(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC	TEMENT OF DEFICIENCIES must be preceded by full regulatory or LSC identifying information)		
F 0550 Level of Harm - Minimal harm or potential for actual harm	During an interview on 01/10/23 at 05:21 PM, Resident #271 said on 01/09/23 around 07:30 PM, CNA Z came to answer the call light. Resident #271 said she asked CNA Z to assist her to the bathroom and CNA Z said no, there was no one there to help her get you up. Resident #271 said she had to urinate in her disposable brief. Resident #271 said by CNA Z not assisting her to the bathroom, it made her feel belittled.			
Residents Affected - Few	During an interview on 01/11/23 at 12:48 PM, the Administrator said she had spoken to Resident #271 on 01/10/23. The Administrator said she filled out a grievance report. The Administrator said Resident #271 told her CNA Z did assist her in putting her pajamas on and did change her several hours later. The Administrator said she spoke with CNA Z, and CNA Z reported to her that she did assist Resident #271 to the bathroom with the help of CNA W. The Administrator said Resident #271 pressed her call light again that night while CNA W was on break and CNA Z did not take her to the restroom at that time because she didn't think to ask the nurse for help.			
	Record review of Resident #271's grievance report, dated 01/10/23, indicated Resident #271 said the staff assisted her with pajamas, then assisted her to bed. Resident #271 said when she was in bed she became wet but had to wait several hours for help. Results of action taken indicated the administrator filled out grievance report and did education with the aides.			
	During an interview on 01/11/23 at 6:19 PM, CNA Z said she did not take Resident #271 to the bathroom at that time because Resident #271 required two-person assist for transfers and she asked Resident #271 if she could wait until she had assistance. CNA Z said she didn't think to ask the nurse for assistance in taking Resident #271 to the restroom.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0550 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	During interview and observation with Resident #5 on 01/09/23 at 10:13 AM, she was observed sitting in her wheelchair watching television in her room. Her catheter bag was visible and urine could be seen, there was; no privacy bag on the wheelchair or visible in the room. Resident #5 said she did not remember if staff covered it after she was assisted with transferring from her bed to wheelchair. She said she could not see it as she had limited use of her neck. She said she would prefer it always remained covered for her privacy. The catheter bag could be seen from the hall when the door was open. Resident #5 had a roommate that saw the catheter bag without a cover.			
	During interview and observation with Resident #5 on 1/10/23 at 9:02 AM, she was observed in bed watching television. Her catheter bag was hung off the side of the bed that faced the room door, there was no privacy bag covering it. Resident #5 said she did not have any catheter care today. She was unsure if the bag had been there and removed, or never placed.			
	During interview and observation with Resident #5 on 1/11/23 at 2:12 PM, she was observed in bed watching television. Her catheter bag was hung off the side of the bed that faced the room door, there was no privacy bag covering it. Resident #5 said she would prefer the bag be covered for her privacy. She said she was embarrased by the bag being uncovered.			
	During an interview on 01/17/23 at 12:51 PM, ADON A, she said she expected all staff to ensure catheter bags were covered with a privacy bag if they noticed it was not covered. She said these things could lead to residents' embarrassment and emotional harm.			
	During an interview on 01/17/23 at 1:11 p.m., CNA S said if she was to provide care to a resident, she would close the door to provide privacy. She said would inform nursing staff if a catheter bag was not covered as CNAs could not perform any catheter care.			
	During an interview on 01/17/23 at 1:13 p.m., LVN C said the door to any resident's room should be closed when care was provided to preserve their dignity. She said she would ensure the resident's catheter bag wa in a privacy bag at all times to ensure there was no embarrassment and shame to the resident.			
	During an interview on 01/17/23 at 1:57 PM, the RNC said the residents had the right to ask for assist go the bathroom. The RNC said by not assisting them could be a dignity issue or cause infections. She each resident had a right to privacy in all care. She said a catheter bag should not left for others to secontents. She said there should be a privacy bag that covered it at all times. She said she expected a nursing staff to ensure this was done for resident's privacy. The RNC said this could cause emotional and loss of dignity to the resident.			
