| F 0677 | Resident #11 | | |
| Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some | Record review of R#11's face sheet indicated a [AGE] year-old-male who admitted to the facility on [DATE]. His diagnoses included Chronic Obstructive Pulmonary Disease (obstructed airflow in the lungs), Hyperlipidemia (elevated lipid levels), Hypertension (elevated blood pressure) and Hemiplegia and hemiparesis (loss of strength in the body). | | |
| | Record review of R#11's quarterly MDS dated [DATE] indicated a BIMS score of 10, indicating moderate cognitive impairment. Further review of R#11's MDS indicated he required extensive assistance from staff for all ADLS. R#9 also had limited range of motion on one side of his upper and lower extremities. | | |
| | Record review of R#11's care plan dated 1/27/22 indicated R#11 is incontinent of bowel and bladder. Interventions include to monitor for incontinence every 2 hours and PRN, change promptly and turn and reposition PRN. Further review of R#11's care plan indicated he required extensive assistance with ADLS. | | |
| | Record review of R#11's care plan dated 12/22/21 indicated he was at risk for skin breakdown related to impaired mobility, left side weakness and CVA (Stroke). Interventions included monitor for incontinence every 2 hours and as needed, change promptly, and turn and reposition PRN. | | |
| | Observation and interview made on 2/27/22 at 8:45 AM, R#11 was yelling I need to be changed. Hello? I need to be changed. I am soaking wet. Surveyor entered the room and R#11 stated he was soiled and had not been changed all night. He stated he had been waiting for someone to assist him all night but was not able to get anyone. R#11's call light was not within reach for him to press for assistance. R#11 stated the last time he was changed was around 9PM yesterday (2/26/22). He stated he was not sure where the night CNA was. | | |
| | Interview on 2/27/22 at 8:47 AM, the but he will go and assist for R#11. | ne ADON stated he was not sure why R | #11 was not changed overnight, |
| | Observation of facility scheduled in | dicated one CNA on shift for 10PM-6A | M shift. |
| | An attempt was made to contact th | e CNA that was on duty, message was | s left, but call was never returned. |
| | In an interview on 2/27/22 at 8:50 AM, CNA E stated she went in the room to assist R#11 this morning and he stated he had not been changed all night. She stated when she assisted with his care, his brief was completely soiled and you could tell he had not been changed for a long time. She stated R#11 informed he that she was the last person to assist with his care and he didn't see anyone all night. CNA E stated when she began rounds, it was several residents that needed to be changed due to being really soiled and it occurs often. | | |
| | In an interview on 2/26/22 at 3:32 PM, the Administrator stated he expected staff to provide care to the residents every two hours and as needed. He stated it is important for incontinent care to be completed to avoid residents having new or worsening skin breakdown. | | |

SUMMARY STATEMENT OF DEFICIENCIES

(Each deficiency must be preceded by full regulatory or LSC identifying information)

F 0686

Level of Harm - Immediate ieopardy to resident health or safety

Residents Affected - Few

In an interview on 2/16/22 at 2:08 PM, the DON said she expects the staff to check on residents daily, provide showers and for nurses to complete skin assessments as ordered. She stated the nurses are to report any changes with the resident to her and also to the physician. She stated residents are to be turned every two hours to prevent skin breakdown. She stated the wound care nurse is responsible for completing weekly skin assessment for residents who have pressure ulcers and the floor nurse is responsible for completing the weekly skin assessment for other residents. Nurses are also expected to change residents dressing when it becomes soiled, and the wound care nurse has already treated the resident. She stated the facility puts interventions in place to avoid wound breakdown like seeing the wound care doctor, pressure relieving devices, completing pericare timely and weekly skin assessments. The DON stated in order to monitor residents' wounds, she will get a weekly wound report from the wound care nurse. She stated she will check the wound care measurements and she will also complete random skin audits.

Observation made on 2/16/22 at 4:31 PM of CR#1 at the hospital, CR#1 had a nasogastric tube (tube that carries food and medicine to the stomach through the nose) and being treated by wound care daily, with wound vac observed at bedside. CR #1 was unable to clearly speak, and she required staff to anticipate needs.

In an interview on 2/16/22 at 4:35 PM, Hospital RN 1 said CR#1's admitting diagnosis was sepsis and sacral ulcer. She stated CR#1 had a stage 4 pressure ulcer on her sacrum and is currently on a wound vac. Hospital RN 1 stated CR#1's wound is to the bone and was debrided on 2/9/22. She stated CR#1 also had a blister on her left lateral ankle, left and right buttock and both bilateral heels have unstageable wounds. She stated she also has a pressure ulcer on her right outer elbow. Hospital RN 1 stated CR#1 is currently being closely monitored and they're hoping her mentation improves, but the confusion comes from the sepsis. She stated CR#1 is also on IV antibiotics to help with the sepsis.

In an interview on 2/18/22 at 3:19 PM, WCN A stated on 1/30/22 was the first time she seen the sacral wound on CR#1. She stated she was previously treating her for left and right DTIs (deep tissue injury) to her lower extremities. She stated after speaking with the wound doctor and having CR#1 treated, there was an order in place to have CR#1 to receive calcium alginate to the sacral wound daily. WCN A stated the nurses also had access to the treatment order due to it being in the resident treatment record. She stated when the wound doctor seen CR#1's sacral wound on 2/1/22 it already had pus around it and it was an open area. She stated on 2/6/22 CR#1 was sent out to the hospital before she could see the actual wound and her last day she seen and treated CR#1's wounds was 2/3/22. She stated she was unsure who treated the residents wounds when she is off on the weekend (2/4/22 and 2/5/22), but believes nurses are doing their own treatments.

