F 0655 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information) Create and put into place a plan for meeting the resident's most immediate needs within 48 hours of being admitted **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 33938 Based on interview and record review, the facility failed to develop and implement a Baseline Care Plan for each resident that includes the instructions needed to provide effective and person centered care of the resident that meet professional standards of quality care for one (1) of one (1) residents reviewed for care plans out of 29 sampled residents (Resident #96). Findings include: Review of the facility's Care Plan policy, most recently revised 10/5/17, revealed Scope: Baseline Care Plan: Must include the minimum healthcare information necessary to properly care for each patient/resident immediately upon their admission, which would address patient/resident specific health and safety concerns to prevent decline or injury, and would identify needs for supervision, behavioral interventions, and assistance with activities of daily living as necessary. Procedure: New Admission Baseline Plan of Care: Upon a new admission, a baseline care plan will be developed by the admitting nurse/nurses in conjunction with other Interdisciplinary Department Team (IDT), the patient/resident and/or patient/resident representative. The baseline care plan should be initiated in 24 hours and will be completed and implemented within 48 hours of admission. Resident #96 was admitted to the facility on [DATE] from an acute care hospital for skilled nursing services to include Speech Therapy (ST), Physical Therapy (PT) and Occupational Therapy (OT), with the intention of returning to an Assisted Living Facility (ALF), with primary diagnoses of Acute Kidney failure, Sepsis, Urinary Tract Infection (UTI), Dysphagia, Dementia and Malnutrition. Review of the Admitting Physician's Orders dated 2/3/21 indicated orders for amo		

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

Level of Harm - Actual harm		HAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 33938	
Residents Affected - Few	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 3 Based on observation, record reviews, interviews, and review of facility policy, the facility failed the resident's environment remained free of accident hazards as possible and that the resident adequate supervision as well as assistance to prevent accidents for one (1) of 27 sampled resident #77). The facility was aware Resident #77 exhibited confusion, ambulated via rolling walker, and had gait, however failed to ensure the residents safety by leaving a wheelchair in a shared bathroom a fall with fracture to the left scapula.			
	Findings include:			
	Review of the policy titled Occurrence Reduction Program Fall Risk Observation Form, dated revised 11/21/2017, revealed the Policy Statement This healthcare center recognizes that due the patients/residents served, there is an increased risk of occurrences that may result in injurpatient/resident and/or others. In an effort to prevent occurrences, each patient/resident will be risk and appropriate and realistic interventions will be implemented upon identification of risk and These interventions will be included in the care plan.			
	SCOPE: This policy applies to the	staff at the healthcare center.		
	PROCEDURE:			
	Admission/Readmission:			
	All patients/residents will have a score Fall Risk Observation Form completed.			
	2. All patients/residents will be assessed utilizing the Fall Risk Observation Form upon admission/readmission by admitting licensed nurse. Fall Risk Observation Form is available in AHT/LTC electronically or paper copy. E.H.R. facilities should be using the Fall Risk Observation Form electronically and in the event that the electronic documentation is not available, the Fall Risk Observation Form is located in the Policy Tech Software.			
	The licensed nurse will develop an individualized fall care plan with appropriate interventions upon admission/readmission regardless of score on Fall Risk Observation.			
	All new admissions/readmissions will be reviewed at the next Weekly Occurrence Reduction Committee Meeting.			
	Guidelines to be Used:			
	When the patient/resident is admitted to the healthcare center the fall risk assessment will be completed and it will generate appropriate interventions, which could include:

F 0689 Level of Harm - Actual harm	Review of the clinical record revealed Resident #77 was admitted to the facility on [DATE]. The resident was assessed on the Quarterly Minimum Data Set (MDS) assessment, dated 10/2/2020, to have diagnoses of Type 2 Diabetes Mellitus, Unspecified Complications (primary), Unspecified Fracture of Left Femur,			
	(admission) Unspecified Dementia	without Behavioral Disturbance, Muscl	e Weakness, (generalized), Other	
Residents Affected - Few	Encephalopathy, Other Abnormalities of Gait and Mobility, Unsteadiness on Feet, Cognitive Communication Deficit, History of Falling, Pain in Left Hip, Primary Osteoarthritis, Stress Fracture Pelvis, Fracture of Unspecified Part of Capula Left Shoulder, Hyperlipidemia, Essential Primary Hypertension, Hypothyroidism, Chronic Kidney Disease Stage 3, and Multiple Fractures of Ribs Right Side. Resident #77 had a Brief Interview for Mental Status (BIMS) score of 11 of 15 indicating mildly impaired cognition. The MDS revealed Resident #77 did not participate in skilled therapies or restorative nursing programs during the assessment review period. Under Section G functional status, the resident was coded as requiring supervision from staff for all activities of daily living including toileting and the use of mobility devices such as cane/crutch and walker.			
	Review of the Care Plan dated 7/3/2020 with revision date of 12/28/2020, revealed Resident #77 had fallen and was at risk for further falls due to generalized weakness and painful knees, and poor safety awareness. Resident #77 required set up to total assistance with ADL care and used a rolling walker when ambulating. Resident #77 had a fall with left scapula fracture and was sent to (ER) emergency room for evaluation and treatment. Under the goals section, target date 7/9/21, the resident would not sustain any life-threatening injury from falls though the next review. Resident's ADL needs would be met, and independence potential maximized through next review. Under the approaches section, staff were to ensure non-skid socks were on at all times when shoes were not being worn. The ADL flow sheet would be completed every shift. Staff would provide assistive devices as needed, and Physical Therapy (PT) and Occupational Therapy (OT) would evaluate and treat. Set up resident for ADL's if needed and notify the physician of changes.			
	Review of the facility's John Hopkins Fall Assessment Tool, dated 7/3/2020, revealed Resident #77 had a total fall risk score of (15) fifteen, indicating the resident was at high risk of falls.			
		iew of the facility's John Hopkins Fall Assessment Tool, dated 12/28/2020, revealed Resident #77 had a fall risk score of (0) zero, indicating the resident was at a low risk for falls for not having a fall in the ious (6) six months.

An interview was conducted on 4/26/21 at 3:14 p.m. with the Director of Nursing (DON) that revealed Resident #77 had a history of falls prior to being admitted to the facility. On 12/28/2020, I remember the resident stating that he/she slipped on something, the CNA from the night shift left another resident's wheelchair in the shared bathroom and Resident #77 tripped over it and fell. The DON stated, I did verbal education to the CNA that left the wheelchair in the bathrooms; and I follow up with them to make sure. An interview on 4/27/21 at 9:28 a.m. with the Nurse Practitioner (NP) revealed Resident #77 was considered a high fall risk and because of that he/she was on the NP's list to be seen three (3) times per week. An interview on 4/27/21 at 12:20 p.m. with the Administrator revealed it is his/her expectation that staff absolutely keep the resident's rooms and bathrooms clear of trip hazards to prevent falls. The Administrator stated, I am not sure if the wheelchair in Residents #77's bathroom was fol	(X4) ID PREFIX TAG			on)
Residents Affected - Few Making sure that all trip hazards are out of bathrooms. Sometimes night shift will leave wheelchairs in the bathrooms after toileting another resident, they forget it's there. An interview was conducted on 4/26/21 at 2:55 p.m. with Licensed Practical Nurse (LPN) #2, which revealed I remember Resident #77 had already exited the bathroom and was sitting on the bed. The resident stated his/her shoulder was hurting and that he/she fell in the bathroom. I looked in the bathroom and seen the resident from the adjoining rooms wheelchair wedged in between the door and that is what he/she tripped over. The LPN stated, There was another resident on the toilet and Resident #77 was trying to go into the bathroom as well. When shown the incident report by the surveyor and queried about the what really happened; the LPN stated, I would agree that what I told you is different from what is stated in the report. The LPN further revealed during the time of the fall he/she was the only unit manager responsible for (2) two units, having one (1) unit manager may have interfered with the interventions to prevent Resident #77 fall. potential for actual harm	33938		
Residents Affected - Few	1	a position description, the facility failed qualifications of a Certified Dietary Marctor managing the kitchen.	
	Findings include:		
	An initial tour of the kitchen was conducted on 4/25/21 at 11:59 a.m. A request was made of the kitchen staff to speak to the Food Service Director. The dietary staff indicated there was currently no one serving as a Food Service Director.		
	In an interview on 4/26/21 at 2:40 p.m. with the Administrator, he/she stated the Food Service Director walked off the job about a week and a half ago. He/she acknowledged there was no one qualified in the kitchen to take over. He/she stated he/she had an add online for the position but had not found a qualified candidate. The Administrator also stated he was trying to get Dietary Aide #2 to take the job and he/she would then enroll them in the Certified Dietary Manager course.		
	In an interview on 04/27/21 at 12:18 p.m., with the Consultant Dietitian s/he stated the company didn't have another Food Service Director to help fill the position right now. S/he stated the other facilities had suffered due to COVID-19 and staffing had been difficult.		
		p.m., with Dietary Aide #2, s/he stated was considering it. S/he stated s/he co	• • • • • • • • • • • • • • • • • • • •