	Record review of the facility's policy titled Resident Rights revised on 02/21, indicated Employees shall treall residents with kindness, respect, and dignity. Federal and state laws guarantee certain basic rights to a residents of this facility. These rights include the resident's right to: a. a dignified existence; b. be treated we respect, kindness, and dignity; c. be free from abuse, neglect, misappropriation of property, and exploitation

She said Resident #54 was go for a smoke. LVN O said the
	During an interview on 01/17/23 at 1:36 PM, the RNC said she expected resident's right should always respected. She said a resident had the right to smoke during the smoking schedule if they chose. She the medical condition was not a factor unless otherwise noted by a physician. She said denial could make resident feel like a child and not respected. She said it could affect their emotional well-being.		
	During an interview on 01/17/23 at 4:55 PM, the Interim Administrator said he expected the resident's rights to be respected in regard to smoking. He said even if the resident had a chronic lung condition, it was her right to smoke. He said no staff at the facility should have denied that request. He said this was demeaning and could cause the resident to feel a loss of dignity.		
	Record review of the undated facility smoking policy, revealed 18. Smoking assessment will be completed on admission, quarterly, and as needed only on residents who use tobacco and E-cigarette.		
	3/19/21, 6/18/21, 9/18/21, and 12/1 resident is cognitive capable of ma policy due to diagnosis of dementia hazardous to self or others becaus requires the supervision of a licens	nedical records for Resident #54 had a smoking assessment completed on, d 12/18/21 no others .smoking assessment dated [DATE], indicated that the of making decision to smoke, the resident does not understand facility smoking mentia, resident has a history of smoking-related problems that would be ecause oxygen saturation while smoking. F 0635	Provide doctor's orders for the resident's immediate care at the time the resident was admitted.		
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 33249		
Residents Affected - Some	Based on interview, and record review the facility failed to ensure residents had physician orders for the resident's immediate care for 4 or 20 residents (Residents #41, #54, #220 and #271) reviewed for admission orders.		
	The facility did not implement the physician orders in the que (pending) for (Residents #41, #54, #220 and #271).		
	This failure could place residents a	t risk for not receiving appropriate care	and treatment services.
	Findings include:		
	Record review of Resident #41's computerized clinical records, under the section of orders, revealed Resident #41 had 12 orders showing incomplete status since 10/14/2022. The orders included:		
	-*Admit to Long term care		
	-*I have reviewed and concur with the current IDT care plan		
	-*Family/RP aware of resident's medical conditions and current plan of care		
	-*Resident has been informed of DX and medical condition unless contraindicated		
	-*May alter medication by crushing, opening capsules, or administering and/or cocktail all together in food/liquid at one time per MD order due to inability to take all crushed medications individually at every shift unable to tolerate process; becomes tired/full of taking multiple crushed meds individually.		
	-*This resident is free from commu	nicable diseases	
	-*Pressure relieving cushion to whe	eelchair/recliner/Geri chair	
	-*I hereby certify that this resident r	requires NH care for 180 days	
	-*Vital signs Q month

F 0656 Level of Harm - Minimal harm or potential for actual harm	Develop and implement a complete care plan that meets all the resident's needs, with timetables and actions that can be measured. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 46928			
Residents Affected - Some	Based on interviews and record review, the facility failed to develop and implement a comprehensive person-centered care plan for each resident that included measurable objectives and timeframes that met a resident's medical, nursing, and mental and psychosocial needs that were identified in the comprehensive assessment for 4 of 16 resident reviewed (Residents #57, #119, #49, and #271) for care plans.			
	The facility failed to ensure the c Residents #271 and #57.	omprehensive care plan included goals	s and interventions for the care of	
	2. The facility failed to update Residual	dent # 49's care plan for her left thumb	stage 2 pressure injury.	
	3. The facility did not care plan Res	ident #119's surgical incision with 29 s	taples to her right hip.	
	These deficient practices could place residents at risk of not having their individualized needs met, a decline in their quality of care and life, risk for pressure wounds and unwanted pain.			
