(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0684	Provide appropriate treatment and care according to orders, resident's preferences and goals.		
Level of Harm - Actual harm	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 43872		
Residents Affected - Few	Based on interviews and record reviews, the facility failed to ensure that residents receive treatment and care in accordance with professional standards of practice, the comprehensive person-centered care plan, and the residents' choices for 1 of 10 residents reviewed for wound treatment. (Resident #1).		
	1. The facility failed to provide care for Resident #1's wounds as identified on the resident's physician's orders. Resident #1 was admitted to the hospital due bilateral leg infection. Resident #1 and family reported wound care was not provided consistently. Per record review, Resident #1 reported she did not receive appropriate care and her wounds had gotten worse which led to her inability to ambulate when she was admitted to the hospital.		
	2. Wound care administration of treatment was not recorded as ordered by the physician for Resident #1.		
	This failure could place residents all residents at risk for a failure to improve and/or attain their highest practicable physical, mental, and/or psychosocial well-being.		
	Findings included:		
	Review of Resident #1's Face Sheet, revealed Resident #1 was a [AGE] year old female admitted on and transferred to the hospital on 1/4/2023 with diagnoses including: intrahepatic bile duct carcinoma duct cancer), muscle weakness (generalized), other lack of coordination, weakness, difficulty in walkir localized edema, hypertension, acute cystitis with hematuria, essential primary hypertension, gout, COVID-19 12/16/2022, cellulitis of right lower limb, cellulitis of left lower limb, and unspecified jaundice		hepatic bile duct carcinoma (bile weakness, difficulty in walking, imary hypertension, gout,
	Review of Resident #1's Care Plan, dated 12/19/2022, revealed no risks or interventions for skin integrity concerns.  Review of Resident #1's Minimum Data Set (MDS), dated [DATE], revealed a Brief Interview for Mental Status (BIMS) Score of 13.		
	(continued on next page)		

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 0684	Record review of Resident #1's Wo	ound Evaluation and Management Sum	maries, dated 12/15/2022 and	
Level of Harm - Actual harm		d of the left leg (Site 1) had increased i d from 210 cm^2 to 252 cm^2, and exu		
	none to light serous. Arterial wound	d of right leg (Site 2) revealed wound si	ze increased from 20 x 16 x 0.1 cm	
Residents Affected - Few	to 20 x 18 x 0.5 cm, surface area increased from 320.00 cm^2 to 360.00 cm^2. Wounds to arterial left and right leg had 90% thick adherent black necrotic tissue (eschar), with deteriorated wound progress on 12/29/2022. Dressing treatment plan included to apply abdominal pad apply once daily for 16 days, sodium hypochlorite solution once daily for 30 days, and secondary dressing to be applied once daily for 16 days. Post operative recommendations and updates to the plan of care were documented in the assessment and plan section. Summarization of wound care assessment and individualized treatment plan for site 1 and site 2 of the left and right leg revealed wounds deteriorated due to generalized decline of patient.  Review of Resident #1's Progress Notes, dated 01/04/2023, written by LVN A revealed the following: Resident had a 101.2 temperature with confusion. Wound care noted with increased warmth and pain noted. Bilateral lower extremity (leg, ankle, and foot) noted to be warm to touch and with edema. New order received to transfer resident to the hospital for further evaluation.  Review of Resident #1's Progress Notes, dated 12/19/2022, written by LVN B revealed: Resident is awake, alert, oriented x 3, skin warm & dry to touch, respirations unlabored, abdomen soft, bowel sounds present x 4, resident is bed bound, incontinent of bowel & bladder. Turned Q (every) 2 hours & prn (as needed). Antibiotic therapy ongoing, with no adverse reactions noted. Diet tolerated without problems, voiding quantity sufficient. Bilateral lower extremities observed with dressings intact, gauze stained with serosanguinous drainage, to be changed every other day, Normal saline, xeroform gauze, & kerlix utilized for dressing change on 12/18/22.  Review of Resident #1's Treatment Administration Record (TAR), from December 2022 through January 2023, revealed the following:			
	*Physician Order, start date of 12/13/2022, for wound treatment to Bilateral Lower Extremity (leg, ank foot), .every day shift every other day for Wound healing. No administration of treatment was recorded 12/17/2022 through 12/23/2022 as ordered by the physician.			
	PRN (as needed) every day shift for 12/14/2022 through 12/17/2022, 12 the physician. *Physician Order, sta	1/12/2022, for wound treatment to left in wound healing. No administration of 2/19/2022, 12/21/2022, and 12/23/2022 art date of 12/30/2022, for arterial wour e conducted every day shift. No administician.	treatment was recorded on through 12/24/2022 as ordered by dids to right and left leg, sacrum,

F 0684 Level of Harm - Actual harm Residents Affected - Few	SUMMARY STATEMENT OF DEFICIENCIES [Each deficiency must be preceded by full regulatory or LSC identifying information)  Review of Resident #1's Hospital Records, dated 1/4/2023, revealed the following history of present illiness: XXXIACEJ year-old female with medical history of unresectable intrahepatic primary billary tract cancer, chronic lower extremity edema/wound secondary to chemotherapy, osteoporosis, iron deficiency anemia who initially presented to ED from nursing home with chief complaint of worsening bilateral lower extremity wound leading to inability to ambulate today. Patient reports chronic lower extremity edema/swelling secondary to chemotherapy initially started a few months ago. Patient has been staying in the nursing home for the past few weeks for assistance with wound care. However, patient stated that she has not been receiving appropriate care from a nursing home and her wound has been worsening.  Review of Resident #1's Hospital Records, dated 1/4/2023, revealed the following X-ray report: Lower extremity left with contrast: Bilateral leg infections with wounds starting in medial thigh and extending down to toes. Cortical screw from prior surgery is also at the first metalarsal head. Involving a length of 14.5 cm over the lower leg, beginning at the mid tibial shaft and extending inferiority, there is prominent skin defect with irregular sheet like gas collection in the superficial subcutaneous tissues involving the anterior and lateral aspect of the lower leg. There was no direct extension into the underlying muscular bundles. No fluid expansion of the muscles. No focal absocss cavity was evident. Osseous structures were intact. No aggressive osseous destruction. Prominent edema of the subcutaneous tissues of the lower leg without invasion of the underlying muscular bundles. No fluid expansion of the muscles. No fluid expansion of the muscles. No fluid expansion of the muscles. No fluid expansion of the muscles in the prominent selection of the subcutaneous suspacellulistic involving th