In an interview on 2/18/22 at 4:15 PM, the DON stated the facility had a PRN wound care nurse who assist with weekend treatments. She stated after the nurses complete wound treatments, they are to document on the treatment book that they have completed the treatments or document in the nursing notes if additional information is needed.

In an interview on 2/2/22 at 9:53 AM, LVN C stated she last recalls working with CR#1 on 1/27/22 when a family member came to the nursing station asking why CR#1 had sores on her skin. She stated she went into the room to assess the resident as she recently started working with CR#1. LVN C stated she assisted with incontinent care and seen a little area (about 0.5 cm), on her bottom. She stated the area was not open (on 1/27/22). LVN C stated she did not see CR#1's skin any time after working with her 1/27/22. LVN C stated wound care was consulted on 1/30/22 for the area on CR#1's sacrum.

| F 0686 Level of Harm - Immediate jeopardy to resident health or safety | In an interview on 2/22/22 at 10 AM, LVN D stated she briefly recalls working with CR#1 but unaware of any skin breakdown. She stated residents who have compromised skin will usually have a barrier cream placed on their bottom as a preventative measure. She stated the residents are also to be turned and repositioned every two hours or as needed. | | |
| Residents Affected - Few | In an interview on 2/22/22 at 10:13 AM, Physician A stated he recalls working with CR#1 due to the wound to her sacral area. He stated when he seen her on 2/1/22, CR#1's wound was 4x17.5x0.5 cm. Physician A stated the 17.5cm is how wide CR#1's wound was, which stretched across both buttocks. He stated based off reading the wound care notes for CR#1, her wound was a stage 4 on 2/2/22 at time of treatment. Physician A stated he sees the residents weekly at the facility and only seen CR#1 once for the sacral wound but was treating her DTI's. | | |
| | In an interview on 2/22/22 at 11:29 AM, CNA A stated she worked with CR#1 a few times before she went to the hospital. She stated CR#1 had an open area on her bottom, but she was unable to say the size or describe how the open area looked. CNA A was unable to recall the first time she saw the wound for CR#1. | | |
| | In an interview on 2/22/22 at 2:35 PM, WCN B stated she completes wounds on Friday and Saturday as needed. She stated the last time she treated CR#1 was right before she went out to the hospital, and she changed the wound dressing. She stated CR#1 had a wound on both heels and a sacral wound. She stated the wound on her sacral had mild drainage and was small circular area with some slough on the wound. WCN B stated she was unsure of the exact measurements of the wound and also unable to recall the stage of the sacral wound. | | |
| | In an interview on 2/22/22 at 2:43 F wound measurements upon admis | PM, Hospital RN 2 stated CR#1 admitte sion were (2/6/22): | ed with 5 wounds. He stated the |
| | - Sacral wound 11x15x0.1 cm | | |
| | - Right buttock 2.5x2.5x0.1 cm | | |
| | - Right hip 3.5x3x0.1 cm | | |
| | - Right heel 3.5x3 cm | | |
| | - Left heel 7.5x7.5 cm | | |
| | In an interview on 2/26/22 at 3:17 PM, CNA E stated she recalls working with CR#1 and she had an open area on her bottom. She stated she was unable to recall the size but knows it was a small area and also knows the nurses were aware due to there being a bandage on the wound at times when she would provide incontinent care to CR#1. | | |
| | In an interview on 2/27/22 at 5:53 AM, CA G stated she worked with CR#1 on 2/5/22 and stated CR#1 had a bed sore on her bottom that was open and across her bottom. She stated she was not able to recall the size but does know that the area was open on her bottom. | | |

| F 0921 Level of Harm - Minimal harm or potential for actual harm | In an interview on 2/8/22 at 10:55 AM, CNA X stated the feces on the wall in room [ROOM NUMBER] had been on the wall for about 3 days. She stated room [ROOM NUMBER] was not her assigned room, but she knows about it due to assisting staff with incontinent care in the room. She states she believed they were waiting for housekeeping to clean the room and the wall. | | |
| Residents Affected - Some | In an interview on 2/8/22 at 10:58 AM, LVN K stated she sees the housekeepers come on the hall, but they mainly clean the corridor. She stated she is not aware of the cleaning schedule but knows that housekeeping does come to the hall. She stated she was not aware about the feces on the wall in room [ROOM NUMBER] but will get it taken care of. In an interview on 2/8/22 at 2:20 PM, the Administrator stated the facility does angel rounds to ensure resident satisfaction, but he is currently revamping the program. He stated housekeeping is something he is working on within the facility. He stated the nursing staff are to ensure trash is picked up and placed in the trashcan and housekeeping will empty it and sweep and mop. He stated if there is any feces or bodily fluids in the rooms, the nursing staff is responsible for cleaning it and housekeeping will come to disinfect the area. In an interview on 2/25/22 at 12:38 PM, the director of admissions stated the nurses are responsible for placing the name tags on the resident's doors and updating them accordingly. She stated medical records | | |
| | | | |
| | can also assist as needed. In an interview on 2/25/22 at 12:58 PM, CNA B stated the resident in 241 often throws her food if she does not want something. She stated room [ROOM NUMBER] was not assigned to her today, but she will get with housekeeping to assist with cleaning the room. In an interview on 2/27/22 at 12:38 PM, the Housekeeping Supervisor stated housekeepers clean daily, with a schedule of 7am-3pm and there is one housekeeper from 1pm-8pm. She stated if there is any bodily fluids | | |
| | on the floor or wall, the CNAs will c | lean off the bodily fluids and housekee the incident. She stated she was not a | ping will come and disinfect the |