	Findings include:			
	1. Record review of Resident #271's face sheet, dated 01/13/23, indicated Resident #271 was a [AGE] year-old female who was admitted to the facility on [DATE] with diagnoses of right fibula fracture (break in bone that stabilizes and supports your ankle and lower leg muscle), right tibia (shin bone) fracture, anxiety, depression (mood disorder that causes persistent feeling of sadness or loss of interest), and dementia (memory loss).			
	Record review of Resident #271's admission MDS, dated [DATE], indicated Resident #271 was un and understood others. Resident #271 had a BIMS score of 12, which indicated she had mildly imp cognition. Resident #271 required extensive assistance with two-person assist for bed mobility, trail locomotion, dressing, eating, toileting, and personal hygiene. Resident #271 was totally dependent bathing. Section J for, health conditions, indicated Resident #271 had occasional pain and had rep fractures of the pelvis, hip, leg, knee, or ankle checked. Section M, skin conditions, indicated Resident #371 was at risk for developing pressure ulcers or injuries and did not have surgical wounds checked. Section Area Assessment (CAA) Summary, had the following areas checked and should be care plant the comprehensive care plan:			
	*Cognitive loss/dementia			
	* Communication			
	* ADL functional/rehabilitation potential			
	*Urinary incontinence

F 0656	*Receiving therapeutic or altered c	onsistency diet	
Level of Harm - Minimal harm or potential for actual harm Residents Affected - Some	During an interview on 01/17/23 at 12:51 PM, ADON A said the MDS Coordinator was responsible for completing the comprehensive assessment. ADON A said she expected each focus on the care plan to have goals and interventions in place. ADON A said by not having the goal or interventions in place could place the residents at risk for not having their needs met.		
	During an interview on 01/17/23 at 1:36 PM, the RNC said she expected the care plan to be current to the resident status. The RNC said by not having the goals or interventions they would not be able to provide the care needed to the resident. The RNC said the comprehensive care plan was the responsibility of the MDS Coordinator.		
	During an interview on 01/17/23 at 4:55 PM, the Interim Administrator said he expected the comprehensive care plan be completed and should represent the resident. The Interim Administrator said it was important for the care plan to be completed so staff would know the resident's care needs.		
	Record review of the facility's policy titled Care Plans, Comprehensive Person-Centered, revised on March 2022, indicated .the comprehensive, person-centered care plan is developed within seven days of the completion of the required MDS assessment (Admission, Annual, or Significant Change in status) and no more than 21 days after admission .the comprehensive, person-centered care plan includes measurable objectives and timeframes; includes the resident's stated goals upon admission and desired outcomes; reflects currently recognized standards of practice for problem areas and conditions .

(X4) ID PREFIX TAG SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulator)			on)
F 0689 Level of Harm - Minimal harm or potential for actual harm	During an interview on 01/17/23 at 2:06 p.m., RNC said she expected oxygen cylinders to be always secure in a canister or back of wheelchair holder. The RNC said the risk of oxygen cylinders being unsecure could lead to them falling over or blowing up related to compressed air. The RNC said she expected all staff to know oxygen cylinders should never be freestanding.		
Residents Affected - Some	46310		
	Based on observation, interview, and record review the facility failed to ensure the residents environment remained free of accident hazards by not adequately monitoring the proper storage of oxygen cylinders for 2 of 2 residents, (Resident #'s 16 and 54), proper transfer for 1 of 1 resident (Resident #38) and timely completion of smoking assessments for 1 of 1 resident (Resident #54).		
	The facility failed to ensure Reside	nt #54 had a smoking assessment com	pleted quarterly.
	These deficient practices could pla	ce residents at risk of injury.	
