(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0656  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Few	Develop and implement a complete care plan that meets all the resident's needs, with timetables and actions that can be measured.  41809  Based on record review and interview the facility failed to provide a comprehensive care plan for one (#3) of five residents sampled for weight loss.  The assistant administrator identified 112 residents resided in the facility.  Findings:  Resident #3 was admitted to the facility with diagnoses that included hemiplegia, contracture of the right hand and wrist and anxiety.  A review of Resident #3 weight records contained one weight on 10/30/20 and no weights for the  The resident's care plan, revised date 11/04/21, documented the resident had an approach of: resident is noncompliant with letting staff obtain monthly weights or PRN weights.  The care plan did not address the resident's refusal of food or any weight loss. The care plan did not address the orders for fortified lunch and dinner, it did not address the resident's order for snacks or house supplements.  Where is the order for fortified foods? Did you have any documentation for refusal of food?  The resident clinical record documented one weight on 05/05/22 of 86.9 pounds. It documented the next previous weight on 10/30/20 of 119.5 pounds. There was no documentation of the resident reufsing weights in 2021 and 2022.  On 05/12/22 at 12:30 p.m., CMA #1 was asked if she had been invited to a care plan meeting for Resident #3. The CMA stated no one had asked them anything about the resident. The CMA stated they had been taking care of the resident since the resident arrived in 2018. The CMA stated the resident had refused two out of three meals every day.		
	A Physician's Order, dated 12/17/1 day at 2:00 p.m.  (continued on next page)	9, documented the resident to receive	a high protein/calorie snack every

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0692	Provide enough food/fluids to maintain a resident's health.		
Level of Harm - Immediate jeopardy to resident health or safety  Residents Affected - Few	Provide enough food/fluids to maintain a resident's health.  **NOTE-TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 41809  On 05/12/22 at 5:40 p.m., an Immediate Jeopardy (IJ) was verified with the Oklahoma State Department of Health (OSDH) regarding the facility's failure to identify, implement, monitor, and modify interventions to prevent a severe weight loss. Resident #3 experienced a severe weight loss of 25% and the facility failed to monitor weights, address meal refusals and implement interventions.  At 5:55 p.m., the facility's administrator, assistant administrator, and DON was made aware of the IJ situation related to the facility's failure to prevent severe weight loss. A plan of removal of the IJ situation was requested.  On 05/12/22 at 7:49 p.m., the administrator provided an acceptable plan of removal.  The plan of removal documented, Plan of Removal  Please accept this Plan of Removal as a credible allegation of compliance for immediate jeopardy initiated on May 12th, 2022 for neglecting to obtain weights for residents and provide proper nutritional intervention.  1. Action: To ensure identification of weight loss and risk for weight loss, center licensed nursing staff conducted and documented an audit of all center residents current weight and reviewed with IDT to include registered dietician. If new weight loss is noted during weekly or monthly weights, the attending physician, registered dietician, and nursing management will be notified to obtain orders as indicated and a change of care plan will be initiated. Actual weight loss and potential risk factors will be care planned to meet individual resident needs.  Completion Timeline: Beginning May 12th, 2022 and ending May 13th, 2022.  Responsible: Licensed Nurses/DON/RNM/RD  2. Action: Nursing Administration to conduct education with licensed nursing staff regarding: 1) Notification of nursing management upon identification of resident change in weight to include. 2) Inspection and documentation of weekly weights firmes 4 weeks		
	<ol> <li>Action: Nursing Administration to conduct education with certified/temporary nursing assistants regarding notification of charge nurse upon identification of resident change in weight and/or meal intake percentage. Beginning May 12th 2022, certified/temporary nursing assistants (agency, PRN, new hires) who have not received the above stated education will be educated by Nursing Administration prior to providing resident direct care.</li> <li>(continued on next page)</li> </ol>

Residents Affected - Few	Responsible: Administrator, Director	or of Nursing		
	On 05/16/22, interviews were conducted with a total of eleven employees who worked different shifts. The employees verified they had been in-serviced regarding the components documented in the plan of removal and that they understood the information provided.  On 05/16/22 at 10:30 a.m., the administrator was informed the IJ had been removed as of 05/13/22 at 8:35 p.m. The deficient practice remained at a level of actual harm, isolated.  Based on record review, observation, and interview, the facility failed to assess, monitor, and intervene for one (#3) of five residents sampled for weight loss. This resulted in the resident having a severe weight loss of 25%.			
	The assistant administrator identified six residents with significant weight loss.			
	Findings:			
		#3 was admitted to the facility on [DATE] with diagnoses that included hemiplegia and contracture at hand and wrist. On admission the resident was documented to weigh 112 pounds, with a resident seline of 117 pounds.		
	A review of Resident #3's physician orders revealed no orders for hospice to evaluate and treat.			
	A review of the weight records for Resident #3 had no documented weights for 2021. Multiple weights were documented for 2020, the last weight in 2020 was documented on 10/20/20 as 119.5 pounds, with an average weight for 2020 as 108.27 pounds, and only one weight in 2022. The documented weight on 05/05/22 was 86.9 pounds.			
	A Physician's Order, dated 12/17/19, documented Resident #3 was to receive a high protein/calorie snack every day at 2:00 p.m. No documentation was found or provided that this order was monitored by the facility.			
	A Physician's Order, dated 12/17/19, documented Resident #3 was to have labs obtained for CBC, CMP, Chem 14, Lipid panel, and TSH once a day on the 11th of June and December. No lab results were in the electronic record and no labs were provided by the facility before the end of the survey.			
A Physician's Order, dated 07/09/20, documented Resident #3 was to receive a house supplied four times a day between meals. No documentation was found or provided that this order withe facility.  A Physician's Order, dated 11/13/20, documented Resident #3 was to receive a regular fort and dinner and was to be up in a wheelchair or at 90 degrees for all intake.
