her head. Transport Staff #200 revealed he did not properly strap Resident #68's wheelchair with four straps and only used three because he was rushing to pick up Resident #31. Transport Staff #200 stated, Had I properly done four straps, it would not have happened. Transport Staff #200 revealed Resident #68 requested he call an ambulance at the time of the incident to take her to the hospital but stated the resident's husband (Resident #67) said not to and to take Resident #68 back to the facility to be assessed. Transport Staff #200 confirmed he did not call EMS to have Resident #68 transported to the hospital as the resident had initially requested. Interview on 05/10/23 at 4:45 P.M. with the Administrator, LPN #205, and LPN #207 revealed per the Administrator (who spoke on behalf of the two nurses) the facility staff were not aware Resident #68's husband (Resident #67) had called 911 until after Resident #68 had been admitted to the hospital and Resident #67 returned to the facility to pick up some belongings and return to the hospital to stay with Resident #68. Review of the care plan, revised on 05/11/23, revealed Resident #68 had pain related to complaints of left shoulder pain and recent subdural hematoma. Interventions included administering medications as ordered, monitor for signs and symptoms of pain, and notify the physician of any significant changes or if interventions were unsuccessful.		
	A facility policy related to transportation was requested during the entrance conference on 05/10/23 at 9:40 A. M. but a policy was not provided. Review of the facility policy, Falls-Clinical Protocol, revised 09/2012, revealed the policy indicated staff, with the physician's guidance, would follow up on any fall with associated injury until the resident was stable and delayed complications such as late fracture or subdural hematoma have been ruled out or resolved. Delayed complications such as late fractures and major bruising may occur hours or several days after a fall, while signs of subdural hematomas or other intracranial bleeding could occur up to several weeks after a fall. The deficiency represents non-compliance investigated under Complaint Number OH00142668.