	Findings include:		
	3. Record review of Resident #54's face sheet, dated 1/13/23, revealed the resident was [AGE] year old female who admitted to the facility on [DATE] (readmission 11/26/21) with diagnoses which included: chronic obstructive pulmonary disease (a chronic inflammatory lung disease that causes obstructed airflow from the lungs), unspecified dementia without behavioral disturbance, psychotic disturbance, mood disturbance, or anxiety (a mental disorder in which a person loses the ability to think, remember, learn, make decisions, and solve problems), disorder of the arteries and arterioles (a buildup of fatty deposits in the arteries), major depressive disorder (a mood disorder that causes a persistent feeling of sadness and loss of interest), anxiety disorder (a condition in which a person has excessive worry and feelings of fear, dread, and uneasiness), hallucinations (an experience involving the apparent perception of something not present), and dependence on supplemental oxygen.		
	score was 4, which indicated sever	nuarterly MDS assessment, dated 12/29 re cognitive impairment. The resident restance with transfer, dressing, toilet use tion on unit and eating.	equired total dependence with
	am at risk for Respiratory infections dependence on supplemental oxyg desaturation, and this is very risky encouraged to start cessation. I ha continue to ask to smoke even thor O2 saturation low even with O2 an order to not smoke as this is a resistaturation drop to the 30's and this I have been assessed to be: Super decided that would try nicotine pate Intervention for this focus is to com	are plan, undated, revealed Resident #s/distress, Hypoxia, SOB, and cough regen. I continue to want to go smoke one for me. Only a nurse can take me to snue agreed and will start smoking cessaugh my O2 saturation put me at great rid it is not safe to smoke, but I continue dent right, but nursing judgement is use is detrimental to my health and safety. The storage of the smoker of the storage of the smoking assessment as per facility. A practice safe smoking techniques.	elated to DX of COPD and be daily. I will immediately start moke. I will be educated and tion by using nicotine patch. I can lisk and am not using the patch. My to ask. Hospice will not write an ed here because if I smoke my O2 Nicotine addiction- I am a smoker: smoke Traditional cigarettes. I had cided I want to continue to smoke.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0692 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Some	During interview on 1/13/23 at 3:57 PM with CNA S, she said the DON usually had her to complete the weights weekly or monthly for residents. She said she knew she had to weigh new admits four times weekly and then it depended on if they have had any issues if she had to continue. She said she must weigh all residents at the beginning of the month. She said the weights must be done before the dietitian visits for the month. She said when she completed all the weights, she gave them to the DON, and usually within the next few days she would ask her to re-weigh a resident if needed. She said the DON entered all the weights into the electronic medical records, to her knowledge, after they have been reviewed and corrected. During an interview on 01/12/2023 at 2:24 p.m., the ADON A indicated there were no weekly standards of care meetings to review each resident with wounds, weight loss, or accidents. During an interview on 01/17/2023 at 1:36 p.m., LVN L indicated residents should be weighed on admission LVN L indicated with not knowing the admission weight there could be a weight loss leading to skin		
	problems, and even the loss of mobility. During an interview on 01/17/2023 at 2:39 p.m., the Regional Nurse Consultant indicated she was unaware of weight loss issues. The corporate nurse indicated new admissions should have a weight once a week for 4 weeks or until stable. The corporate nurse indicated the admitting nurse was responsible for obtaining the admission weight. The corporate nurse indicated there was not a reason for the admission or weekly weigh not being obtained. During an interview on 01/17/2023 at 4:55 p.m., the Interim Administrator indicated the physician should be notified when the resident's weight falls in the parameter areas either a loss or a gain. The Interim		
	Administrator indicated health issues could arise when weights were not monitored. The Interim Administrator indicated the charge nurses, and DON were responsible for the monitoring of weights. Record review of a Nutritional Management policy dated 07/01/2022 indicated the facility provides care and services to each resident to ensure the residents maintains acceptable parameters of nutritional status in the context of his or her overall condition. 2. Identification/Assessment: a. Nursing staff shall obtain the resident' height and weight upon admission, and subsequently in accordance with facility policy. C. A comprehensive nutritional assessment will be completed by a dietician within 72 hours of admission, annually, and upon significant change in condition. Follow-up assessments will be completed as needed.

Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	AVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 46928	
Residents Affected - Few		ew, the facility failed to ensure dialysis lards of practice for 1 of 1 resident (Re		
	The facility failed to keep ongoing of	communication with the dialysis facility	for Resident #16.	
	This failure could place the residen proper care and treatment to meet	ts, who received dialysis, at risk for cor their needs.	mplications and not receiving	
	Findings included:			
	Record review of a face sheet dated 01/11/23, indicated Resident #16 was an [AGE] year-old female admitted to the facility on [DATE] with diagnoses of diabetes (chronic condition that affects the way the body processes blood sugar), end stage renal disease (kidneys cease functioning on a permanent basis), and high blood pressure.			
	Record review of the quarterly MDS assessment dated [DATE], indicated Resident #16 was usually understood and usually understood others. The MDS revealed Resident #16 BIMS score was a six, indicating severe impaired cognition. The MDS indicated Resident #16 required supervision with transfers, locomotion, dressing and toileting. Resident #16 required limited assistance with bed mobility, eating, and personal hygiene and extensive assistance with bathing. The MDS under Section O (Special Treatments, Procedures, and Programs) had dialysis checked.			
	Record review of the other summary report dated 01/11/23 revealed Resident #16 had an order to transport to dialysis center on Monday, Wednesday, and Friday via facility van.			
	Record review of the comprehensive care plan dated 03/30/22 indicated Resident #16 had impaired renal function, received dialysis three times a week, and was at risk for shortness of breath, chest pain, and infection to shunt site. The care plan had interventions to monitor the resident's condition pre and post dialysis and report abnormalities to the medical director.			
	Record review of the Resident #16's dialysis communications sheets revealed the facility had not completed the upper portion of the dialysis communication sheet which included the resident's vital signs, condition, or new orders prior to leaving the facility for the following dates:			
	*12/21/22			
	*12/23/22			
	*12/26/22			
	*12/28/22			
	*12/30/22

F 0770 Level of Harm - Immediate jeopardy to resident health or safety Residents Affected - Some	Record review of the quarterly MDS dated [DATE] indicated Resident #34 was usually understood and understood others. The MDS revealed Resident #34 had a BIMS score of 13 indicating intact cognition MDS indicated Resident #34 required extensive assistance with bed mobility, toileting, and personal hy Resident #34 was totally dependent on dressing and bating. The MDS under section O, special treatm procedures, and programs, had IV medications checked indicating Resident #34 had received IV medications within the last 14 days. Record review of Resident #34's comprehensive care plan did not indicate Resident #34 was receiving antibiotics.			
	Record review of the order summary report dated 01/17/23 indicated Resident #34 had an order for Vancomycin HCL intravenous solution 750-0.9mg/150mls-% Use 150ml intravenously every 12 hour cellulitis to right hand for 10 days with an order start date of 01/16/23.			
	Record review of the hospital patient discharge summary report dated 01/15/23 indicated new medication start included Vancomycin HCL injection 750mg/sodium chloride 0.9% bag 250ml take IV piggyback even 12 hours. 250ml/hr. *Hold dose and DO NOT administer IF Trough is 20 or higher. Get trough level befor 1st dose on 01/16/23.			
	Record review of the lab request fo 01/18/23.	rm dated 01/16/23 indicated Vancomy	cin trough to be collected on	
	During an interview on 01/17/23 at last night.	09:45 AM, Resident #34 said he receiv	ved his first dose of IV medication	
		09:50 AM, LVN L said Resident #34 rencomycin trough was obtained prior to I		
	During an interview on 01/17/23 at 12:51 PM, ADON A said she did not see the order to obtain a tro before the first dose of vancomycin for Resident #34 and it was not obtained. ADON A said by not o the vancomycin trough level, Resident #34 could be at risk for receiving more than the therapeutic d vancomycin. During an interview on 01/17/23 at 1:57 PM, the RNC said they should have obtained a vancomycin level prior administering the first dose of vancomycin. The RNC said by not obtaining the trough level ordered the resident was a risk for receiving the wrong dose of vancomycin. The RNC said the nurse hung the medication was responsible for ensuring Resident #34 had a vancomycin trough level prior receiving his first dose of vancomycin.			
