(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0684</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Additional review of the progress notes revealed an entry authored by Staff D on 12/25/2022 at 3:49 PM which states in part, Supervisor on floor and aware. Voicemail left with [family member] and TrueCare on call [on call provider].</p> <p>During a surveyor interview with Staff D on 1/6/2023 at approximately 10:00 AM she acknowledged working at the facility on 12/25/2022 on the unit in question although she could not recall a fall that occurred on 12/25/2022 at the change of shifts. The surveyor read her the progress notes she had entered into the resident's record on 12/25/2022 and she again she stated, I don't know that resident .there were no falls on Christmas day .I don't remember writing those notes or assessing anyone that fell . The surveyor then asked Staff D if she had given her username and password to the electronic medical system (EMAR) to anyone else and she replied that she had not. Additionally, she was unable to explain how those notes were entered into the system under her name.</p> <p>During an interview on 12/30/2022 at approximately 10:00 AM with Licensed Practical Nurse, Staff F, she indicated that she was the supervisor on call on 12/25/2022 and did not receive any phone calls regarding Resident ID #4. She indicated if she had received the phone call concerning the resident sustaining a fall, she would have ensured that the facility spoke to the resident's physician so they could direct care for the resident.</p> <p>During a surveyor interview with the Nurse Practitioner (NP) on 1/3/2023 at 10:15 AM, she indicated that she was not notified about the fall or any injuries until 12/28/2022, despite her being in the facility on 12/27/2022. Additionally, she revealed that she would expect the nurse to follow the facility's fall protocols following a resident's fall. She also revealed that if a resident was known to have hit their head, she would have ordered neurological checks on the resident.</p> <p>During a surveyor interview with the Medical Director on 1/6/2023 at approximately 1:00 PM he revealed that he did not receive any phone calls or voice messages regarding the resident's fall or injury on 12/25/2022. He revealed his NP was made aware of the fall on 12/28/2022 and she ordered an x-ray of his/her clavicle. He indicated that he would expect that if a nurse had called him and left a message and no one called back that the nurse would attempt to call the physician again for orders etc.</p> <p>During an interview on 12/30/2022 at approximately 9:00 AM with the Director of Nursing (DON), she revealed that the facility utilizes Point Click Care (PCC) as their EMAR. She then went into the resident's record in PCC to the Assessment tab and she was unable to find an assessment for Resident ID #4 relative to his/her fall on 12/25/2022.</p> <p>Although there were nursing notes indicating the resident's vital signs were stable and that the resident was alert and responsive with no visible injuries on 12/26 and 12/27/2022, the record failed to reveal evidence that a full body assessment was completed, including musculoskeletal function, observing for a changes in range of motion and neurological status had been completed for the resident.</p> <p>(continued on next page)</p>

<p>F 0684</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>During a surveyor interview with NA, Staff E on 12/29/2022 at 11:23 AM he revealed he was the resident's primary NA and that he was present at the time the resident fell on [DATE]. He indicated that the resident was on the floor for 10 to 15 minutes before any of the licensed nurses responded to the resident. He indicated that he had not cared for the resident since his/her fall on 12/25/2022 until he returned to work on 12/28/2022, which is when he observed a large bruise on the resident's shoulder. He further revealed that he reported this bruise to the unit manager and at that point he questioned what had been done for this resident after s/he had fallen on 12/25/2022.</p> <p>Additional record review failed to reveal evidence that any interventions, assessments including musculoskeletal function, observing for change in range of motion and neurological status, or treatments were provided to Resident ID #4, prior to Staff E's return to work on 12/28/2022.</p> <p>Review of a Radiology report dated 12/28/2022 revealed Nondisplaced fracture of the clavicle (collarbone) laterally .acute fracture .</p> <p>During a surveyor observation on 12/29/2022 at 1:53 PM in the presence of Registered Nurse Staff A, the resident was observed in bed with a large bruise covering his/her left shoulder.</p> <p>During an additional surveyor observation on 12/30/2022 at approximately 9:30 AM the resident was observed in bed, difficult to arouse and had a large yellow, green, purple, and blue bruise covering his/her left shoulder, left chest wall, and extending down to his/her left shoulder blade. The resident was observed to be grimacing in pain when being repositioned by staff.</p> <p>During a surveyor interview on 1/3/2023 with the Director of Nursing Services and the Administrator at approximately 3:00 PM, they were unable to provide evidence of a completed post fall assessment including musculoskeletal function, observing for change in range of motion and neurological status as indicated by the facility policy. Additionally, they were unable to provide evidence of any documentation of the bruise in the resident medical record.</p> <p>During a surveyor interview with the DON on 12/30/2022 at approximately 9:00 AM she revealed that the resident was diagnosed with a fractured clavicle, and she indicated that the resident's family opted to place him/her on hospice services, as s/he was not a surgical candidate.</p> <p>Further record review revealed the resident was admitted to hospice services on 1/1/2023 and passed away on 1/2/2023.</p> <p>39495</p>

<p>F 0757</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Ensure each resident's drug regimen must be free from unnecessary drugs.</p> <p>37158</p> <p>Based on record review and staff interview, it has been determined that the facility failed to ensure that the resident's drug regimen is free from unnecessary drugs for 1 of 3 residents reviewed for medication administration, Resident ID #1.</p> <p>Findings are as follows:</p> <p>Record review revealed the resident was admitted to the facility in December of 2022 with diagnoses including, but not limited to, diastolic congestive heart failure, cardiomyopathy, venous insufficiency, and atrial fibrillation.</p> <p>Record review revealed the following physician orders with parameters to hold the medication for systolic blood pressure less than 110 and for a heart rate less than 60.</p> <ol style="list-style-type: none"> 1. Spironolactone (medication to treat high blood pressure and excess fluid) 50 milligrams (mg) by mouth in the morning. 2. Spironolactone 25 mg by mouth in the evening. 3. Carvedilol (medication to treat high blood pressure and heart failure) 6.25 mg by mouth two times a day. 4. Torsemide (medication to treat high blood pressure and heart failure) 100 mg by mouth one time a day. 5. Torsemide 50 mg by mouth in the evening. <p>Record review of the December 2022 Medication Administration Record revealed the above-mentioned medications were administered on 12/18/2022 for the day time doses with a documented blood pressure of 103/59, which was outside of the ordered parameters.</p> <p>Additionally, the record failed to reveal a documented blood pressure or heart rate for the evening of 12/18/2022 and the above medications were administered.</p> <p>During a surveyor interview with the Director of Nurses on 12/27/2022 at approximately 4:30 PM, she acknowledged the medications were administered outside the ordered parameters and without monitoring of the blood pressure or heart rate. Additionally, she could not provide documented evidence of a blood pressure or heart rate for the evening shift on 12/18/2022.</p>