	During an interview on 01/17/23 at 5:00 PM, the Interim Administrator said he expected the nurses to f the physician orders. The Interim Administrator said by not following the physicians' orders could cause resident to have adverse effect. Record review of the facility's policy titled Diagnostic Testing Services dated 07/01/22 indicated . this fa will provide the appropriate diagnostic services (laboratory and radiology) required maintain the overall health of its residents and in accordance with state and federal guidelines.

F 0770	Antithrombin deficiency		
Level of Harm - Immediate jeopardy to resident health or	APTT, Anti factor Xa		
safety	See also Heparin-induced thrombo	cytopenia investigation	
Residents Affected - Some	Antithrombin - ideally should be deferred until heparin has been ceased (if not performed for some reason prior to heparin therapy), since heparin will reduce the measured level. Consultation with a haematologist is recommended to guide further testing and management. See also Thrombosis - venous. Low molecular weight heparin (LMWH) and heparinoids Prior to commencing, Full blood count (including platelet count), Coagulation profile (including APTT, INR, Prothrombin time) and renal function should be performed. Platelet count is recommended on day 5 post commencement of therapy.		
	Monitoring of (full dose) low molecular weight heparin (LMWH) therapy is not generally required, except in renal failure, extremes of body weight, pregnancy or other situations where there is an increased risk of bleeding. LMWH should be used with care and monitoring in patients with any abnormality of renal function, particularly the elderly. Monitoring is with an Anti factor Xa level, but should be done in consultation with a haematologist and according to local guidelines.		
		ylaxis is not cost effective, is not requird ding, which is minimal with prophylaction

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFIC (Each deficiency must be preceded by	:IENCIES full regulatory or LSC identifying informati	on)
F 0770 Level of Harm - Immediate	After re-entering the facility on 2/8/23 at 9:05 a.m. additional information was gathered and included the following interviews and record reviews:		
jeopardy to resident health or safety	Record review of the laboratory pro	cess effective 01/18/23 indicated:	
Residents Affected - Some	*Admission orders were reviewed of	luring next the clinical meeting.	
	*All orders were checked to ensure	they were entered correctly. Any uncle	ear orders were clarified.
	*Any laboratory orders were verified of placement in the EMR to ensure laboratory requisitions were completed in the laboratory requisition book.		
	*Nursing to monitor laboratory results and review to ensure the MD was aware. Any new orders received would be implemented.		
	*Clinical meetings will occur twice a day to ensure communication was followed and any changes were updated.		
	*Initial requisition would indicate if a resident had recurring laboratory orders.		
	*During the daily clinical meeting, tl and followed for any order changes	ne PCC dashboard will be utilized to m s.	onitor for lab results, MD review,
	Interviews on 02/08/23 from 09:51 a.m. until 11:05 a.m., the surveyor confirmed the facility implemented their plan of removal sufficiently to remove the IJ by:		
	Interview with 3- 6am-6pm (LVN B, LVN R and LVN Y) nurses who indicated the laboratory process included: when an order for a laboratory was obtained, the order was placed in the resident's electronic medical record, the laboratory requisition was filled out, placed in the laboratory book, and was written on the 24hr report. Residents with standing laboratory orders were indicated on the lab requisition form. The three LVNs said the ADONs review the lab book daily.		
	Interview with ADON A, ADON G, and RNC indicated they had placed a laboratory monitoring process on 1/18/23. New orders and admission orders were reviewed during the next clinical meeting. The laboratory process was:		
	-Laboratory orders received were ensured they were entered corrected in the EMR.		
	-The laboratory requisition was completed.		
	-The laboratory requisition was placed in the laboratory book.		
	The laboratory book was checked daily by the ADONs. Nursing would monitor for laboratory results, notify medical director, and implement any new orders received. If a laboratory result had not been received by 3:00 p.m., the ADON would then call the laboratory to check on the results.		
	Record review of 6 of 6 new admissions revealed if they had orders for laboratory services the laboratory levels were obtained according to orders.

Residents Affected - Few		w, the facility failed to prepare puree fo nce for residents on a pureed diet for 1		
	Cook AA failed to ensure the puree when she used tap water to prepar	e diets were prepared by methods of co e the pureed green peas.	nserving nutritive value, and flavor	
	This failure could place residents o their health.	n a pureed diet at risk of receiving an i	nadequate diet that could affect	
	Findings included:			
	During an observation and interview on 01/09/2023 at 11:38 a.m., [NAME] AA used a metal measuring cup to scoop out green peas from a larger pan on the steam table. [NAME] AA began to puree the green peas, then walked over to the three-compartment sink faucet and obtained tap water. [NAME] AA then added the tap water to the green peas to achieve the texture desired. When asked why she added the tap water to the green peas she denied doing so. When asked again why she added tap water to the green peas she said, I should have used the juice off the peas for nutrition. [NAME] AA said she had not used the recipe for the pureed diet preparations.			
	During an interview on 01/13/2023 at 6:00 p.m., the dietary manager said the pureed foods should be thinned with the juice from the canned vegetable or a broth. The dietary manager said the food will lose its nutrition.			
	During an interview on 01/16/2023 at 10:45 a.m., the Administrator said she expected the pureed foods to be processed by using the juice from the foods or a broth. The Administrator said the dietary manager was responsible for ensuring foods prepared according to the recipe. A policy was requested but not provided.			
	The policy on nutritive value of food	ds was requested but not provided by t	he facility.

	3. Record review of Resident #5's electronic face sheet, dated 01/13/23, revealed a [AGE] year old female who was admitted to the facility on [DATE] and readmitted on [DATE] with diagnoses which included multiple sclerosis (a chronic, typically progressive disease involving damage to the sheaths of nerve cells in the brain and spinal cord, whose symptoms may include numbness, impairment of speech and of muscular coordination, blurred vision, and severe fatigue), sepsis (a serious condition resulting from the presence of harmful microorganisms in the blood or other tissues and the body's response to their presence, potentially leading to the malfunctioning of various organs, shock, and death), anxiety (what we feel when we are worried, tense or afraid), high blood pressure, and Alzheimer's (a type of dementia that affects memory, thinking and behavior).			
	Record review of Resident #5's quarterly MDS assessment, with an ARD of 10/26/22, revealed under Section B, Hearing, Speech, and Vision, was coded as a 0 indicating she understands and was understood by others. Section C, Cognitive Patterns, under section C0500 Brief Interview for Mental Status, which indicated a score of 14 for cognitive intact cognition. Section G, Function Status, under section B indicated she needed extensive assistance with bed mobility, personal hygiene, total assist with transfers, dressing, bathing, and supervision with eating. Section M, Skin Condition, under section M1200 she received pressure ulcer/injury care and application of nonsurgical dressing during the look back period. Review of Resident #5's comprehensive person-centered care plan dated 12/27/17 when it was initiated, and			
	wound to right, distal, lateral calf lo	ndicted: Resident #5 was at risk for fur wer leg and pressure area to right ischi Intervention indicated: Keep physiciar	um related to immobility,	
	During an observation and interview on 01/11/23 at 11:10 a.m., ADON G was performing wound care on Resident #5, when she went from cleaning wound to left ischium to applying clean dressing without char gloves or washing her hands. ADON G cleaned right ischium and did not wash her hands or apply clean gloves before applying clean dressing. ADON G said she should have changed her gloves and washed hands in between dirty to clean to prevent infection.
